—after payment of all interest, dividends, taxes and expenditures of every description for the working as well as improvements of the road. This balance of profits has been applied toward the payment of floating debt.

The Tennessee and Pacific Railroad has been paid for, and its cost included in bills payable, or floating debt. The company has issued $800,000 six per cent bonds, secured by mortgage on this road, of which $520,000 have been disposed of, leaving $280,000 in the hands of the company. When these are sold, the floating debt of the company will be reduced to very narrow limits, and could be wiped entirely out at once by the sale of a part of the stock ($282,218 30) of the Nasbville, Chattanooga and St. Louis Railway held by the directors for the company; but this they have not been inclined to do, as the investment is considered an excellent one for the company.

The operations of last fiscal year have tended to confirm the previously expressed opinion of the Board as to the wisdom of the purchase by this company of the three branch roads—the Tennessee and Pacific, McMinnville and Manchester, and Winchester and Alabama Railroads. The two latter we bought at a cost of $320,000 in forty year six per cent bonds of this company, with first mortgage on those roads, while their original cost was about $1,100,000. And on the Tennessee and Pacific Railroad, which cost originally about $1,000,000, your company has issued its own six per cent forty-year bonds, with a mortgage on that road of $300,000, or $10,000 per mile.

By reference to the foregoing statement, it will be seen that the net earnings on this road will much more than pay the interest upon the $300,000 of bonds issued upon it, and being a bond of your company, promptness in payment of interest and principal is secured.

It is proper to state that interest on the $320,000 of six per cent bonds of this company, issued to pay for the McMinnville and Manchester and Winchester and Alabama Railroads, did not commence running until 1st January last, so that in the above statement only $9,600 is charged for interest on account of the purchase of these roads, while the interest of the whole year would have amounted to $19,200. But, by reference to the net earnings of these roads, it will be perceived that the profits for the year were sufficient to pay that sum and still leave a surplus of $4,645 17.

Of the items in the above statement charged against net earnings, some will not occur again, while others are extraordinary, and may be stated as follows:

25 Nashville and Northwestern Railroad Bonds indorsed by this company	$25,000 00
Right of Way, Nashville and Northwestern R. R.	2,133 58
Extra amount of Steel Rails	32,297 71
Extra amount of Cross Ties	5,100 00
Iron bridges on Main Line	18,600 81
Iron bridges on Tennessee and Pacific Railroad	12,011 22
Making a total of	$95,143 32

which are strictly extraordinary payments. The iron bridges are built to take the place of wooden ones, and will be attended with no expense for many years to come.

From the above it will be seen that after the extraordinary work of laying steel rails and building iron bridges is finished, the amount of net earnings to be divided to stockholders must be largely increased, if the present gross earnings can be maintained at reasonable rates.

We paid for steel rails and fastenings during last fiscal year $129,190 85, of which amount we consider as above, $32,297 71, as extraordinary for the year, leaving charged to ordinary expenses $96,893 14, which we think is still a sum in excess of the amount that will be required for the year just entered upon. At the end of two years from this date, we will have the entire line of the Chattanooga Division laid with steel rails, after which probably fifty thousand dollars or less per annum will answer for renewing the St. Louis Division of your line with steel rails and for other repairs. Besides, the expense of track labor and cross-ties will be greatly reduced as we progress in laying steel rails.

Considerable addition to the earnings of your road is expected from the improvements being made at South Pittsburg and Victoria, on the Jasper Branch, by the Southern States Coal, Iron and Land Company (Limited), of England, a full reference to which was made in last report.

The balance of the cost of extending the Jasper Branch Road from Jasper to Victoria, 7⅛ miles, with side tracks, was paid about the beginning of last fiscal year, and the bonds ($90,000) used for its construction, which the English Company took at par, now appear in the statement of the Treasurer.

Settlement in full of the lien of the United States upon fifteen engines, bought with the St. Louis Division, has been made, and a release of said lien given by the United States; your company receipting to the Government for the amount of service performed and referred to in last report, and compensation for the service performed on that Division for the Government since July 1st, 1877, has been promptly paid.

The company have 86 engines, 9 of which are unserviceable. The car equipment consists of 28 coaches, 14 baggage, 2 mail, 1 pay, 51 stock, 261 flat, 718 box and 2 wrecking cars. Number of miles run by engines, 1,678,045. Total train mileage, 1,386,736.

Number of passengers carried east, 90,541; do. west, 95,587—total, 186,128.

The aggregate receipts from freight on the entire line were $1,287,822 81; from passage, $516,-

383 56; from mail, $42,848 78; and from rents and privileges, $25,258 60—total, as above, $1,871,808 70. The expenditures were: for maintenance of way, $342,352 11; motive power, $286,275 32; maintenance of cars, $117,488 12; conducting transportation, $261,956 13; miscellaneous, $62,198 46—total, as above, $1,070,270 14. Net earnings, $801,538 56.

BALANCE SHEET, JULY 1, 1878.

Capital stock		$6,848,899 95
Less amount held by the company		273,604 32
		$6,575,295 63

The liabilities soon to be met, and assets easily realized upon, are designated by a *.

President.—E. W. COLE.

Directors.—E. W. Cole, John P. King, G. M. Fogg, W. T. Walters, E. L. Jordan, J. W. Childress, Thos. C. Whiteside, V. K. Stevenson, W. S. Huggins, A. Iselin, Jr., N. C. Collier, J. A. Satterwhite, B. F. Wilson, T. D. Fite, Thos. Lipscomb.

Secretary and Treasurer.—R. C. BRANSFORD.

Resident Engineer.—B. C. MORRIS.

General Superintendent.—J. W. THOMAS.

Have We too many Railroads?

The Philadelphia North American says that by this time many of those who in 1873 raised the most clamor about the ruinous excesses of our railroad system have seen those excesses eclipsed by the failures of savings banks, life insurance companies, merchants and manufacturers; and the feeling begins to make headway that all this railroad scare must have been as foolish as the mania it was intended to correct. It then adds:

The whole tendency of modern civilization is toward an immense increase of railroad facilities everywhere. Railroads are the pioneers of settlements; the servants and stimulants of agriculture, manufactures and commerce, the instrumentalities of travel, refinement, health, education, luxury and peace. They are friends alike of rich and poor—of labor and capital. Railroading is one of the greatest arts of the age we live in, and those who understand it aright can achieve marvelous things. To pay best, the system must be brought down closer to the wants of the people. It must do for the masses all that the common roads attempted and performed so rudely. The only State in the Union where the railroad system has attained full and unrestrained development is Illinois, and that State will under its influence become the most populous and wealthy in the republic unless others betake themselves to the same means of development in the same degree. This is a prospect for New York, Pennsylvania and Ohio to ponder over seriously, if they would preserve their rank in the confederacy and not be humiliated by the loss of it.

Burlington and Missouri River Railroad.

In regard to the question whether the land grant of the Burlington and Missouri River Railroad in Nebraska is affected by the recent decision of the Secretary of the Interior, Judge Dillon of the U. S. Circuit Court has already decided (see 3d Dillon, 316, 317,) in a former case as follows:

After a careful consideration of the language of sections 18, 19 and 20 of the act of 1864, upon which the rights of the Burlington company rest, and a comparison of it with the language used in respect to the main company and its branches, my judgment is that the grant to the Burlington company is an independent grant not made by referring to the grants to the other companies, and therefore, that section 3 of the act of 1862, whatever may be its scope and effect, has no application to the Burlington company. This last road was not a part of the original scheme. It was to have no government bonds, and was simply aided, as many other roads in Iowa, Wisconsin and other States have been—by a grant of public lands.

☞ Articles of incorporation have been filed by the Minneapolis, St. Cloud and Sauk Rapids Railroad Company, which will build a line from Sauk Rapids to Minneapolis, Minn., connecting at the former place with the Brainard branch of the Northern Pacific Railroad, making Minneapolis, instead of Duluth, the terminus of the Northern Pacific, and giving direct communication with the East by the shorter line over roads owned or controlled by itself.

☞ A certificate has been filed with the Secretary of State of Ohio of the Cincinnati and Eastern Railway Company, extension of the New Richmond branch up the Ohio river to the town of Aberdeen, by S. Woodland and others.

☞ The Baltimore and Cumberland Valley Railroad is to extend from Smithburg, Md., on the Western Maryland Railroad, north to Quincy, Pa., 21 miles. Contracts for the first nine miles have been awarded.

Evading the Law.

It is not generally known that companies operating railroads are prohibited from building their own rolling stock, engines, etc. The object of this law was to prevent combinations of capital against the industrial interests of the State, and to prevent "monopoly" in any of the branches. The railroad companies, however, are permitted to repair and rebuild, and on this ground the Constitutional objection is overcome. A set of "running gear" of a car, which has been in use a few days, is utilized and a new car built upon it, and a pair of driving wheels, or a new boiler, which has been tested on an old locomotive, is used to construct an entire new engine. The charter also prohibits the use of a "pusher," or an extra locomotive to be attached to the rear end of a passenger train, and hence the two or three engines to move passenger trains, which are coupled to the front of the train, are called "helpers." "Pushers" are used on freight trains, in some cases two engines being in the rear and two at the head of the train.—*Pittsburg Chron.*

Interest paid by United States, $39,835,039 84; interest repaid by transportation of mails, &c., $9,881,444 25; balance of interest paid by United States, $29,953,595 61.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, July 31, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

Redemption of Five-twenty Bonds.

The Secretary of the Treasury issued on the 10th inst., the sixty-seventh call for the redemption of 5-20 bonds of 1865—consols of 1865. The call is for $5,000,000, of which $2,500,000 are coupon and $2,500,000 registered bonds. The principal and interest will be paid at the Treasury on and after the 10th day of November next, and the interest will cease on that day. The following are the descriptions of the bonds:

Coupon bonds, dated July 1, 1865, namely: $50, Nos. 71,001 to 72,000, both inclusive; $100, Nos. 127,001 to 129,000, both inclusive; $500, Nos. 87,001 to 90,000, both inclusive; $1,000, Nos. 169,001 to 174,000, both inclusive.

Registered bonds, redeemable at the pleasure of the United States after the first day of July, 1870, as follows: $100, Nos. 18,651 to 18,750, both inclusive: $500, Nos. 10,801 to 10,950, both inclusive; $1,000, Nos. 36,551 to 36,900, both inclusive; $5,000, Nos. 10,601 to 10,900 both inclusive; $10,000, Nos. 20,901 to 21,300, both inclusive.

☞ The earnings of the Central Pacific Railroad Company for July, 1878, were $1,517,000; for July, 1877, $1,891,867. The earnings for the first seven months of 1878 were $9,400,363; do, 1877, $9,280,572.

American Railroad Journal.

Saturday, August 17, 1878.

Financial and Commercial Affairs.

The same irregularity which characterized the market last week has prevailed since our last report. The volume of transactions reported at the Stock Board has, however, fallen off in amount. The line of stocks operated in has not materially changed; the only difference noticeable is in some prominent "fancy" suddenly dropping into dullness and inactivity, its place being for the time occupied by some other stock.

As heretofore the large majority of stock dealings are purely speculative. Only a small fraction of purchases can be marked for investment, and of this class of stocks few or none appear on the active list. The "granger" stocks have continued to lead all others in amount dealt in. Erie which came somewhat prominently to the front soon fell again into the background without any permanent change in value. And while considerable fluctuations have continued to mark the dealings in all the leading "fancies," in some instances reaching 12@15 per cent, no difficulty in settlements has been reported nor any failures.

In one of our late issues the decision of the Secretary of the Interior in the matter of railroad land grants as affecting the right to pre-empt those lands after the date of limitation, three years, had expired was noticed. Now, it may be added that the roads affected by that decision have decided to take the matter before the United State Supreme Court at an early day in a test case. That decision will be final. The lands now unsold are reported at about 27,000,000 acres worth $20,000,000. The litigation will have a

tendency to temporarily check sales of the lands in question. The pre-emptor or settler in general is too poor to consent to any risk or question of his title.

Philadelphia advices indicate little change in the Money market. The supply of money being as heretofore in excess of business wants. Nor is it probable that concessions would stimulate business into activity. Call loans are quoted at 3@4 per cent. Commercial paper is scarce and wanted at 4½@5 per cent. Transactions at the Stock Board were moderate in amount, the market closing strong with prices slighly higher. Sales of Pennsylvania Railroad shares were at 32½@32⅝. Reading shares opened at 17 and closed at 17⅜. Sales of Reading bonds 7s due in 1893 at 112.

From Baltimore a very quiet market is reported. The movement in merchandise is fair for the season with good prospects for the future. Money is in good supply and slight demand as heretofore. Dealings in the stock market were very limited, buyers and sellers not meeting readily. Baltimore and Ohio Railroad stock was quoted nominally at 85@89, and the scrip at 87@88½, a decline from our last report. No sales of North ern Central, 14 was bid. Baltimore and Ohio bonds were quoted at 102 bid for 1880s, and 106 for 1885s. The miscellaneous list was generally neglected and no sales reported.

Boston reports a steady Money market. The ease of the market is indicated by loans on call at 3 per cent. Prime business paper sells readily at 3@4 per cent for short dates, with transactions reported of manufacturers' paper, 1 year's time, six months' interest in advance at 4, 4¼@4½ per cent. Sales of cotton goods for the month thus far are large. The general volume of business is not unusually large but is satisfactory to dealers.

Gold marked a slight advance on Tuesday closing at 100⅝. This advance was due to an advance in sterling exchange and the rumor earnestly advocated that gold must now be exported since the market was for the moment bare of bills. The extraordinary ease of our money market against an increasing stringency in London may cause shipments to be made as predicted, but for how long a time? The large balance of trade in our favor has caused our late foreign creditors to send back our bonds in large amounts in order to keep their gold. Those bonds have been readily absorbed by idle capital and cannot go abroad again. The amount of idle money has scarcely been lessened here by the transaction. The volume of domestic exports continues undiminished, importations have not increased nor are they likely to; and with our bonds at home either our neighbors must ship us gold or stop eating our breadstuffs.

The Government, either for prudential reasons of its own, or acting upon the advice of the New York bankers, hesitates in the matter of resumption. The New York banks now hold some 15 millions gold on deposit for Government account. A shipment of $7,000,000 more has been ordered from San Francisco. Silver is coined and hoarded. Why not set it loose?

If we are to believe a late writer upon "The Currency Question," the Government cannot safely resume specie payments until it has accumulated a fund of coin equal at least to its paper afloat. But this theory happens to be contradicted by the experience of every bank official of specie-paying times. The practical fact is this: Whenever paper is made equivalent in value to gold by resumption there will not exist any peculiar demand for gold, because for all purposes of domestic traffic it is less convenient than paper. If the balance of foreign trade was against us then there would be a demand for gold to pay balances due; but the opposite being true no large sum of coin can be used or kept in circulation from its bulk and inconvenience as compared with paper. Make gold and paper equal in value for all commercial uses and we all prefer paper. This is the simple fact which practice has demonstrated, and will again show to the Government when it shall undertake resumption.

Foreign Exchange has advanced and several leading houses name a rate equivalent to saying we do not care to draw. How long this can last is apparently not difficult to determine. However, the Bank of England having unexpectedly raised its rate of discount on Monday from 4 to 5 per cent indicates an increased demand for money as drawers of sterling bills believe. Probably the real reason for the advance in the Bank's rate was to stop the drain of gold that has continued for some time.

Since our last issue another call for $5,000,000 5 20 bonds has been made by the Secretary of the Treasury. We now quote Government bonds of the various issues as follows:

United States 6s, 1881, registered, 107⅝@107¾; do. coupon, 107⅝@107¾; 5-20s, 1865, new, registered, 102½@102⅝; do. coupon, 102½@102⅝; do. 1867, registered, 105@105¼; do. coupon, 105@105⅛; do. 1868, registered, 107@108; do. coupon, 107@108; ten-forties, registered, 106⅛@106⅜; do. coupon, 109⅛@109¼; 5 per cents, 1881, registered, 106¼@106⅜; do. coupon, 106¼@106⅜; 4½ per cents, 1891, registered, 103¾@104; do. coupon, 104⅞@105; 4 per cents, 1907, reg., 100¾@101; do. coupon, 100¾@101; sixes, currency, 119⅞@120.

Domestic Produce continues in active demand. Prices are generally higher than at our last report. The exports for the week have been $6,636,776, against $4,464,846 for the corresponding week last year. Total shipments for the year amount to $209,933,426 against $164,874,757 last year, an increase of $45,058,669.

Cotton which had advanced to 12 cents at the close last week immediately fell off several points and has continued irregular during the week. We now quote spot cotton, middling uplands, at 11.13 16. Futures were sold at 11.86 for August delivery; 11.54@11.58 for September; 11.31@11.33 for October; 11.15 for November and 11.04@11.08 for December.

Returns of the cotton crop for 1877 make it amount to about 4,250,000 bales from the deliveries. The amount still in planters' hands and carried over into next year's deliveries is not large. So for all practical purposes the crop can be estimated near the exact amount.

Ocean freights were active at the close on Wednesday and as a rule stronger. Grain to Liverpool by steam 7⅛d.@8d. per 60 lbs. Flour by steam 2s. 6d. Cotton by steam ¼d. To London by steam grain, 6d.@6¼d. To Glasgow by steam flour, 2s. 4½d.@3s.; cheese at 45s.

Metals still remain dull and prices favor buyers. Sales have been reported of both American and Scotch pig iron on private terms. Quotations for New Iron Rails $32@$36; Old Rails at $17@$18; Steel Rails at $44@$45.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

WHAT SHALL WE DO WITH OUR FIVE-TWENTIES?

The rapid calling in of the Five-Twenties of 1865 by the Government, and the fact that the Five-Twenties of 1867, of which there are over three hundred millions outstanding in the hands of investors, come next in order, is causing a general inquiry among the holders of these bonds as to which issue of Government Securities they shall select in making an exchange while they can realize the present premium.

The desirable bonds for investment are the "Fours," "Four-and-halfs," "Fives," "Ten-Forties," "Sixes of 1881" (second and third series), and "Currency Sixes."

In addition to this demand from holders of Five-Twenties there is a large demand from new investors more widespread than for many years.

We, therefore, naturally look for a gradual advance in the prices of the issues which are most desirable.

We have just published the fifth edition of our "MEMORANDA CONCERNING GOVERNMENT BONDS," designed to answer all questions in regard to these securities, and to give full information to intending investors as to the probable time for which the different issues may be expected to run, their relative desirability for investment, etc., copies of which can be had on application at our office, or will be sent by mail to any address.

FISK & HATCH,
Bankers and Dealers in Government Bonds,
NO. 5 NASSAU STREET,
AUGUST 12, 1879. NEW YORK.

☞ Mr. J. E. Gimpling has been appointed Receiver of the Dayton and Southeastern Narrow Gauge Railroad. Mr. Mead, late President of the road, states that the appointment of a Receiver will bring about a settlement and aid, rather than prevent, the completion of the road to Wellston.

☞ The Detroit and Milwaukee Railroad is advertised to be sold in Detroit, Mich., on Sept. 2. Nine-tenths of the bondholders have consented to a scheme of foreclosure and reorganization, by which the road will pass into the control of the Great Western Railway Company of Canada.

Kansas Pacific Railway.

The semi-annual statement of the Kansas Pacific Railway Company for the first six months of this year is as follows:

FIRST DIVISION.

Gross earnings	$660,993 08
Operating expenses	324,757 10
Net earnings	$336,235 98

SECOND DIVISION.

Gross earnings	$443,641 81
Operating expenses	338,470 75
Net earnings	$105,171 06

THIRD DIVISION.

Gross earnings	$244,655 46
Operating expenses	334,764 92
Deficit	$90,109 46

The statement is given by divisions for the reason that there are different bonds issued on each section, as follows: First division, February and August, 6 per cent bonds; second division, June and December, 6 per cent bonds; third division—Denver extension—7 per cent bonds.

Gross earnings for the whole road	$1,348,290 30
Gross operating expenses	997,992 87
Net earnings	$351,287 43

☞ A testing machine of 100 tons capacity has just been completed by Riehle Brothers, of Philadelphia, for the Chicago, Burlington and Quincy Railroad. This machine is adapted for applying tensile strains to bridge-rods, etc., up to forty feet lengths, and even longer if necessary. Short specimens can also be tested with equal accuracy and convenience.

☞ The new branch line of railway being built by the Milwaukee Cement Company, to connect their works in the town of Milwaukee with the main line of the Chicago, Milwaukee and St. Paul railway, will be completed about the 25th inst.

☞ A company is to be organized for the purpose of building a railroad from Marshall, Texas, via Carthage and the Neches Valley, to Sabine Pass, a distance of 220 miles. The road will be narrow gauge.

☞ The proposed narrow gauge railroad project between Tuckerton and Mount Ephraim, has been abandoned, in consequence of the indisposition of the people along the proposed line to invest their money in the enterprise.

☞ The officers of the Southern Pacific Railroad Company, recently elected, are: President, Charles Crocker; Vice President, David Colton; Treasurer, S. T. Smith; Secretary, J. L. Wilcott.

☞ Over three miles of the track of the Shenandoah Valley Railroad has been laid, commencing at a point on the Baltimore and Ohio Railroad, near Duffield's, in Jefferson county, W. Va.

☞ The receipts of the Patent Office at Washington for July were $56,019 50, against $55,119 25 last year, and $53,389 40 for July, 1876.

☞ The Vaca Valley (Cal.) Railroad, of which Mr. Mansfield is the chief owner, has been placed in the hands of Lloyd Tevis, the mortgagee.

Duties and Responsibilities of the Locomotive Engineer.

Travellers comfortably seated in the luxurious cars now provided by nearly all of the leading railroad companies in this country, have but little cause to think about how the engineer, (or driver, as he is called in England and in Europe,) is fixed for comfort or his capacity to care for the lives of those upon the train. In the early history of railroading, the engineer was subjected to the pelting of storms or the heat of the sun; but, while he is now shut in under shelter and has the advantage of important inventions to aid him, he is still the man more than any other responsible for the safety of the train and those who may be passengers on it. Hence great care is exercised in the selection of men for this important position, and those selected are known to the company from long service in other capacities on the road, particularly as firemen.

A large majority of the engineers commence their career as firemen, and in this capacity serve from three to six years before they can expect promotion. Even the position of fireman is done of the first importance, because if the fire is not properly attended to, so that steam can be kept up to a certain pressure, the engineer will be unable to reach his destination at the time fixed for his arrival. When wood was used, but little judgment was required, but rather the strength to lift sticks of wood and thrust them in the firebox The use of coal, however, requires judgment as well as strength, so that the fire may be constantly kept at a certain heat, and to do this but small quantities are thrown into the firebox at a time, and if soft coal, this must be done every few minutes. In a run of a 100 miles of the express train, a fireman will handle from two to three tons of coal, the quantity depending somewhat upon the grades of the road.

An intelligent fireman, one who is industrious and desires to be advanced, can always make a friend of the engineer, and get from him the instruction necessary to a proper understanding of the various parts of the engine that need constant watching. It is not absolutely necessary that he should be a machinist, or know how to handle tools, but before he can expect promotion he must know every part of the engine, and be able to remedy any temporary defects that might delay its proper work. Hence it is that many, after serving as firemen for a year or two, find they have no particular fitness for the work, and seek other employment. Railroad companies are therefore careful in the selection of men who seek this position, because if they are to be the future engineers it is important that only intelligent and sober men shall be chosen.

Engineers may not be thoroughly educated men, but they must have at least a common school education, under the present system on most of the roads, particularly the Philadelphia, Wilmington and Baltimore Railroad, for here they are required to keep a record of the amount of coal and oil used, the number of miles run, the number of cars on each train, and make out a monthly statement showing the average cost of running each day for the month.

The engineer is, therefore, not only required to be intelligent above the average of those who labor but he must be a man of undoubted courage, and prompt to act in cases of emergencies. He is of course at the head of the train, and to him the company look for the proper care of their property, and when danger to it comes, as well as to the lives of the passengers, it will not do to hesitate, because one second lost in thought may end his own life as well as the lives of scores of others.

To secure this safety the engineer sits upon the right side of his engine, in such a position as to command a clear view of the road, having within his reach, the lever for starting and stopping the engine, the cord attached to the steam whistle, the rod leading to the sand box, because the sanding of the track when sudden stoppages are needed in times of threatened disaster is an important adjunct; the lever of the pump, to keep the boiler properly supplied with water, and what is of equal importance, the small lever, which applies power to all the brakes of the train at the same moment. Now one would think, with all these various levers, cords and rods, the engineer would not possibly have time to keep a good look out and attend to them, but he does, and so quietly and with such system, that a stranger on the engine would scarcely notice that he had touched any of them. But watch closely, and it will be seen, that while the train is moving at the rate of forty or fifty miles an hour, the water cocks are tried to see how the water stands in the boiler, and perhaps the next thing necessary will be the starting of the pump, and while doing this a white sign, with the letter W on it, tells the engineer that he is approaching a country road at grade, or a station, and he must therefore sound the whistle. If the fireman be a new man, he has to be watched, and often directed when to put coal on, but if well acquainted with the business, he gives the engineer but little trouble in this respect. So systematic is the work of the engineer, and so well does he know the capacity of the engine and the various grades of the road, that it is scarcely necessary for him to look at the clock in his cab, to ascertain if he is on time. If he starts on time, but is afterwards delayed at the stations, he knows exactly the places of the road where he expects to make up the loss and keep up his reputation for always coming in on time. The engineer who is always getting in late does not gain many friends, and cannot expect to hold first class positions very long.

The running of trains in daylight is not attended with near so much danger as at night, as the engineers can see at a great distance and therefore avoid or prevent accidents from obstructions, but at night there is constant anxiety, and the utmost vigilance is necessary. The head light on the locomotive is of more value to those who are walking upon the track, or are about to cross it, than it is to the engineer, for his vision, with the best light yet invented for engines, does not extend more than four or five hundred feet, and then it is not of sufficient brilliancy to detect small obstructions like that which wrecked the train a month or so ago below Claymont. A tie laid across the track, or a cow or man walking upon it would be seen, but unless the man or cow got off they would certainly be struck, because when a train is moving at the rate of 30 or 40 miles an hour it would pass over at least one-fourth of the distance in view from the time of the discovery before the brake could be fully applied; but the speed would be very much lessened, and though the engine might be thrown from the track, the engineer and firemen would have time to escape in many cases by jumping from the train. Nearly every engineer who has been in the service for many years can relate many tales of wreck and narrow escapes from death or severe injuries, but still they are not deterred from continuing the same business, but their vigilance is redoubled to prevent future mishaps. Mr. Nat. W. Guahin, now station master at Wilmington, who was the engineer of the first coal burning locomotive on the P., W. and B. Railroad, met with a mishap from obstruction on the track at night. It was very dark and stormy, and, while his engine was running at about twenty miles an hour, it struck a cow, which was not seen at all. The engine left the track, and Guahin seized the long bar, and while reversing the engine she went over, throwing him on the bank without doing him any injury. Of course, a greater speed of the train might have ended more disastrously.

The dread of engineers, in former years, was in passing through woods, in dark nights, after a heavy storm of wind, for fear of trees blown down or of broken culverts, after heavy rains, but on most of the principal roads the section men pass over the track during and immediately after storms, to see if damage has been done, and, if so, to warn approaching trains. Accidents from rails breaking, a rare occurrence now, breaking of axles, &c., are of course, entirely beyond the control of engineers, as the examination of these things is in the hands of parties specially employed for this purpose.

It is said that engineers are not generally long lived, even if they escape accidents, particularly those who have charge of express trains, for the reason that the constant strain upon the mind, great anxiety, as well as the constant shaking and jarring they receive while the engines are running, has a tendency to bring on ailments which shorten life. This general shaking up that engineers receive can only be appreciated by getting upon a locomotive that runs forty miles an hour. Though there are springs upon the huge machine, one would scarcely imagine that such is the fact. The engineers of freight engines fare better, because there is less responsibility and the trains move much slower.

A day's work for an engineer consists on many of the roads of a run of a 100 miles, but this rule is not absolute, for in some cases the distance is extended to 125 miles; therefore, it is not the hours given to labor that tell upon this class of employes of railroads, but, as before stated the responsibility resting upon them.—*Phila Ledger.*

The Worcester Excursion Car.

The Boston Daily Advertiser of 29th ult. gives the following very minute description of a car recently constructed at Wilmington, Del., for the Worcester Excursion Car Company:

Exclusive of platform the car is 52 feet in length, with a width of 9½ feet. At one end of the car is a smoking and reading room, the seat of which changes to two comfortable beds. Next to this is a Baker heater, the double pipes of which pass entirely around the car, and a porters' closet for bedding, etc., while on the opposite side is a ladies' toilet room. At the opposite end of the car are the pantry and kitchen, with a butler's room, a large range, pump, etc., while on the platform outside, which is 4¼ feet wide, are a refrigerator, water tank, and fuel box. Under the car are an ice chest, tool box, vegetable cellar, portable flag staffs, wash tubs and place for general storage. At the centre is a commodious dining room with a black walnut dining table twelve feet long and black walnut, cane and folding chairs. At the sides are seats which are readily changed into beds, and above are the berths on the same generally plan as is followed in the arrangement of Pullman cars. In the various toilet rooms, closets, etc., the upper part is utilized by shelves for the reception of personal baggage. The car has nine lamps, two of which are large pendants and one a large table lamp. In the finish of the interior black walnut, rosewood and mahogany are used, the trimmings being of silver. The floor is covered with a handsome Brussels carpet; crimson plush is used in upholstering the seats, and the curtains are of rich silk damask in two shades of brown. The mirrors are of heavy plate. The windows are double, of plate glass, and are furnished with fine wire screens to exclude dust; the deck lights are of richly colored stained glass, and the ventilators are of Howard's patent. The car is as fully equipped as any house, everything being in keeping with the construction of the car. It is designed to have accommodations as good as the best hotels afford. It can accommodate a party of twenty, with sleeping quarters equal to the best sleeping cars. The car is provided with the Miller Platform and Westinghouse Brake.

☞ Work on the Rochester and Northern Minnesota Railroad is progressing rapidly; the rails are now down from the junction with the Winona and St. Peter Railroad at Rochester to New Haven about ten miles.

☞ The locomotive repair shops of the New York and New England Railroad are to be removed from Boston to Readville.

New York City and Northern Railroad.

On the 23d of July, 1878, there was recorded at the Register's Office, in this city, a mortgage from the New York City and Northern Railroad Company to George Silsman Scott and Oliver Hazard Palmer, Trustees. The road runs from the junction of the Harlem and East Rivers to or near King's Bridge, thence northerly to and through Yonkers, Greenburg, Mount Pleasant, Ossining, Yorktown, Carmel, and Southeast, and terminates on the New York and Harlem Railroad at or near Brewster's, in Putnam County. The bonds secured by this mortgage are of two kinds, 400 of them being for $500 each, and 1,600 for $1,000 each. The bonds are dated May 1, 1878, and are due in 1908 at the office of the company in New York, with interest at the rate of 7 per cent. Three hundred thousand dollars are reserved from the sale of the bonds for the purpose of laying a double track, and for the purpose of purchasing additional terminal facilities. The name of the bonds is "The New York and Northern Railroad Company, incorporated under the Laws of the State of New York, $1,000 First Mortgage Sinking Fund Bond No.——." The mortgage provides that in case the interest shall be in default for 12 months the whole of the principal shall become due, and it also provides that in case of such default, and upon the written request of one third of the holders of the bonds, the Trustees shall sell at public action all the rights and property of the road, of every description. The mortgage is secured by lien upon the company's road, constructed and to be constructed, and also upon all the tools, rolling stock, machine shops, equipments, and depots.

The road runs through the counties of New York, Westchester, and Putnam. The mortgage includes all the interest in the road formerly known as the "New York and Boston Railroad" and the other premises conveyed by Eugene N. Pomeroy, as Referee, to the Farmers' Loan and Trust Company, by deed dated June 7, 1876, and also a lease of the "New York, Westchester and Putnam Railroad Company," and all the rights of Jesse Seligman and John Crossley Brown, Trustees. The bonds are signed "The New York City and Northern Railroad Company, by A. V. Stout, President; attest, John McMillan, Secretary." The mortgage was acknowledged before Charles Roth, Notary Public.

Welland Canal.

The Welland Canal (connecting Lakes Erie and Ontario) improvement will be completed about 1880. The present depth is ten feet, and when the work now being prosecuted by the Dominion Government is completed vessels of fourteen feet draft will be enabled to pass through the canal, which will accommodate most of the large lake craft that cannot lock through at present. The improvement will not allow "vessels of the largest ocean tonnage to enter Lake Erie" from the ocean. The tonnage of vessels that are able to pass through the Welland Canal at present is from 300 to 400, and they carry from 18,000 to 21,000 bushels of corn. It is not probable that, in the event of the completion of the canal, ocean steamers — the present class — will load at Chicago docks and proceed direct to Europe, but it is quite likely that craft—both sail and steam—will be built and adapted especially for the lake, canal, river and ocean trade. At least that is the opinion some experienced lake and ocean navigators have expressed. The Chicago Tribune says:

Any of our present lake vessels that do not draw over fourteen feet of water, with cargo on board, will be enabled to pass through the canal in 1880, and if the St. Lawrence canals and the Galoup rapids are deepened and improved by that time, they can pass through to the ocean; and ocean vessels of similar draft and tonnage can come to this port, thus giving Chicago direct trade with all the ports of the world without breaking bulk. Work is also in progress on the lower or St. Lawrence canals and rapids.

The Coal Trade.

The total tonnage of anthracite from all the regions for the week ending August 8, as reported by the several carrying companies, amounted to 283,019 tons, against 220,247 tons in corresponding week last year, an increase of 62,772 tons. The total amount of anthracite mined for the coal year is 8,884,186 tons, against 11,489,300 tons for same period last year, a decrease of 2,605,174 tons. The quantity of bituminous coal sent to market for the week amounted to 70,793 tons, against 39,500 tons in corresponding week last year, an increase of 31,293 tons. The total amount of bituminous mined for the year is 1,626,944 tons, against 1,807,723 tons for corresponding period last year, a decrease of 180,779 tons. The total tonnage of all kinds of coal for the week is 353,812 tons, against 259,787 tons in corresponding week last year, an increase of 94,065 tons, and the total tonnage for the coal year is 10,511,130 tons, against 13,297,023 tons to same date last year, a decrease of 2,785,893 tons. The products of the mines of the Cumberland coal region for the week ending August 8 was 38,843 tons, and for the year to that date 843,012 tons, an increase of 93,769 tons as compared with the corresponding period of last year. The shipments to the Baltimore and Ohio Railroad were, for the week, 18,274 tons; for the year, 476,965 tons, an increase of 48,206 tons as compared with 1877. The shipments to the Chesapeake and Ohio Canal were, for the week, 18,179 tons; for the year, 305,122 tons, an increase of 59,937 tons as compered with 1877. The shipments to the Pennsylvania Railroad were, for the week, 2390 tons; for the year, 60,925 tons, a decrease of 14,376 tons as compared with 1877.—*Phila. Ledger, Aug.* 12.

Indianapolis, Bloomington and Western Railroad.

The main line of the Indianapolis, Bloomington and Western Railroad will be sold at Bloomington, Ills., on the 31st inst. by J. A. Jones and Wm. P. Fishback, masters, under concurrent decrees of foreclosure granted by the U. S. Circuit Court for Indiana and the Southern District of Illinois. The sale will include the 202 miles of road from Indianapolis to Pekin, Ills., with the franchises, etc. The sale will be made subject to all valid claims, judgments and taxes due and unpaid; and to the claims allowed by the courts for labor and materials furnished for six months prior to Dec. 1, 1874. Each bidder much deposit $50,000 as security, and the purchaser must, in addition, pay $50,000 cash on the day of sale, and on confirmation of the sale such additional sum in cash as may be needed to pay the costs and receiver's debts; the rest of the purchase money may be paid in bonds and coupons at their *pro rata* value. The sale will be without appraisement, and not subject to redemption, and full title will be passed to the purchaser.

Mr. Sumner R. Stone, No. 46 Exchange Place, New York, chairman of the committee of extension bondholders of this road, states that the agreement for re-organization, dated July 10, having been signed by more than a majority of the bondholders, is now binding, and that all other bondholders who desire this committee to represent them in the proposed purchase of the road must sign the agreement above referred to, and deposit their bonds, and $5 assessment on each bond, with the Union Trust Company on or before the 6th of September.

☞ At a recent meeting of the stockholders of the Massachusetts Central Railroad Company it was voted that the Directors be authorized to take such steps as in their judgment are advisable for the extension of the road to the Framingham and Lowell Railroad, near the new State Prison, and to make such contract with the latter company as shall seem expedient in relation to the location, construction, operation and control of such extension, and to issue such additional stock as shall be needed for the purpose of carrying out such contract.

☞ Mr. H. W. Fuller has been appointed General Eastern Passenger Agent of the Erie Railway Company in place of Mr. C. P. Craig, who has resigned. Mr. B. M. Arms retains his place as General Western Passenger Agent, having his office in Chicago, and representing the company in the Northwest as heretofore, and also in the Southwest, succeeding Mr. Fuller. Mr. John S. Bartlett has been appointed Northern Passenger Agent, having charge of the middle and northern districts of the road, with office in Buffalo.

☞ The Nebraska City, Taber and Botna Valley Railroad Company has been organized to build a railroad from the Chicago, Rock Island and Pacific Railroad, near Atlantic, Iowa, to East Nebraska City, about 65 miles; for about one-half of this distance it will be close to the Nebraska City branch of the Chicago, Burlington and Quincy Railroad.

☞ The track is now laid on the Minnesota Valley Railroad from Sleepy Eye Lake, Minn., on the Winona and St. Peter Railroad up the Minnesota River to Redwood Falls, 26 miles. Col. De Graff, of St. Paul, is contractor for the road. It will soon be opened for business, and will be worked as a branch of the Winona and St. Peter Railroad.

☞ Mr. Arms, of Stafford, Conn., has taken the contract for completing the western end of the Manchester and Keene (N. H.) Railroad, including the overhead crossing over the Cheshire Railroad at Keene—the work to be completed by the 15th of November. The Cheshire Railroad Company agree to pay $8,000 toward the additional cost of the overhead crossing.

☞ Contracts for the grading and bridging of the Springville and Sardinia Railroad, extending from Springville, Erie Co., N. Y., to the Buffalo, New York and Philadelphia Railroad, in the town of Sardinia, a distance of about 13 miles, have been let to Napier Brothers, of Machias, N. Y., for $1,830 per mile.

☞ The extension of the Syracuse, Geneva and Corning Railroad, from Geneva to Lyons, N. Y., about 13 miles in length, has been completed and transferred to the company by the contractor.

The Iron Industry at Troy.

The indications now are that all persons engaged in iron mills or foundries of this city will have continued employment all the Fall and a greater part of the Winter. Regarding the mills of the Messrs. Burden, we are informed it is probable they will be run all Winter on full time, with perhaps a few unimportant interruptions for ordinary repairs. At Corning & Co.'s mills, the steel works and Rensselaer works will no doubt be kept continually busy, while the Star forge and the old mill will run alternate weeks as heretofore. The stove manufacturers report their business much better than it was last year, and all the principal foundries in the city will doubtless continue running until Christmas, when there will be the customary two weeks suspension for repairs. So it will be seen that, on the whole, the prospect is much better than it was last season, and that at least a measure of the old time prosperity, to far as the iron industry is concerned, is returning to Troy.—*Troy Times.*

☞ The Lexington and Nashville Railroad Company has been incorporated to construct a road from Huntingdon, Tenn., on the line of the Nashville, Chattanooga and St. Louis Railway, via Lexington, to Henderson on the Mobile and Ohio Railroad, a distance of about 45 miles.

☞ The interest due 1st of May, 1878, on the first mortgage 6 per cent bonds of the Orange and Alexandria Railroad Company will be paid on the presentation of the bonds at the office of the Washington City, Virginia Midland and Great Southern Railroad Company, in Alexandria, Va.

☞ J. E. Gimperhug has been appointed Receiver of the Dayton and Southeastern Railroad by Judge Holmes of the Superior Court on the application of trustees for the bondholders.

☞ The Grand Trunk Railway Company of Canada is laying its track from St. John to Rouse's Point with steel rails.

☞ The Swiss National Council has voted 1,300,000 as the contribution of Switzerland toward completing the St. Gothard tunnel.

AN EXPERIENCED SHORT HAND SECRETARY wishes a position; good penman, sober and industrious. Address SECRETARY, 13 Laight St., New York.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO., NEW YORK, Aug. 1, 1878.

A DIVIDEND OF THREE (3) PER CENT. HAS been declared by this company, payable on the 2d day of September next, to the holders of the capital stock of the company, as registered at the close of the 14th day of August, after which and until the 5th day of September, the transfer-books will be closed.

L. V. F. RANDOLPH, Treasurer.

WM. A. GUEST & CO.,

Can I Obtain a Patent?

This is the first inquiry that naturally occurs to every author or discoverer of a new idea or improvement. The quickest and best way to obtain a satisfactory answer, without expense, is to write to us describing the invention, with a small sketch. All we need is to get the *idea*. Do not use pale ink. Be brief. Send stamps for postage. We will immediately answer and inform you whether or not your improvement is probably patentable; and if so, give you the necessary instructions for further precedure. Our long experience enables us to decide quickly. For this advice we make *no charge*. All persons who desire to consult us in regard to obtaining patents are cordially invited to do so. We shall be happy to see them in person at our office, or to advise them by letter. In all cases, they may expect from us a careful consideration of their plans, an honest opinion, and a prompt reply. TOTAL COST OF U. S. PATENT, ONLY $55. *N. B.—These are by far the* SAFEST, BEST *and* CHEAPEST *terms offered by any responsible Patent attorney in the United States.* For all further information, please address: HENRY GERNER & SON, 24 Barclay st., P. O. Box 4,544, New York.

FINANCIAL.

ALEX. FROTHINGHAM & CO., BANKERS AND Brokers, No. 12 Wall st., make for customers desirable investments of large or small amounts in stocks of a legitimate character, which frequently pay from five to twenty times the amount invested every thirty days.

Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent 1y23*

RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh, Steel or Iron Rails,** and of any required weight and pattern.

PERKINS, LIVINGSTON, POST & Co.,
33 Nassau Street,
NEW YORK.

THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

Railroad officers desiring further information will please address

New York, Saturday, August 24, 1878.

Our Foreign Trade Policy.

Enforced industry and economy are now bringing us rapidly to prosperity and ease. Fortunate circumstances have greatly benefitted our foreign commerce for three years past. A European war cutting off Russia, our only competitor in cereals, from the great markets gave us an opportunity that has now come to an end.

The war at an end and the old competition revived, now it becomes necessary to look about us to secure new markets and new facilities for reaching them.

The wheat crop has now been harvested and its amount has been estimated with some degree of certainty. The entire wheat crop is claimed to be 812,000,000 bushels. California is not included in this estimate. And this estimate is probably less than the real amount. The acreage was largely in excess of any previous year. Of winter wheat, the quality excellent, the excess over last year's large crop is admitted to be about 40,000,000 bushels. Spring wheat with an increased acreage of about 30 per cent shows a falling off in the ratio of yield per acre as compared with last year about 30 per cent. The crop of spring wheat in bushels it is claimed will fall short of last year some 5,000,000 to 7,000,000 bushels. And this may be true. The quality of the last crop of spring wheat will be fully one grade below last year.

We take no account of the corn crop not yet sufficiently matured to base correct estimates upon. This latter crop also having less export than wheat, although three or four times greater in bulk and perhaps twice greater in value.

Add 30,000,000 bushels of wheat to our exports for 1877-78, and where are we to find a market for it? This is our condition to-day.

There seems to be but one solution for the problem—the grain must go abroad. The home consumption cannot be much in excess of last year no matter how cheap the price. The remaining surplus must go to feed other nations then. Next in order arise the questions to whom shall we send it? and in what way can it be sent cheapest for us?

Great Britain is now our principal customer for breadstuffs. This coming year our sales in that quarter must fall off for two good seasons. The cereal crop showing of Great Britain is considerably better for 1878 than for the year 1877; they will need less from abroad. Russia was virtually out of the race in 1877; such is not the case now. Russia will as heretofore sell England a large quantity of wheat because she has it to sell, and because English cottons, cutlery, &c., are wanted in Russia. There is not a good prospect for increasing our grain trade with Europe. But Europe is not the world—we have other neighbors, and to other nations we must now look for buyers of wheat, flour, corn, pork; and the various direct and indirect products of our soil.

Brazil is one of our customers with whom a much larger trade may be done. We have sold them a few thousand barrels of flour yearly for a long time. We have bought largely of Brazillian coffee and our appetite for it increases. To-day the balance of trade is many millions in favor of Brazil and against us. Is there any good reason why Brazil should pay to England twenty or thirty millions for merchandise when we can furnish it equal in all respects? Certainly not.

Even our next-door neighbor, Mexico, buys more from Europe than she does from us. The freight on Mexican exports to Europe and the return imports are necessarily about double what the cost would be from our ports; yet we can undersell the European markets in many articles of Mexican consumption. We ought to sell Mexico all that Europe does.

Legislation by Congress is asked for to promote foreign trade. Legislation may assist, but in general individual energy and enterprise act best when let alone. There is little fear that our merchants will not presently find new markets provided they stand upon an equal footing with the rest of the world. Just now their hands are tied in a measure by legislation. Our vast carrying trade is in the hands of our neighbors and more than eighty millions of our profits are yearly lost to us for that reason. American foreign commerce can never thrive as it ought when dependant upon foreign ships for its very existence. What we most need now to facilitate our trade abroad is American ships.

Railroad & other Improvements in Bolivia.

Col. Andros Aramayo y Villegas, recently appointed by the Bolivian Government as Consul General in the United States to reside in New York, was selected, it is said, by President Daza on account of important public works contemplated by his government, among which is the building of a railroad in continuation of the Arequipa Road to Puno, on Lake Titicaca. The distance from the lake to La Paz, one of the capitals and the chief commercial city of Bolivia, is about thirty-two miles over a country almost level. The road, Col. Aramayo says, can be built at a small cost and the Government will guarantee the interest on the investment. In connection with the projected railroad, steamboats will run across the lake to Puno, thus forming a complete connection between La Paz and Islay on the Peruvian coast. Col. Aramayo is invested with authority from the Bolivian Government to make contracts with responsible persons wishing to undertake these and similar improvements, and to offer every facility in helping forward the work. La Paz has a population of nearly 100,000, and does a large foreign business with England, France and Ge

many. The German business has increased largely in the last few years. There is next to nothing done between Bolivia and this country, but the Consul General hoped that the offers made by President Daza would attract business and capital from this country.

Pittsburg, Cincinnati & St. Louis Railway.

The following is an approximate statement of results in the operations of the Pittsburg, Cincinnati and St. Louis Railway Company for the seven months ending July 31, 1878:

Gross earnings (including interest received on equipment hired), January 1 to August 1, 1878		$1,734,936
Expenses (including interest on car trust cars and rent of Monongahela extension) for same period		1,160,182
Net earnings		$574,804
The interest on the bonds for these seven months is:		
$3,000,000 Steubenville and Indiana Railroad 6 per cent	$105,000	
$775,000 Steubenville and Indiana Railroad 7 per cent	31,645	
$6,222,000 Pittsburg, Cincinnati and St. Louis Railway 7 per cent	254,065	
		390,710
Surplus		$184,098

Chicago and Northwestern Railway.

The earnings of this road for the years ending May 31, 1877 and 1878, were as follows:

	1877.	1878.
From passengers	$3,066,305 67	$2,978,729 25
" freight	8,415,598 96	10,016,920 72
" express	248,275 46	248,766 66
" mail	290,222 62	263,422 25
" miscellaneous	65,754 12	86,008 36
	$12,086,156 83	$13,583,847 24
Expenses viz:		
Repairs of engines	$444,783 93	$484,685 59
" cars	523,585 28	481,804 90
" buildings	92,148 98	115,400 54
" fences, etc	65,374 28	65,658 80
" bridges	239,377 89	241,127 51
" track	1,296,419 12	1,259,925 75

		1,956,034 00
Surplus for the year		$508,453 16

The amount to credit of income account May 31, 1877, was $4,358,745 80. This sum has been reduced by charging to profit and loss a number of items embraced in the assets which have become of doubtful character, and also the shrinkage which has ensued in the estimated value of real estate taken by the company in 1871, for deposits in the Second National Bank of Chicago, which was crippled by the great fire of that year, and subsequently wound up. These items, consisting of $346,917 31 as shrinkage on the real estate; $303,485 86 of indebtedness heretofore assumed by the North Western Union Railway Company; and $39,780 63 of bad debts, mostly from transportation of iron ore for companies and firms made bankrupt since the panic, and for worthless town bonds, etc., amount to $690,183 80. Deducting this sum there remains a balance of $3,668,562. To this add the surplus of the fiscal year, to wit, $508,453 16, and there remains a balance of $4,177,015 16 to the credit of income account on the 31st of May, 1878, as appears in the summary of the General Balance Sheet published herewith.

The business and operations of the Chicago and Northwestern Railway Company, and its proprietary roads, for the fiscal years ending May 31, 1877 and 1878, compare as follows:

Earnings:	1877.	1878.
From passengers	$3,378,295 18	$3,366,678 61
" freight	9,005,278 67	10,754,168 18
" express	261,078 58	262,420 21
" mails	314,096 64	284,082 29
" miscellane's	74,353 89	83,763 20
	$13,033,101 96	$14,751,062 49
Total operating, fixed charges, & all items for the year	11,954,875 69	12,286,575 33
Net profits	$1,078,226 27	$2,464,487 16

There was an increase in gross earnings of $1,717,960 53, and an increase in operating expenses, interest, etc., of $331,699 64, making the increase in net earnings $1,386,260 89.

Of the entire increase in gross earnings, $1,497,690 41 was upon the Chicago and Northwestern Railway proper, and $220,270 73 upon the proprietary lines.

The proportion of operating expenses and taxes to gross earnings was 49.74 per cent for the Chicago and Northwestern Railway proper, and 51.66 for the combined property.

The miles of road embraced in the operations of the Chicago and Northwestern Railway proper, including the La Crosse, Trempealeau and Prescott Railroad, consolidated, the Maple River Branch and the Menominee Branch, are 1,615.96; and the miles of proprietary roads, 462.18—total, 2,078.14 miles. The average number of miles of road operated was 2,036.98, an increase during the year of 43.70.

The equipment of the whole road, (2,036.98 miles) on the 31st of May, 1878, consisted of 342 locomotives, and 8,605 cars, viz: 2 parlor cars, 142 first class and 29 second-class passenger cars, 67 baggage and express cars, 15 mail cars, 140 caboose and way cars, 4 paymasters', directors', officers', and business cars, 18 boarding cars, 4,473 box freight, 1,075 platform, 604 stock, 26 dump, 1,957 iron ore, 40 ditching, and 13 pile driving, wrecking, etc., cars. And of the Winona and St. Peter Railroad, 27 locomotives, and 1,037 cars as follows: 7 first-class passenger, 2 baggage, mail and express, 2 caboose, 893 box freight, and 133 platform cars. Total number of engines, 369; total number of cars, 9,642.

The number of miles run by locomotives on the whole road for the fiscal year ending May 31, 1878, were: passenger, 2,681,373; freight, 5,098,979; wood train, 22,475; gravel train, 512,291; switch, 1,988,207—total, 10,298,825 against 9,631,104 for the preceding year—an increase of 667,221, or 6.93 per cent. Cost per mile run, 21.60 cents.

Number of miles run by passenger trains, 2,681,373; average distance run by each passenger train, 99.24 miles; average number of passengers carried on each passenger train per mile run, 44.33; average number of miles each passenger was carried, 34.80.

Number of miles run by freight trains, including switching, 7,082,186; average distance run by each freight train, 212.61 miles; average number of tons of freight hauled in each freight train per mile run, 88.08; average number of miles each ton of freight was carried, 159.48.

Average earnings per mile run: by passenger trains, $1 49; by freight and switching, $1 52; by passenger and freight trains, $1 51. Average

cost of running above trains one mile, including taxes, 78.05 cents. Average net earnings on each mile run by above trains, 78.03 cents.

The gross earnings per mile upon the Chicago and Northwestern Railway (1,574.80 miles) were $8,625 76; the operating expenses and taxes, $4,290 15—and the net earnings, $4,335 61.

The gross earnings per mile for the entire system ($2,086 98 miles) were $7,241 68; the operating expenses and taxes, $3,741 30—and the net earnings, $3,500 38.

The total number of passengers carried was 3,416,413, an increase of 68,560, or 2.05 per cent, from the movement of the preceding year; and the number carried one mile was 118,877,406, an increase of 1.69 per cent. The average rate per passenger per mile was 2.88 cents, the average distance traveled by each passenger 34.80 miles, and the average rate received from each passenger 98.54 cents, against $1 00.91, being a decrease of 2.35 per cent.

The aggregate quantity of freight transported on all the lines was 3,911,261 tons, an increase of 497,868 tons, or 14.59 per cent. The total number of tons carried one mile was 623,768,593, an increase of 188,410,698 tons, or 28.52 per cent. The average rate received per ton per mile was 1.72 cent, against 1.86 cent in the preceding year, the average number of miles each ton of freight was hauled was 159.48, against 142.19 for the preceding year, and the average rate received for each ton of freight carried $2 75, against $2 64 the preceding year, an increase of 11 cents per ton, or 4.17 per cent. The report says:

On the 6th of June, 1877, the La Crosse, Trempealeau and Prescott Railroad, one of this company's proprietary lines, extending from the terminus of the Madison Extension, near La Crosse, Wis., to a connection with the Winona and St. Peter Railroad, a distance of twenty-nine miles, including the bridge across the Mississippi River at Winona, was consolidated with the Chicago and Northwestern Railway by the concurrent action of both companies, and thereafter became a part of this company's railway. Its earnings, expenses and fixed charges are included in those of the Chicago and Northwestern Railway Company for the entire fiscal year—from the 1st of June 1877—and therefore, in all comparisons with the preceding year, the receipts and disbursements of the La Crosse, Trempealeau and Prescott Railroad Company, for that year, are merged with those of this company.

The Maple River Railroad, described in the last annual report, was fully completed on the 1st of December last. This branch of 60.15 miles was built by parties interested in the Iowa leased lines of this company, and is operated under lease.

The Menominee River Branch of 24.71 miles, which was also in progress at the issue of the last report, was completed on the 1st of December last. The cost of this road, with its Land grant, is represented by the capital stock and $400,000 first mortgage guaranteed bonds of the Menominee River Railroad Company. Of these bonds, $155,000 have been sold, and the balance of the issue, together with the capital stock and lands, are the property of this company. Since the opening of navigation, this branch has transported over 28,000 tons of iron ore, which has been taken 22 miles on the main line to the shipping docks at Escanaba.

A lateral branch from Redwood Falls to connect with the Winona and St. Peter Railroad, near Sleepy Eye Station, west of New Ulm; one from Rochester, Minn., to Zumbrota, and another to Plainview, have been projected, at low cost, by the people on and adjacent to these lines. Advances have been made by this company to encourage these feeders to our long line of railroad, and with the liberal local aid furnished by the people, they will be built and operated in the interest of this company. A small amount of local bonds will be secured on the properties to reimburse the company's investment.

Traffic arrangements of reciprocal benefit have been entered into between this company and the Burlington, Cedar Rapids and Northern Railroad Company, at Cedar Rapids, and with the River lines of the Clinton and Dubuque and Dubuque and Minnesota Railroad Companies, at Clinton, affording to them the facilities of our lines, and securing to us a large business brought by those roads, destined to Chicago and Milwaukee.

The amicable relations of interest and mutual advantage enjoyed with the West Wisconsin Railway Company have not been disturbed by foreclosure of that company's property. The practical union of that line with our Madison Extension, in forming a direct route between Chicago and St. Paul, Minneapolis and the Northwest, enables both companies to fully participate in the joint business, and to offer to the public the accommodations of a continuous thoroughfare, while maintaining separate ownerships and separate management on their respective roads. A confirmatory agreement, to perpetuate these relations, was executed by this company and the Chicago, St. Paul and Minneapolis Railway Company, as the successor company to the old West Wisconsin Railway Company, during the last fiscal year.

General Balance Sheet, May 31, 1878.

Old construction:		
Cost of consolidated road, equipment and property		$39,658,019 76
Add for La Crosse, Trempealeau and Prescott Railroad, (exclusive of interest)		1,449,414 61
Add for State Line and Union Railroad, completed in 1876		103,512 18
Add account of Old Kenosha, Rockford and Rock Island Railroad		2,400 00
		$41,213,346 55
New construction since June 1, 1864:		
Amount to May 31, 1877	$20,966,707 38	
Amount expended for year ending May 31, 1878	572 807 41	
		21,539,514 79
New equipment since June 1, 1864:		
Amount to May 31, 1877	$8,088,832 80	
Amount expended for year ending May 31, 1878	196,541 05	
		8,285,373 85
Proprietary railroads:		
Cost for construction, purchase money, etc., etc		1,685,659 57
Assets:		
Railroad bonds, town bonds and securities		193,133 54
Capital stock on account Winona and St. Peter Railroad		100,000 00
Winona and St. Peter Railroad 2d Mortgage bonds on hand		505,000 00
Menominee River Railroad bonds, on account		199,626 79
Due from Express companies		7,550 24
Due from U. S. Government		74,522 88
Due from station agents, earnings and collections		488,091 47
Due from sundry companies and individuals		802,462 76
Bills receivable		60,089 88
Cash		1,723 322 71
Materials and fuel on hand		760,705 75
		$77,088,350 28
Common stock and scrip		$15,109,655 97
Less for stock and scrip owned by company		120,848 48
		$14,988,807 49
Preferred stock and scrip	$21,702,844 56	
Less for stock and scrip owned by company	177,241 84	
		21,525,602 72
		$36,514,410 21
(Exclusive of $500,000 of preferred stock, to be issued for La Crosse, Trempealeau and Prescott Railroad Company's stock, in accordance with terms of consolidation with that line, June 6th, 1878.)		
C. & N. W. R'y, various issues currency bonds	$12,900 000 00	
Chicago & Milwaukee Railway currency bonds	1,700,000 00	
C. & N. W. R'y, various issues gold bonds	18,193,000 00	
		32,793,000 00
Real estate mortgages, on shop and new station grounds, mostly due in 1880		228,000 00
Balance due leased roads in Iowa		268,482 08
Current bills, pay rolls & accounts		990,087 87
Outstanding coupons, old dividends, etc., including coupons due June 1st, 1878		909,226 85
Balance of receipts from land grants		10,478 41
Common and preferred stock dividends, payable June 27, 1878		1,202,750 00
Income account:		
Balance, May 31, 1878		4,177,015 16
		$77,088,350 28

Gen'l Man. and Gen'l Supt.—Marvin Hughitt.

Ass't Gen'l Superintendent.—C. C. Wheeler.

Chief Engineer.—E. H. Johnson.

Dt. of Columbia 3-65 Bonds.

The Secretary to the Commissioners of the District of Columbia has published a pamphlet to correct misapprehensions, which he says evidently exist as to the so-called 3.65 bonds of the District of Columbia, affecting injuriously their market value, and the credit of the District securities proper. The amount is by law limited to $13,743,250. The secretary publishes authentic information to show that the faith of the United States is pledged to the payment of the principal and interest, and that the interest is made permanently payable by the Secretary of the Treasury, in the same manner and with the same convenience to holders in all respects as in the case of any of the other United States bonds.

☞ The Broadford and Mt. Pleasant Railroad Company are talking of extending the road to Latrobe, on the line of the Pennsylvania Railroad. Engineers have been examining the different routes, and make very favorable reports.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "†."

Northern Pacific Railroad.

In the case of Hans Hogland against the Northern Pacific Railroad Company the Secretary of the Interior has decided that the grant of the Northern Pacific Railroad Company attaches to lands acquired under the Sisseton and Wahpeton treaty, outside of reservation, they having been acquired prior to the definite location of the road, and that settlement claims upon granted sections were excluded by the sixth section of the act of July 2, 1864, making the grant to the company. The decision determines the right to a large tract in the wheat lands of Dakota. The Hogland settlement on these lands was in violation of law and treaty obligations, the Indian title not having been extinguished at the time of the settlement thereon, and the withdrawal for the company having preceded the extinguishment of the Indian title.

Statement of the Public Debt of the United States, August 1, 1878.

DEBT BEARING COIN INTEREST.

Western Pacific bonds, 1862-4	1,970,560 00	9,852 80
Sioux City and Pacific bonds, 1862-64	1,628,320 00	8,141 60
Totals	$64,623,512 00	$323,117 56

Interest paid by United States, $30,835,039 86; interest repaid by transportation of mails, &c., $9,831,444 25; balance of interest paid by United States, $29,903,595 61.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, July 31, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

Redemption of Five-twenty Bonds.

The Secretary of the Treasury issued on the 16th inst., the sixty-eighth call for the redemption of 5-20 bonds of 1865—consols of 1865. The call is for $5,000,000, of which $2,500,000 are coupon and $2,500,000 registered bonds. The principal and interest will be paid at the Treasury on and after the 16th day of November next, and the interest will cease on that day. The following are the descriptions of the bonds:

Coupon bonds, dated July 1, 1865, namely: $50, Nos. 72,001 to 78,000, both inclusive; $100, Nos. 129,001 to 132,000, both inclusive; $500, Nos. 90,001 to 92,000, both inclusive; $1,000, Nos. 174,001 to 179,000, both inclusive.

Registered bonds, redeemable at the pleasure of the United States after the first day of July, 1870, as follows: $50, Nos. 2,401 to 2,450, both inclusive; $100, Nos. 18,751, to 18,950 both inclusive; $500, Nos. 10,951 to 11,150, both inclusive; $1,000, Nos. 36,901 to 37,500, both inclusive; $5,000, Nos. 10,901 to 11,400 both inclusive; $10,000, Nos. 21,301 to 21,800, both inclusive.

☞ The third rail of the Erie Railway has been laid as far as Binghamton and there are only 28 more miles to be laid to make it a narrow gauge road.

American Railroad Journal.

Saturday, August 24, 1878.

Financial and Commercial Affairs.

A fair activity in the stock market has prevailed since our last report. The volume of business has fallen off to some extent, the daily transactions averaging only 125,000 to 130,000 shares, against much larger dealings in July. The entire list of active speculative stocks is less than a dozen in number. The sales of these stocks have continued with remarkable uniformity since the payment or non-payment of the July dividends. But, as we have heretofore stated, the dealings with few exceptions are speculative and not for investment.

The general tone of the market has been upward for several weeks past as our quotations show; yet this upward result has been reached only after constant irregularity and a wide range of fluctuations.

Concerning one of our great industries, the Anthracite coal trade, we have now more cheering reports. The present demand is good; the companies having more orders for the current month than they can fill. The only disturbing element is the fear that the present combination will not be maintained on to the close of the year. A proposition has been made to suspend work for two weeks in September at the mines. This temporary stoppage would assist the small operators but would not benefit the large companies and it is not likely they will consent to stop at all.

The Board of Control made their allotments on Wednesday, Aug. 21st, for September. The quantity for "output" is only 1,001,250 tons against 2,000,000 tons for the current month. The Le-

high Valley Company issued on the same day its circular of prices for September which are the same as at present. We infer from this action that prices will remain unchanged until October 1st.

The report of the Anthracite Board of Control for the week ending August 10, 1878, show shipments to have been 489,789 tons. For 1878, 9,388,782, against 12,075,607 tons in 1877, for the same time; a falling off of 3,686,825 tons.

One prominent cause for this falling off in coal shipments is the excessive and long continued dullness of the iron market. It is reported that some large Iron Companies are stacking their products for a better market. This may give a temporary activity sufficient to close out stock accumulations. At present the demand is entirely nominal and small sales of pig are made only on private terms.

From Great Baitain we now have statistics of movements in the precious metals which indicate to an extent the course of trade. For the three months ending 31st of March, 1878, the imports of Gold bullion and coin into England amounted to $12,108,000, against exports of $34,421,000, showing a loss in gold of $22,323,000 for the time named. Of Silver the imports for three months as above, were $22,859,000, of which Germany supplied $13,157,000. The exports of silver coin and bullion for the same period were $22,838,000, of which British India took $12,781,000, China $2,954,000, and the United States $1,983,000—all in the month of March.

English crop reports for the week ending July 27, estimate sales of home grown wheat to have been 26,432 quarters against 21,134 quarters for the same week last year. For the whole Kingdom sales are estimated to have been since harvest, 7,309,100 quarters against 7,768,400 last year. The average price of wheat for four years in London has been for 1874-75, 43s. 10d.; for 1875-76, 45s. 11d.; for 1876-77, 53s. 9d.; for 1877-78, 50s. 5d.

The official statement of the exports and imports of the United Kingdom of Great Britain for 1877 amount in merchandise imports to £394,419,682, specie £37,152,799. Exports of merchandise £252,846,020, specie £39,798,119.

Philadelphia advices show a continued dull Money market as heretofore. Rates in favor borrowers but commercial paper of the best class is scarce. Second rate paper is closely scrutenized and frequently refused. Rates of discount are unchanged at 4½@5 per cent for prime paper. Call loans remain unchanged since our last report. Stock Board sales have been only moderate, and we now quote Pennsylvania Railroad shares at 32⅛@32⅜. Reading shares more freely dealt in at 16⅞@16⅝ closing.

From Baltimore we have no changes to report in the Money market, and a continued mid-summer stagnation in the general markets. The Miscellaneous Stock list was wholly neglected. Sales of Baltimore and Ohio Railroad stock were too limited to make a market, and we quote prices dull and unchanged.

From Boston a quiet but moderately active Money market is reported. Rates for prime business paper remain unchanged at 3@4 per cent for short dates. Manufacturing is now showing some activity and sales of goods from first hands are fair. Yellow fever in the Southern ports and the excitement attendant upon it is hindering trade to some extent.

Gold which advanced ⅛ last week under the prospect of possible exportation has scarcely changed since our last report. We quote gold at 100⅝ and dull. A single shipment of gold was made per "Celtic" last week. The Bank of Montreal was the shipper and the amount $500,000. Silver is quoted dull in London at 52⅜d. per ounce.

Sterling Exchange was firm at the close last week, since which time rates have given way a fraction. The large grain shipments now going forward have operated to stop further shipments of specie. The rate of discount remains unaltered at the Bank of England, while the street rate is considerably lower. This condition of things is unfortunate for the Bank. But it is probable that should the Bank lower its rate again the drain of specie would set in afresh. Every means will be used to prevent any further depletion of the coin in the Bank's vaults.

The International Monetary Conference now sitting at Paris has not yet reached a decision regarding the free coinage of silver. The United States delegates have submitted that the unrestricted coinage of silver and its use as money of unlimited legal tender should be retained where they exist, and, as far as practicable, restored where they have ceased to exist.

The sales of Government new bonds still continue large, and another call of 5 20s is expected. We now quote Government securities as follows:

United States 6s, 1881, registered, 107¾@107⅞; do. coupon, 107¾@107⅞; 5-20s, 1865, new, registered, 102¼@102⅝; do. coupon, 102⅛@102⅜; do. 1867, registered, 105⅛@105¼; do. coupon, 105⅛@105¼; do. 1868, registered, 107⅞@107⅛; do. coupon, 107⅜@108; ten-forties, registered, 106⅜@106⅝; do. coupon, 108⅞@109; 5 per cents, 1881, registered, 106¼@106⅜; do. coupon, 106⅛@106⅜; 4½ per cents, 1891, registered, 103⅞@104; do. coupon, 104⅜@105; 4 per cents, 1907, reg., 100¾@101; do. coupon, 100¾@101; sixes, currency, 119⅞@120.

Domestic Produce is in active export demand. Receipts at all the shipping ports are large. The week's exports have been $6,378,179, against $5,781,979 for the corresponding week last year. Total exports since January 1, 1878, have been $216,811,605, against $170,656,737 for the same time last year.

Cotton is quiet for spot, and middling uplands may be quoted at 12 cents. Futures were sold at 11.39 for August delivery; 11.55@11.57 for September; 11.42 for October; 11.23@11.25 for November and 11.18@11.20 for December.

Metals are unchanged. Small sales of both Scotch and American Pig Iron are made but generally upon private terms—understood to be a fraction below current quotations. Manufacturers of Steel Rails are generally employed upon orders at $43@$44 per ton.

Ocean freights have been moderately active and somewhat irregular. Engagements to Liverpool by steam for grain were made at 7½d.@8d. To London by steam for grain, 7½d.@7¾d. To Glasgow by steam for flour, 2s. 6d. Cotton, compressed, to Liverpool by steam ½d.; by sail, 15-64d.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Memphis and Charleston 1st mort., 99; Missouri, Kansas and Texas R. R., 2; do. 7s, consol. ass., 40; Cedar Falls and Minnesota 1st mort., 89; Houston and Gt. The Working Patriots.

Just what the present Labor movement will amount to it is hard to foresee. One thing is very evident, however, no respectability has so far attached itself to the movement in the East. Any strife between labor and capital is to be deprecated and avoided when possible. But so long as any cause however just and righteous in itself is managed and officered by such leaders as now appear at the head of the labor party, it will be shunned by decent thinking men, and properly too.

Here in New York the leaders who are so eager to earn patriotic fame are disreputable politicians; ordinary beer-saloon keepers; so called editors; men whose tongues are more active than their brains; in general men of no known value to society. Not a single man whom a respectable working man would be proud to shake hands with or admit to intimacy.

Yet the truth must be admitted that this riff-raff of New York politics may lead numbers of worthy citizens astray and make trouble for the time. Last year we saw the same thing enacted in the railroad riots at Pittsburg which these desperate men would be glad to inaugurate again. Protection to life and property is the one thing above all others that makes life and liberty enjoyable. And it is this very safety that binds all good citizens together with a common bond which those leaders desire to destroy.

The working man has his rights in common with all other citizens, which rights none are more ready to respect and protect than we are. But the working man must respect himself. He can vote and thereby shape the laws. That is his proper remedy for all political wrongs. Whenever he seeks by force to override the law which he has assisted to make for all, he becomes a criminal and ought to suffer the punishment due.

Neither poverty nor labor bar any man from office or the respect of his fellow men. Wealth cannot buy back lost honor. Let the working man remember that he is a governor as well as the millionaire. Labor is honorable.

"Honor and shame from no condition rise,
Act well your part—there all the honor lies."

Erie Railway.

The report of H. J. Jewett, as Receiver of the Erie Railway Company, for the month of May, was filed in the County Clerk's office on the 20th inst. From this we learn that the receipts from all sources during the month (including $78,063 12 balance on hand from previous report) were $2,212,747 30, and the disbursements during the same time were $1,866,725 79, leaving a balance on hand on the 31st of May of $346,021 51. The notes and certificates of indebtedness issued by the Receiver up to and including the month of May amounted to $13,342,083 29; and the same paid and canceled to $11,970,710 32—leaving outstanding and unpaid $1,371,372 97. This shows that there was an increase of cash on hand during the month of $267,958 39. There was an increase in receiver's certificates of $261,205 58. The legal expenses for the month were $15,330 83, and the coal advances were $12,758 90.

Pennsylvania Railroad.

The following statement of the business of all lines of the Pennsylvania Railroad Company east of Pittsburg and Erie, for July, 1878, as compared with the same month in 1877, shows:

An increase in gross earnings of.....	$656,895
An increase in expenses of.....	84,694
An increase in net earnings of.....	$571,701

The seven months of 1878, as compared with same period in 1877, show

An increase in gross earnings of.....	$771,987
A decrease in expenses of.....	416,243
An increase in net earnings of.....	$1,188,180

All lines west of Pittsburg and Erie for the seven months of 1878 show a deficiency in meeting all liabilities of $700,338, being a gain over the same period in 1877 of $234,942.

☞ The officers of the new Indianapolis, Bloomington and Western Railroad Company, recently elected, are: President, John W. Kirk, 29 New St., N. Y.; Vice President, John C. Short, Danville, Ill.; Secretary and Treasurer, Frank Shepard, Greenwich, Conn.; Solicitors, James T. Worthington, Room 73, Drexel Building, N. Y., Thos. F. Tipton, Bloomington, Ills.

☞ The Receiver of the Indianapolis, Cincinnati and Lafayette Railroad reports the receipts for July (including $9,977 balance June 30th) at $194,150, and the disbursements (including $94,448 bond interest, and $47,500 loans) $197,566.

☞ The receipts of the Ohio and Mississippi Railroad for the month of July (including $140,472 cash on hand July 1) were $481,106, and the disbursements $478,574—leaving cash on hand August 1, 1878, $2,532. The payments include $220,321 interest on mortgage due January 1, 1878.

The Coal Trade.

The total tonnage of anthracite from all the regions for the week ending August 10th, as reported by the several carrying companies, amounted to 508,328 tons, against 277,644 tons in corresponding week last year, an increase of 230,684 tons. The total amount of anthracite mined for the coal year is 9,410,446 tons, against 11,803,676 tons for same period last year, a decrease of 2,393,230 tons. The quantity of bituminous coal sent to market for the week amounted to 75,956 tons, against 57,457 tons in corresponding week last year, an increase of 18,499 tons. The total amount of bituminous mined for the year is 1,912,160 tons, against 1,866,187 tons for corresponding period last year, an increase of 46,973 tons. The total tonnage of all kinds of coal for the week is 584,284 tons, against 335,101 tons in corresponding week last year, an increase of 249,183 tons, and the total tonnage for the coal year is 11,823,606 tons, against 13,668,863 tons to same date last year, a decrease of 2,346,237 tons. The receipts at Perth Amboy for the week ending August 17th were 27,000 tons, the shipments 18,500 tons, an increase of 8500 tons. The stock on hand August 10th was 71,900 tons, and on the 17th was 80,400 tons, against 79,000 tons same time in 1877. The quantity of coal and coke carried over the Pennsylvania Railroad for the first week in August was 79,224 tons, of which 60,577 tons were coal, and 18,647 tons coke. The total carried for the year is 2,781,834 tons, of which 2,165,240 tons were coal and 596,603 tons coke. These figures embrace all the coal carried over the road, east and west. The coal tonnage of the Reading Railroad for the week ending on the 17th inst. was 151,000 tons, of which 71,000 went to Port Richmond. The shipments from Port Richmond during the week were 56,000 tons. The product of the mines of the Cumberland coal region for the week ending August 10th was 32,478 tons, and for the year to that date 875,485 tons, an increase of 106,588 tons as compared with the corresponding period of last year. The shipments to the Baltimore and Ohio Railroad were, for the week, 18,943 tons; for the year, 495,908 tons, an increase of 88,298 tons as compared with 1877. The shipments to the Chesapeake and Ohio Canal were, for the week, 10,688 tons; for the year, 315,760 tons, an increase of 69,724 tons as compared with 1877. The shipments to the Pennsylvania Railroad were, for the week, 2390 tons; for the year, 60,925 tons, a decrease of 14,876 tons as compared with 1877.—*Phila. Ledger, Aug.* 19.

Philadelphia and Reading Railroad.

The Pottsville Miners' Journal says that the Philadelphia and Reading Railroad Company are now receiving $1 75 per ton for freight and tolls, and then adds:

During last year the charges for these items were $1 25 per ton for the first six months, and $1 50 for the second half of the year. The company reported the entire cost of transporting a ton of coal at 81.8 cents, and the average receipts for the same as $1 27.1—yielding a profit on all the coal transported, about four and a half millions tons, of 45.2 cents per ton. With the freight and tolls this year beginning at $1 50, and running up to $1 75, the cost of transportation not having been increased in the meantime, it will readily be seen that they have already greatly increased their proportional profits. It is to be presumed that no advance in tolls will take place unless there is a certainty of getting an increased price for the coal, which generally characterizes the last months of the year; but the large quantity of coal now at the shipping points is not favorable to a brisk demand, without which it is impossible to raise prices. The operators point to their experience during the present summer, when prices were advanced by circular, and tolls raised in accordance with the circular rates; but in reality there was no actual advance in prices and they are fearful that such a policy will control the bal. receive the profit either themselves or through the Coal and Iron Company.

Rumford and Buckfield Railroad.

The Railroad Commissioners of the State of Maine have recently made an inspecting tour over the Rumford and Buckfield Railroad and report it in good condition and well equipped. This secures the donation of $1,000 from Buckfield.

There are two routes for reaching the chain of lakes at the head waters of the Androscoggin—one via Grand Trunk Railway to Bryant's pond, thence by stage to Andover, etc., the other via Maine Central Railway to Farmington, thence by stage to Phillips and Rangeley. It is now proposed by the owners of the Rumford and Buckfield Railroad, which runs between the two roads above named, to open a central route by way of Dixfield, Mexico and Byron, along the valleys of the Androscoggin and Swift rivers, which already furnish excellent roads to a point within eight miles of the Bemis stream on the Mooseluckmaguntic, the largest of the chain. This brings the distance from Canton 38 miles, which is about 12 miles nearer by stage from railway connections than either of the other routes. It is proposed to construct the road this fall, and a committee has been chosen to select the most feasible route.

☞ A vote was taken in Cincinnati on the 14th inst. on the question of issuing $2,000,000 bonds for completing the Cincinnati Southern Railroad. The total vote cast was 26,649; majority in favor of the measure, 5,800. This confirms the contract with Huston & Co., their bid being $1,672,000. They are under heavy bonds to complete the road within a year. Including the new loan and the interest already paid, the city has put over $20,000,000 into the road, making it the largest enterprise of the kind ever undertaken by a municipal corporation.

☞ An attachment against about $100,000 in money and property of the Terre Haute and Indianapolis Railroad, in institutions in this city, granted at the suit of the St. Louis, Alton and Terre Haute Railroad Company on a note made by defendants to the Indianapolis and St. Louis Railroad, was vacated by Judge Van Brunt, as the indebtedness for which the note was given accrued in another State, and the money attached was deposited to pay interest and coupons now due. The complaint was also dismissed.

☞ At the recent session of the New Hampshire Legislature acts of incorporation were passed of the Whitfield and Jefferson Railroad Co., the Concord Horse Railroad Co., the New Zealand River Railroad Co., and the Profile and Franconia Notch Railroad Co. An act was also passed providing that three Railroad Commissioners shall be chosen in 1878 and biennially thereafter. They shall enter upon their duties the first Wednesday of June, 1879.

☞ Waldo Bingham of Hyde Park, Vt., has been elected President, Franklin Fairbanks of St. Johnsbury Vice President, John A. George of Hardwick Secretary, and D. D. Wead of Sheldon Treasurer of the Portland and Ogdensburg Railroad, Vermont Division. The directors are: Franklin Fairbanks, James D. Ball, John A. O. S. Rexford and Henry A. Burt, the latter to fill the vacancy occasioned by the resignation of Col. A. B. Jewett, the present receiver.

Opinion in a Patent Case.

Attorney General Devens has sent to the Secretary of the Interior an opinion in a certain case, to the effect that whenever letters patent for a mechanical invention have been applied for and taken out jointly in the names of several individuals, when, as a matter of fact, but one of them was the inventor, the others simply having an interest by assignment, then the patent is absolutely void, and cannot be made valid by any act of the parties or of the patent office. This decision is one of great importance to inventors and others manufacturing under what they believe to be exclusive privileges, for when a grave error of this character occurs at the outset and a period of two years intervenes before the defect is discovered or a correct application for a patent submitted to the patent bureau, the invention becomes public property.

☞ At the annual meeting of the Camden (N. J.) Horse Railroad Company, held on the 19th inst., Thomas A. Wilson, Calvin S. Crowell, Wilbur F. Rose, John Hood and Thomas McKeen were elected directors. Mr. Wilson was elected President, Mr. McKeen Treasurer and Mr. Hood Secretary. Two and two-thirds miles of track have been laid during the year, making the length of the road 8⅔ miles. There are 26 cars and 70 horses, the combined travel each day being 1,800 miles. Although no dividend was declared, the capital is intact, and the report showed a flourishing condition.

☞ From Portland, Oregon, Aug. 6th, we learn that the second locomotive for the Dayton, Sheridan and Grand Rond Railroad, had arrived. Grading had been completed from Dayton to Sheridan and also to Dallas. All the ties for 22 miles to Sheridan, and 20,000 for the extension to Dallas had been supplied. About 17 miles of iron had been delivered. Six miles of track had been laid, and two-thirds of the bridging completed; and the company expected to have the road completed to Sheridan by September 1, and to Dallas by the 1st of October.

☞ The twenty-sixth annual report of the trustees of the Boston Public Library has just been published. It places the total number of volumes in the library at 345,784, an increase for the year of 33,724, or 12 per cent. The library was open 306 days during the year, and the loans increased from a total in the previous year of 1,140,572 to 1,183,901, a gain of 43,419 volumes.

☞ The Taylor Iron Works, at High Bridge, N. J., have received a considerable order for cast iron chilled car wheels, to be shipped to South America. Their trade with the southern continent is increasing.

☞ The Ohio Falls Car Company, Jeffersonville, Indiana, recently received a contract to build 100 freight cars, in addition to the 100 previously contracted for.

☞ The Phœnixville (Penn.) Iron Company

Profile and Franconia Notch Railroad.

At a meeting of the grantees of the Profile and Franconia Notch Railroad Company held at the Profile House, N. H, on the 16th inst., a permanent organization was effected by the choice of the following named gentlemen as directors: Richard Taft of the Profile House, Nathaniel White of Concord, Emmons Raymond of Boston, John H. George of Concord, Samuel N. Bell of Manchester, Walter Aiken of Franklin and Jos. A. Dodge of Plymouth. At a subsequent meeting of the directors Richard Taft was chosen President, Chas. H. Greenleaf of the Profile House Treasurer, and Chas. C. Lund of Concord, Clerk. It was voted to commence a survey of the proposed route at once, and Charles C. Lund was authorized to make the preliminary survey and estimates preparatory to letting the construction of the track. The road will probable connect with the Boston, Concord and Montreal Railroad at Pierce's station in Bethlehem.

☞ The Mesilla (New Mexico) News notices the arrival at that place about the middle of July of J. L. Haskell and C. Pullen, of the Atchison, Topeka and Santa Fe Company's surveying party, on their way to join Morley's party near the Gila. They say the road will not stop at Las Vegas or Albuquerque, but push forward southwest to the Pacific.

☞ The earnings of the Northern Pacific Railroad from September 1, 1877, to June 30, 1878 (ten months), were $909,235; expenses same time, $444,008—net receipts, $465,227. For the same period last year the earnings were $671,112, the expenses $405,792, and the net receipts $265,320; an increase of $199,907.

☞ The Elmira Advertiser says that "the project for changing the Genesee Valley Canal to a railroad, to be operated by the Erie Road, is being pushed with energy. It will be a continuation of the line already built south from Rochester, and with the design of making a Pittsburg connection."

☞ The Leavenworth, Lawrence and Galveston Railroad, extending from Lawrence, Kansas, to Coffeyville, 144 miles, with branch to Parker, 2 miles, was sold on the 9th inst. at Topeka under decree of foreclosure, and bought by Charles Merriam and others for account of the 1st mortgage bondholders for $760 000.

☞ The railroad running from Brockton to Corry, Penn., and known as the "Cross Cut," was sold on the 18th inst., together with all its equipments, to William E. Lewis, of Cleveland, Ohio, for $75,000. The original cost of the road was over $1,250,000.

☞ The New Orleans Picayune reports that the work on the Morgan Railroad to the Texas border is progressing, although somewhat interfered with by the rigorous quarantine now established in that locality.

☞ The certificate of incorporation of the New York, Sea Beach and Coney Island Railroad Company was filed in the Kings County Clerk's office on the 19th inst. The road, which is three miles long, begins near Forty-sixth street, and runs along Gowanus Bay to a point where it connects with the Bay Ridge branch of the Manhattan Beach Railway. The capital stock is $50,000, in 5,000 shares. The directors are John W. Bigelow, Alexander McDonald, Charles K. Clark, Edward T. Hunt, W. B. Bigelow, A. Hayward, S. R. Platt, Clinton Wagner, N. H. Davis, W. P. Siegrist, and Thomas H. McGrath.

Commerce of New York.

The foreign imports at New York for the month of July, 1878, are officially stated as follows:

	1877.	1878.
Entered for consumpt'n.	$10,880,518	$12,764,854
Do. for warehousing	10,934,605	6 075,143
Free goods	6,101,170	5,017,537
Specie and bullion	328,274	968,618
Total entered at port	$28.194,462	$24,826,152
Withdrawn fr. wareh'use	6,224,659	5,045,563

The foreign imports at New York for seven months from January 1, were:

	1877.	1878.
Entered for consumpt'n.	$82,814,781	$77,768,996
Do. for warehousing	59,153,909	42,078,478
Free goods	55,585,572	45,366,953
Specie and bullion	7,683,261	14,014,322
Total entered at port	$205,237,523	$179,228,745
Withdrawn fr. wareh'se	42,238,721	88,055,151

The duties received at New York for seven months ending with July, were:

	1877.	1878.
January	$8,058,938 72	$7,154,924 85
February	8,224,434 61	7,914,953 48
March	8,895,687 63	8,571,501 20
April	7,569,482 75	7,696,248 89
May	7,054,082 33	6,527,083 58
June	6,102,426 72	5,957,135 22
July	7,182,747 46	8,103,513 74
Total	$52,887,750 22	$51,925,855 46

The exports from New York to foreign ports in the month of July, were:

	1877.	1878.
Domestic produce	$22,511,448	$27,559,092
Foreign free goods	93,809	306,508
Do. dutiable	254,436	429,672
Specie and bullion	1,588,648	645,571
Total exports	$24,448,341	$29,010,838
Do. exclusive of specie.	22,859,693	28,365,267

The exports from New York to foreign ports for seven months from January 1, were:

	1877.	1878.
Domestic produce	$152,892,523	$194,523,067
Foreign free goods	1,448,926	2,150,846
Do. dutiable	2,503,682	3,550,096
Specie and bullion	23,140,146	9,942,764

☞ The Chancellor of the State of New Jersey has rendered a decision in the matter of the application of the officers of the Cape May Short Line Railway as to the constitutionality of the amendments to the General Railroad law passed by the Legislature last winter. The Chancellor assumes, in effect, that he has no authority to reverse legislative enactments, and concludes that those interested have absolutely no redress for any assumed injury done by the operation of the new law.

☞ The gross earnings of the Erie Railway for the month of May, 1878, were $1,172,961, the expenses $919,482 and the net earnings $253,479—a decrease compared with the month of May, 1877, of $51,551. From January 1 to May 31, 1878, the gross earnings were $5,872,677, the expenses $4,401,246, and the net earnings $1,471,431—an increase in net earnings during the five months compared with the corresponding period of the previous year of $198,470.

Progress of French Rail Industry.

The production of rails in France in 1877 exceeded the consumption, having amounted to 73,102 tons of iron rails and 184,668 tons of steel rails, while the consumption of rails by the French railway companies during the year was estimated at 48,888 tons of iron rails and 136,549 tons of steel rails. The consumption in 1877 exhibited a small decrease as compared with 1876, the demand for iron rails having fallen off 15 per cent while that for steel rails increased only 4 per cent. The Orleans Railway Company is the largest purchasers of iron rails in France, having taken 30,000 tons of iron rails last year, and 18,000 tons of steel rails. The Northern of France and the Western of France Railway Companies took only steel rails last year; the greater part of the rails purchased in 1877 by the Eastern of France and the Paris, Lyons and the Mediterranean Companies were also steel.—*Coal Trade Journal.*

☞ The European and North American Railway, Western Extension, will be sold at St. John, N. B., on the 31st inst. under foreclosure of the 1st mortgage for $2,000,000. The bonds are chiefly held in England, and it is stated that arrangements have already been made to purchase the road and organize the St. John and Maine Railway Co. The road is about 91 miles in length, extending from St. John to Vanceboro.

☞ Trains are now running from the depot at Flatbush and Atlantic Avenues, Brooklyn, to Brighton Beach. The route is over the rapid transit road on Atlantic avenue, as far as Franklin avenue, where the Brooklyn, Flatbush and Coney Island Railroad is met. The length of the road is seven miles and a half. The directors hope to be able to extend it so that one of the ferries may be reached.

☞ The Receiver of the Detroit and Milwaukee Railroad reports the receipts during the month of July (including $40,858 from previous report) at $124,053, and the disbursements at $88,181—leaving a balance July 31, of $35,872. The disbursements exceeded the receipts by $4,981. The amount of Receiver's notes and certificates outstanding at the close of the month was $346,598.

☞ Preliminary work has been commenced on the Camden and Atlantic (N. J.) Railroad for a double track. It is intended to lay an additional track to Haddonfield as soon as possible, and thence it will be continued to Atlantic City, probably by the opening of the season of 1879.

☞ The New Jersey West Line Railroad, which was sold on the 3d inst. under foreclosure of mortgage was intended to run from Jersey City to Bethlehem, Penn. It is completed from Summit to Bernardsville, 15 miles, and graded from Summit to Lyons Farms near Newark.

☞ Mr. H. B. Bishop, who succeeds Col. Pelton as Vice President of the New York Elevated Railroad Company was formerly a sugar merchant in Cuba, and is a brother-in-law of D. O. Mills, ex-President of the Bank of California.

☞ The Cincinnati Taxpayers' Railway company (common carriers) has been incorporated by Joseph Kinsey and others; capital, $10,000.

☞ The track of the narrow gauge railroad, from Camden, N. J., to Gloucester and Mt. Ephraim, is to be extended to Blackwoodtown, a distance of 7 miles. Work on it will be commenced as soon as the necessary amount of stock is subscribed, which has already been nearly accomplished. The surveys have all been made, and it is estimated that it will cost about $7,000 per mile. It is believed that the track will be laid and the road in running order by the first of the coming year.

☞ The contract between the Pennsylvania Railroad in Maryland and the Cumberland and Pennsylvania Railroad, in relation to the crossing of the latter by the former at a point near Cumberland, has been ratified, and the work on the bridge has already begun.

☞ The officers of the Worcester, Mass., Excursion Car Company, are: President, Jerome Marble; Secretary, A. B. F. Kinney; Treasurer, Charles B. Pratt.

☞ The line of the Dallas extension of the Dayton and Sheridan (Cal.) Railroad is now permanently located, and a large force of graders are at work making ready for laying the track.

☞ It is announced that the Delaware, Lackawanna and Western Railroad Company will take possession of the West Line Railroad on the 30th inst. and put it in good condition.

☞ The Compressed Air Cars of the Pneumatic Tramway Engine Company are now running daily, for passenger traffic, on Second Avenue, between the depot at 96th street and Harlem.

☞ The Denison and Pacific Railroad is now graded to within one-half mile from Whitesboro, Texas.

☞ Mr. M. Bowell has been elected President of the Belleville and North Hastings (Ca.) Railway.

☞ One-half of the forty miles of the Boston, Hoosac Tunnel and Western Railroad is built.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, Aug. 1, 1878.

A DIVIDEND OF THREE (3) PER CENT. HAS been declared by this company, payable on the 2d day of September next, to the holders of the capital stock of the company, as registered at the close of the 14th day of August, after which and until the 5th day of September, the transfer-books will be closed.

L. V. F. RANDOLPH, Treasurer.

Can I Obtain a Patent?

This is the first inquiry that naturally occurs to every author or discoverer of a new idea or improvement. The quickest and best way to obtain a satisfactory answer, without expense, is to write to us describing the invention, with a small sketch. All we need is to get the *idea*. Do not use pale ink. Be brief. Send stamps for postage. We will immediately answer and inform you whether or not your improvement is probably patentable; and if so, give you the necessary instructions for further procedure. Our long experience enables us to decide quickly. For this advice we make *no charge*. All persons who desire to consult us in regard to obtaining patents are cordially invited to do so. We shall be happy to see them in person at our office, or to advise them by letter. In all cases, they may expect from us a careful consideration of their plans, an honest opinion, and a prompt reply. TOTAL COST OF U. S. PATENT, ONLY $55. *N. B.—These are by far the* SAFEST, BEST *and* CHEAPEST *terms offered by any responsible Patent attorney in the United States.* For all further information, please address: HENRY GERNER & SON, 24 Barclay st., P. O. Box 4,544, New York.

FINANCIAL.

ALEX. FROTHINGHAM & CO., BANKERS AND Brokers, No. 12 Wall st., make for customers desirable investments of large or small amounts in stocks of a legitimate character, which frequently pay from five to twenty times the amount invested every thirty days.

Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent 1y33

THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

Railroad officers desiring further information will please address

Secretary Sherman's Speech on Finance.

At Toledo, Ohio, on the 26th August, Secretary of the Treasury Sherman made a semi-political speech which develops with considerable clearness the financial policy of the administration.

On most of the points presented by Mr. Sherman we believe him sound and correct; but in his defence of the national bank note currency he is so plainly in error that we shall not merely dissent but show his evident heresy.

After saying that two questions of the many, silver and redemption, or as the telegraph has reported it, resumption, now principally occupied the public mind, the speaker gave his views at length; the substance of which we take up omitting all reference to politics or the speech of Senator Thurman to which this is a reply.

Mr. Sherman declared himself in favor of the largest amount of currency necessary for business wants; not coin alone, but paper money also in proper abundance. The essential qualities of all *good money* (the italics are ours) are stability, equality and convertibility. A dollar of one kind should buy as much as a dollar of any other kind. Depreciated money cheats the ignorant and enriches the broker and money changer.

This is sound finance and sound sense as well. We shall allude to this argument again because Mr. Sherman pointedly contradicts himself afterwards in order to prove a theory, and is not probably aware that he is so laying himself bare.

Concerning the ability of the Treasury to redeem greenbacks on the 1st of January, 1879, it was stated that $134,580,000 in coin was now available after all coin liabilities had been provided for. The greenbacks issued and subject to redemption at the date fixed by law are $346,000,000; to which may be added $322,000,000 national bank notes, making $668,000,000 in all. It has been freely admitted by all authorities that this volume of money, $668,000,000, is not too great for our current wants. The amount cannot be lessened except by design of the Secretary of the Treasury; since he is allowed by law to issue new greenbacks in place of old ones redeemed. The same fixed amount of circulation is also insured to the national banks.

To redeem this entire volume of paper money at the Treasury, says Mr. Sherman, would be difficult; therefore it is better that the national bank notes not payable in coin should continue in circulation.

This we pronounce a flat contradiction of Mr. Sherman's argument that all currency should be alike in "stability, equality and convertibility." The greenback gives us coin whenever we desire it, but the national bank note does not. When we offer the bank note for redemption, which can only be at its own place of issue, we are given not coin but a greenback, which in turn must be presented at the Treasury for redemption. If Mr. Sherman was a practical banker he would know that national bank notes cannot be maintained at par with greenbacks after redemption of the latter is begun. The public expect and desire a paper currency equivalent to coin; and whenever that currency is found not equivalent to coin it will be immediately at a discount. We predict that unless the national banks voluntarily redeem their notes over the counter in coin when desired, the entire issue of bank note currency will be at a permanent discount. The brokers will begin again their old traffic in assorting and returning bank notes for redemption; whilst the public will find itself not much benefited by practical resumption. The banks will from necessity hoard greenbacks, leaving for the business world not gold and paper at par, but national bank notes and silver, both at a discount for gold.

This criticism of Mr. Sherman's policy is not unfriendly. The question of our currency is one of very grave importance and concerns all alike. If Mr. Sherman could only assure himself of the fact that the nation is less timid than he is it would be better for all concerned. At the next session of Congress we shall undoubtedly see new legislation demanded concerning our finances, because existing laws will be found inadequate to the requirements of the times. We shall not be satisfied with less than complete and absolute resumption. Such resumption is not possible until *all* paper money is redeemable in coin. This is the rock upon which Mr. Sherman's policy will be wrecked.

Ohio and West Virginia Railway.

The officers of the Ohio and West Virginia Railway Company, an organization recently formed for the purpose of purchasing and continuing to completion the Columbus and Gallipolis Railway, are: President, J. B. Hall; Vice President, Chas. C. Walcutt; Treasurer, Theodore P. Gordon. The directors are: D. W. Caldwell, Samuel Thomas, James Ballard, J. C. Harper, Charles C. Walcutt, J. B. Hall, George McQuigg and Edward Deletombe.

The project was originally inaugurated by the Gallipolis, McArthur and Columbus Railroad Company which, during the years 1871-72-73, expended a very large amount of money in the grading of that portion of the railway between Gallipolis and the intersection with the Marietta and Cincinnati Railroad at or near Vinton Station.

Becoming embarrassed in 1873, work was entirely suspended; and in 1876 the property, rights and franchises were transferred to the Columbus and Gallipolis Railroad Company. Under the direction of this new organization work was con-

tinued until July of the present year, when they too were obliged to succumb to the pressure of the times, and on the 26th inst. yielded all their rights and interests by sale to the Ohio and West Virginia Railway Company.

We understand the new company is on such financial basis that it will be able to proceed at once actively with the work of construction, with the confident expectation that the line from the Marietta and Cincinnati Railroad to Gallipolis, and the branch to Pomeroy, will be completed by the 1st of January next.

Capital's Share of Production.

SOME STATISTICS CONCERNING THE OPERATIONS OF A ROLLING MILL — NOT A DIVIDEND IN FIVE YEARS.

ROME, N. Y., July 30, 1878.

To the Editor of the Utica Herald:

DEAR SIR: In the editorial article of this morning's *Herald* there are some statements that I consider erroneous, and propose to do what I may be able to correct them.

You say: "The steady investment all over the country in four per cent bonds is a demonstration that the popular judgment accepts that as the fixed rate for undoubted security." On this point I have only to say that capital will obey the law of demand and supply, seeking the best investment the law will afford. It may be remarked that the low rate of government security is evidence that a better interest cannot be had in industrial pursuits. Men will sometimes put capital into such pursuits with a view to aid their own industry; but as a mere investment they will consider the attention required, and the hazards of trade, which will require a larger interest than would be satisfactory on government bonds.

In regard to hard times you state: "The first step is for capital to accept the smaller share of its joint product with labor. Lower interest and lower dividends would set in motion many enterprises which cannot start on the basis of eight or ten per cent. This would signify lower prices for many of the necessaries of life without any reduction in wages. An improvement would result in the condition of those dependent on their daily toil, and employment would be given to many hands now idle."

The question of labor and capital is often discussed very loosely, though it is one that should be entered on with candor and well settled facts.

In the above extract it appears to be assumed that the present embarrassment arises from the capitalist. I fully concede that interest must fall as capital becomes abundant. But it is equally necessary that as goods fall in price the rate of wages must fall its share. No production can long be carried on if the market price for goods does not pay expenses. In the expenses there must be something for capital, or it will not be long employed. Two elements are involved in this question—the high rate of interest and the high rate of wages that prevailed not long since.

I am interested and have given much attention to a mill that makes bar-iron. The community in which this mill is situated and where most of the stock is owned will, I think, give it the credit of conducting its affairs with close economy. It has a capital stock of $135,000, all honestly paid up. I have made a careful analysis of the mill, and find it has paid no dividend for the past five years. Not large interest on its capital, but none at all.

I have made a careful comparison of the market price of iron and the cost of manufacture between the last half year of 1873 and the last half year of 1878, and submit the following statement for each. The interest that appears in the statement is that paid on current loans made to conduct the business, and is no part of capital stock. The mill has been in good credit, having promptly met all its liabilities, and thereby obtained its stock and labor at the lowest market price.

The statement is for the cost of producing one ton of bar iron during each term, the material is for two tons and the labor for one ton.

	Cost in 1873.	Cost in 1878.	Per cent of '78 to '73.
Raw material, pig, scrap and coal.	$131 49	$55 65	42 p. ct.
The price of bar iron per ton	111 00	49 00	44 p. ct.
Labor	18 10	10 60	58½ p. ct.
Repairing	2 28	1 20	52.63 p. ct.
General office and salary expenses	1 85	1 34	72 p. ct.
Interest on current loans	4 55	2 49	54.72 p. ct.
Insurance, taxes and water rent	83	45	54 p. ct.
Total cost of manufacture			58.22 p. ct.
In brief—total of material			42 p. ct.
Total of manufacture			58.22 p. ct.
Total iron sold			44 p. ct.

It will be noticed that while bar-iron has fallen to 44 per cent of 1873 the raw material has fallen to 42 per cent of 1873—nearly the same, while labor has only fallen to 58 60 per cent, or 14 per cent less than the product of the labor.

The last half of 1878 (which is better than the first half, on account of reduction in interest and labor) has barely sustained the cost of production, leaving nothing for dividend on capital stock.

You will notice that the rate of interest per ton has fallen on current loans to 54.72 per cent, or nearly four per cent more than labor. Loans for current business are for short terms and cannot be had at the rate of interest on government bonds.

The foregoing statement shows that capital and not labor has been the chief sufferer, and that the revival must come from bringing the rate of wages nearer the market value of the product.

You may claim that iron has been more depressed than other industries. This may be to some extent. As it has been specially petted by the protective theory, it has no doubt suffered more than those that have not depended on artificial aid.

It is evident no capital will go into manufacturing industry under present circumstances; and that which is now so employed will be lost unless the rate of wages are more nearly compared with the market for goods. The fall of fourteen per cent more on the value of the product than on the rate of wages is a bar to all chance of six or eight per cent or any interest at all on capital.

I make this criticism because we need to understand our position in order to apply the proper remedy. No theorizing will induce capitalists to embark in industries that afford no profit on the investment. No doubt it will be some time before labor will accept this position; but the result must come before our industries revive.

Respectfully yours,

JOHN B. JERVIS.

☞ Engineers are now engaged surveying and locating a new railroad from Pittsburgh along the Monongahela river, and the south side of the Youghiogheny river to New Haven. It is to connect with the new Pittsburgh and Lake Erie Railroad, at Pittsburgh. The line as far as a point opposite Dawson Station has been permanently located. This road will give an outlet to the vast fields of coal lying in the forks between the Monongahela and Youghiogheny rivers.

☞ The Columbus and Gallipolis Railroad, which was sold by order of the court on the 26th inst. was purchased by a corporation known as the Ohio and West Virginia Railroad Company for $38,800. The new company expect to build the road from Columbus to Gallipolis.

Atlanta and West Point Railroad.

The earnings of this road for the years ending June 30, 1877 and 1878, were:

Steel and iron rails, etc.	22,000 00	26,000 00
Net over all expenses	$106,949 84	$113,435 40

The ratio of current expenses to gross receipts is 56½ per cent, a reduction of 2 per cent as compared with the previous year. The Superintendent in his report says:

The passenger business shows some reaction from the decline of past years. The increase of through travel over the previous year is 17 per cent in number of passengers, and 18 per cent in revenue; and, of way travel, 15 per cent in number and 13 per cent in revenue. The former is, in part, due to closer Texas connections; and the latter, in part, to the State Fair last October; but I think the increase of both may, in some measure, be fairly attributed to the improving pecuniary condition of the agricultural classes of our people.

The revenue from freight is nearly identical in amount with the previous year, while some of the leading articles which comprise a majority of the tonnage and revenue, have differed widely. With an increase of 5 per cent in way cotton, we record a decrease of 55 per cent in through cotton. The latter item was noted as exceptionally large in my report of last year. The opposite extreme obtains for the year just closed. The decrease is mainly on Montgomery and Selma, and is the result of competition, by which rates were forced below the point at which we could pro rate without loss. Western farm products (except bacon and oats) have fallen off largely, and fertilizers increased, indicating an increased production of farm supplies at home.

The gross revenue shows a small increase over the previous year. I predicted some decrease, and am, therefore, agreeably disappointed. This result has enabled me to purchase 200 tons more of steel rails than I had proposed to do at the commencement of the year.

There is nothing in the present outlook that would seem to denote any material change from the past in our business for the ensuing fiscal year. The growing cotton crop, from which we estimate, directly and indirectly, a large portion of our revenue, promises a full yield. If there shall be no serious casualty to this crop, we may reasonably expect the operations of the ensuing year to give about the same results as the past year.

We have no pressing wants in view, beyond the ordinary current expenses, that will be permitted to interfere with the usual semi-annual dividends. I recommend the completion of wire fencing, and the gradual substitution of steel for the worn iron rails to the extent of any surplus revenue that may accrue.

Since the last report, we have substituted for the old temporary erections in this city, a substantial and commodious freight depot, with convenient offices for the freight department—a long-time, pressing want, now happily supplied. This improvement lessens the risk of, and increases the facilities for, handling and storing freight at our most important shipping and receiving point.

The property of the company, as a whole, has been fairly maintained. There is some deterioration in the "motive power," due to increasing age of engines, and some in the rolling stock; but the betterment in the road department will, I think, fairly balance these decrements.

The roadway and track are in good condition. About ten miles of the original light rail remain in the track. These rails will be gradually replaced with steel. The barbed wire fencing promises an important relief from the cost and risk of killing cattle by our trains. The cost of average fence in use, during the year, is about $1,700, and the reduction of item "stock killed by trains," from the previous report, is $864 45. The total cost of fencing, and the materials on hand, to the 1st instant, is $4,288 87. This amount has been placed as current expenses in "maintenance of way." The road department has been managed with economy and efficiency by our faithful Supervisor.

The motive power is in fair condition, and our Master Machinist is of the opinion that it is sufficient to peform the service our business will probably require during the present year. The expenses of this department compare favorably with previous years. Two of the oldest light passenger engines have been condemned, and consigned to the "scrap heap," leaving nineteen as the number now belonging to the company.

The rolling stock has been reduced by two shanty cars condemned. One good passenger car has been purchased, and an old one condemned.

The company have 19 locomotives, 5 passenger, 4 baggage, 1 express, 5 cab, 113 box, 18 stock, 23 platform and 3 coal cars. Number of passengers carried 41,801, against 36,293 in 1877—an increase of 5,508. Tons of freight transported, 69,133; do. in previous year, 75,684—decrease, 6,551. Bales of cotton transported 70,503, against 99,097 in 1877—decrease, 28,594.

BALANCE SHEET, July 1, 1878.

Road outfit and real estate		$1,193 636 22
Bills receivable		139,992 25
Preferred stock, Vicksburg and Meridian Railroad Co.		3,432 00
Bond exchange account		9 853 24
Interest account		6,885 00
Dividends of July and January, $4 per share each		98,576 00
Due by agents and connecting roads		88,121 20
Road expenses for the year		207,705 16
Cash on hand		51,667 86

Dividends unpaid	3,219 00	
Due to agents and connecting roads	5,402 84	
Road earnings for the year	321,140 56	
	$1,744,868 93	

President.—Hon. JOHN P. KING.

Directors.—B. C. Yancey, John S. Bigby, F. Phinizy, W. B. Berry, D. N. Speer, L. M. Hill.

General Superintendent.—L. P. GRANT.

Secretary and Treasurer.—W. P. ORME.

☞ Ground was broken on the 26th inst. for the south lateral branch of the Sutro tunnel to tap the Julia shaft, 1,400 feet distant. It is expected the connection will be made by the 1st of December. From the Julia Mine a branch will be extended southerly to Gold Hill, and another branch will diverge near the Belcher Mine toward American Flat.

The Conference at Saratoga.

We are led to believe that some good may result from this last railroad conference at Saratoga. One important article of the compact, the abolition of all commissions to ticket agents, is a wise conclusion. Too many such leaks have existed heretofore, and railroad managers have often found themselves helpless when attempting to correct them. If one road gave commissions and concessions, others competing with that road must of necessity do the same.

It is a difficult matter to reconcile conflicting interests and bring all into harmony even when the roads study barely their own concerns; but when the multitudinous interests of the East and West are added the problem of adjustment is a hard one.

Chicago and St. Louis are keenly jealous of what may be done in freights or passenger rates; since mercantile competition between those cities is pushed to an extreme point. In the East, New York, Boston, Philadelphia and Baltimore, each strive to gain by any discrimination which may be the result of circumstances or agreement.

The railroad manager is continually under a cross-fire. If he studies the interests of all he has a vast as well as thankless task upon his hands. If he selfishly looks only after the interests of his own road and its connections he is sure to find himself in hot water.

Under such conditions, then, the railroad manager can hardly be blamed for seeking to pool his troubles as well as his rates with his neighbors. Whether this attempt at pooling many and diverse interests can long continue successful is not probable; because the very fact of pooling adverse interests tends in general to separate them more widely.

In the present instance at Saratoga there were other and subordinate interests which interfered to prevent harmony. The New York Central line and its Western immediate connections have contracts with the Wagner Sleeping and Palace Car Company, while the Erie line runs the cars of the Pullman Company only. Neither road is willing to permit the cars of the competing company to run over its Western lines.

The cattle traffic from St. Louis was another bone of contention which has been disposed of, but by arbitration because ordinary means failed.

The roads are now carrying Eastward bound freights at low rates. But we cannot believe any material advance is possible against free water transportation. Nor does it seem wise for the roads to push into competition with the Southern or Mississippi River route after the lakes and canals are closed. The European markets will not take our breadstuffs at prices much above present ruling rates. If rates of freight are low so are prices of grain to the farmer. Any considerable advance in freight must lower the price of grain by just so much to the farmer. Will he consent to it? No. The farmer holds the superior position at this time, and it is well for the railroad manager to understand it. The farmer *will not sell* his grain unless he is satisfied with the present market. He is able to hold over again for low water rates in the Spring or even longer. In pooling for higher rates, more money will be assured to the railroads if a moderate tariff is adopted than if any large advance is demanded. And here the discretion and cool judgment of the business man must decide the matter which will bring gain or loss to the railroad interests he controls.

Hard Common Sense on the Labor Question.

In an article elsewhere copied from the Utica *Herald*, the well known civil engineer, Mr. John B. Jervis, gives some plain figures and facts which are worth careful reading. Working men are clamoring everywhere for an increase of pay. In Philadelphia within the past eight days the operatives in a number of large iron manufactories struck for higher wages.

As an offset to this Mr. Jervis states that an iron mill with which he is connected has not been able for five years to declare a dividend. Why? Because wages have remained too high in comparison with market prices of the iron produced. In a plain showing the owners of this one mill have not received anything for the use of the capital invested during the past five years. The working man ought to see from this that he is not the only sufferer.

Sales of Union Pacific Railroad Lands.

The Union Pacific Railroad Company has issued a circular showing the sales of its lands up to August 13, 1878, with the aggregate of the prices received, the amount of land grant bonds canceled, and the amount to be provided for, with the number of acres of land whose value is applicable to the cancellation of the remaining bonds. The statement is as follows:

	Acres.	Amount.
Total sales reported December 31, 1877	1,318,279.80	$5,717,127 23
Sales from January 1 to August 13, 1878	249,892 21	1,249,206 68
Total	1,567,672.01	$6,966,333 86
Average per acre		$4 44.3
Amount of land grant bonds issued		$10,400,000 00
Less—		
Canceled to December 31, 1877	$3,076,000 00	
Canceled to August 13, 1878	179,000 00	
		3,255,000 00
Outstanding August 13, 1878		$7,145,000 00
Contracts outstanding	$3,609,467 66	
Interest accrued	800,000 00	
Cash on hand	469,035 00	
Total amount applicable to redemption of bonds		4,878,502 66
Am't of bonds to be provided for		$2,266,497 34

The above result shows that the sale of 1,567,672 acres has provided for the cancellation of $8,133,502 66 of land grant bonds, leaving in the hands of the company 11,282,328 acres for the unprovided balance of $2,266,497 34.

☞ The gross earnings of the Denver and Rio Grande Railroad for the month of July, 1878, were $121,574, against $74,276 in July, 1877, an increase of $47,298, or 64 per cent. The net earnings in July were $55,185, against $41,600 in July last year, an increase of $13,585, or 33 per cent. The whole length of the road is 334 miles.

The Coal Trade.

The total tonnage of anthracite from all the regions for the week ending August 10th, as reported by the several carrying companies, amounted to 508,328 tons, against 277,644 tons in corresponding week last year, an increase of 230,684 tons. The total amount of anthracite mined for the coal year is 9,410,446 tons, against 11,803,676 tons for same period last year, a decrease of 2,393,230 tons. The quantity of bituminous coal sent to market for the week amounted to 75,956 tons, against 57,457 tons in corresponding week last year, an increase of 18,499 tons. The total amount of bituminous mined for the year is 1,912,160 tons, against 1,865,187 tons for corresponding period last year, an increase of 46,973 tons. The total tonnage of all kinds of coal for the week is 584,284 tons, against 335,101 tons in corresponding week last year, an increase of 249,183 tons, and the total tonnage for the coal year is 11,323,606 tons, against 13,668,863 tons to same date last year, a decrease of 2,346,237 tons. The receipts at Perth Amboy for the week ending August 17th were 27,000 tons, the shipments 18,500 tons, an increase of 8500 tons. The stock on hand August 10th was 71,900 tons, and on the 17th was 80,400 tons, against 79,000 tons same time in 1877. The quantity of coal and coke carried over the Pennsylvania Railroad for the first week in August was 79,224 tons, of which 60,577 tons were coal, and 18,647 tons coke. The total carried for the year is 2,781,834 tons, of which 2,165,240 tons were coal and 596,603 tons coke. These figures embrace all the coal carried over the road, east and west. The coal tonnage of the Reading Railroad for the week ending on the 17th inst. was 151,000 tons, of which 71,000 went to Port Richmond. The shipments from Port Richmond during the week were 56,000 tons. The product of the mines of the Cumberland coal region for the week ending August 10th was 82,478 tons, and for the year to that date 875,485 tons, an increase of 106,588 tons as compared with the corresponding period of last year. The shipments to the Baltimore and Ohio Railroad were, for the week, 18,943 tons; for the year, 495,908 tons, an increase of 88,298 tons as compared with 1877. The shipments to the Chesapeake and Ohio Canal were, for the week, 10,688 tons; for the year, 315,760 tons, an increase of 69,724 tons as compared with 1877. The shipments to the Pennsylvania Railroad were, for the week, 2390 tons; for the year, 60,925 tons, a decrease of 14,376 tons as compared with 1877.—*Phila. Ledger, Aug.* 19.

Philadelphia and Reading Railroad.

The Pottsville Miners' Journal says that the Philadelphia and Reading Railroad Company are now receiving $1 75 per ton for freight and tolls, and then adds:

During last year the charges for these items were $1 25 per ton for the first six months, and $1 50 for the second half of the year. The company reported the entire cost of transporting a ton of coal at 81.8 cents, and the average receipts for the same as $1 27.1—yielding a profit on all the coal transported, about four and a half millions tons, of 45.2 cents per ton. With the freight and tolls this year beginning at $1 50, and running up to $1 75, the cost of transportation not having been increased in the meantime, it will readily be seen that they have already greatly increased their proportional profits. It is to be presumed that no advance in tolls will take place unless there is a certainty of getting an increased price for the coal, which generally characterizes the last months of the year; but the large quantity of coal now at the shipping points is not favorable to a brisk demand, without which it is impossible to raise prices. The operators point to their experience during the present summer, when prices were advanced by circular, and tolls raised in accordance with the circular rates; but in reality there was no actual advance in prices and they are fearful that such a policy will control the balance of the season. The railroad company, however, are all right in either case, as they would receive the profit either themselves or through the Coal and Iron Company.

Rumford and Buckfield Railroad.

The Railroad Commissioners of the State of Maine have recently made an inspecting tour over the Rumford and Buckfield Railroad and report it in good condition and well equipped. This secures the donation of $1,000 from Buckfield.

There are two routes for reaching the chain of lakes at the head waters of the Androscoggin—one via Grand Trunk Railway to Bryant's pond, thence by stage to Andover, etc., the other via Maine Central Railway to Farmington, thence by stage to Phillips and Rangeley. It is now proposed by the owners of the Rumford and Buckfield Railroad, which runs between the two roads above named, to open a central route by way of Dixfield, Mexico and Byron, along the valleys of the Androscoggin and Swift rivers, which already furnish excellent roads to a point within eight miles of the Bemis stream on the Mooselucmaguntic, the largest of the chain. This brings the distance from Canton 38 miles, which is about 12 miles nearer by stage from railway connections than either of the other routes. It is proposed to construct the road this fall, and a committee has been chosen to select the most feasible route.

☞ A vote was taken in Cincinnati on the 14th inst. on the question of issuing $2,000,000 bonds for completing the Cincinnati Southern Railroad. The total vote cast was 26,649; majority in favor of the measure, 5,800. This confirms the contract with Huston & Co., their bid being $1,672,000. They are under heavy bonds to complete the road within a year. Including the new loan and the interest already paid, the city has put over $20,000,000 into the road, making it the largest enterprise of the kind ever undertaken by a municipal corporation.

☞ An attachment against about $100,000 in money and property of the Terre Haute and Indianapolis Railroad, in institutions in this city, granted at the suit of the St. Louis, Alton and Terre Haute Railroad Company on a note made by defendants to the Indianapolis and St. Louis Railroad, was vacated by Judge Van Brunt, as the indebtedness for which the note was given accrued in another State, and the money attached was deposited to pay interest and coupons now due. The complaint was also dismissed.

☞ At the recent session of the New Hampshire Legislature acts of incorporation were passed of the Whitfield and Jefferson Railroad Co., the Concord Horse Railroad Co., the New Zealand River Railroad Co., and the Profile and Franconia Notch Railroad Co. An act was also passed providing that three Railroad Commissioners shall be chosen in 1878 and biennially thereafter. They shall enter upon their duties the first Wednesday of June, 1879.

☞ Waldo Bingham of Hyde Park, Vt., has been elected President, Franklin Fairbanks of St. Johnsbury Vice President, John A. George of Hardwick Secretary, and D. D. Wead of Sheldon Treasurer of the Portland and Ogdensburg Railroad, Vermont Division. The directors are: Franklin Fairbanks, James D. Bell, John A. George, Olif Abell, George W. Hendee, Waldo Bingham, Orange Buck, R. S. Reed, D. D. Wead, O. S. Rexford and Henry A. Burt, the latter to fill the vacancy occasioned by the resignation of Col. A. B. Jewett, the present receiver.

Opinion in a Patent Case.

Attorney General Devens has sent to the Secretary of the Interior an opinion in a certain case, to the effect that whenever letters patent for a mechanical invention have been applied for and taken out jointly in the names of several individuals, when, as a matter of fact, but one of them was the inventor, the others simply having an interest by assignment, then the patent is absolutely void, and cannot be made valid by any act of the parties or of the patent office. This decision is one of great importance to inventors and others manufacturing under what they believe to be exclusive privileges, for when a grave error of this character occurs at the outset and a period of two years intervenes before the defect is discovered or a correct application for a patent submitted to the patent bureau, the invention becomes public property.

☞ At the annual meeting of the Camden (N. J.) Horse Railroad Company, held on the 19th inst., Thomas A. Wilson, Calvin S. Crowell, Wilbur F. Rose, John Hood and Thomas McKeen were elected directors. Mr. Wilson was elected President, Mr. McKeen Treasurer and Mr. Hood Secretary. Two and two-thirds miles of track have been laid during the year, making the length of the road 8⅔ miles. There are 26 cars and 70 horses, the combined travel each day being 1,300 miles. Although no dividend was declared, the capital is intact, and the report showed a flourishing condition.

☞ From Portland, Oregon, Aug. 6th, we learn that the second locomotive for the Dayton, Sheridan and Grand Rond Railroad, had arrived. Grading had been completed from Dayton to Sheridan and also to Dallas. All the ties for 22 miles to Sheridan, and 20,000 for the extension to Dallas had been supplied. About 17 miles of iron had been delivered. Six miles of track had been laid, and two-thirds of the bridging completed; and the company expected to have the road completed to Sheridan by September 1, and to Dallas by the 1st of October.

☞ The twenty-sixth annual report of the trustees of the Boston Public Library has just been published. It places the total number of volumes in the library at 845,784, an increase for the year of 83,724, or 12 per cent. The library was open 306 days during the year, and the loans increased from a total in the previous year of 1,140,572 to 1,183,901, a gain of 43,419 volumes.

☞ The Taylor Iron Works, at High Bridge, N. J., have received a considerable order for cast iron chilled car wheels, to be shipped to South America. Their trade with the southern continent is increasing.

☞ The Ohio Falls Car Company, Jeffersonville, Indiana, recently received a contract to build 100 freight cars, in addition to the 100 previously contracted for.

☞ The Phœnixville (Penn.) Iron Company are at work day and night on their contract for iron for the New York Elevated Railroad.

Profile and Franconia Notch Railroad.

At a meeting of the grantees of the Profile and Franconia Notch Railroad Company held at the Profile House, N. H, on the 16th inst., a permanent organization was effected by the choice of the following named gentlemen as directors: Richard Taft of the Profile House, Nathaniel White of Concord, Emmons Raymond of Boston, John H. George of Concord, Samuel N. Bell of Manchester, Walter Aiken of Franklin and Jos. A. Dodge of Plymouth. At a subsequent meeting of the directors Richard Taft was chosen President, Chas. H. Greenleaf of the Profile House Treasurer, and Chas. C. Lund of Concord, Clerk. It was voted to commence a survey of the proposed route at once, and Charles C. Lund was authorized to make the preliminary survey and estimates preparatory to letting the construction of the track. The road will probable connect with the Boston, Concord and Montreal Railroad at Pierce's station in Bethlehem.

☞ The Mesilla (New Mexico) News notices the arrival at that place about the middle of July of J. L. Haskell and C. Pullen, of the Atchison, Topeka and Santa Fe Company's surveying party, on their way to join Morley's party near the Gila. They say the road will not stop at Las Vegas or Albuquerque, but push forward southwest to the Pacific.

☞ The earnings of the Northern Pacific Railroad from September 1, 1877, to June 30, 1878 (ten months), were $909,235; expenses same time, $444,008—net receipts, $465,227. For the same period last year the earnings were $671,112, the expenses $405,792, and the net receipts $265,320; an increase of $199,907.

☞ The Elmira Advertiser says that "the project for changing the Genesee Valley Canal to a railroad, to be operated by the Erie Road, is being pushed with energy. It will be a continuation of the line already built south from Rochester, and with the design of making a Pittsburg connection."

☞ The Leavenworth, Lawrence and Galveston Railroad, extending from Lawrence, Kansas, to Coffeyville, 144 miles, with branch to Parker, 2 miles, was sold on the 9th inst. at Topeka under decree of foreclosure, and bought by Charles Merriam and others for account of the 1st mortgage bondholders for $760 000.

☞ The railroad running from Brockton to Corry, Penn., and known as the "Cross Cut," was sold on the 18th inst., together with all its equipments, to William E. Lewis, of Cleveland, Ohio, for $75,000. The original cost of the road was over $1,250,000.

☞ The New Orleans Picayune reports that the work on the Morgan Railroad to the Texas border is progressing, although somewhat interfered with by the rigorous quarantine now established in that locality.

☞ The certificate of incorporation of the New York, Sea Beach and Coney Island Railroad Company was filed in the Kings County Clerk's office on the 19th inst. The road, which is three miles long, begins near Forty-sixth street, and runs along Gowanus Bay to a point where it connects with the Bay Ridge branch of the Manhattan Beach Railway. The capital stock is $50,000, in 5,000 shares. The directors are John W. Bigelow, Alexander McDonald, Charles K. Clark, Edward T. Hunt, W. B. Bigelow, A. Hayward, S. R. Platt, Clinton Wagner, N. H. Davis, W. P. Siegrist, and Thomas H. McGrath.

Commerce of New York.

The foreign imports at New York for the month of July, 1878, are officially stated as follows:

	1877.	1878.
Entered for consumpt'n.	$10,830,513	$12,764,854
Do. for warehousing	10,984,505	6 075,143
Free goods	6,101,170	5,017,537
Specie and bullion	828,274	968,618
Total entered at port	$28.194,462	$24,826,152
Withdrawn fr. wareh'use	6,224,659	5,045,563

The foreign imports at New York for seven months from January 1, were:

	1877.	1878.
Entered for consumpt'n.	$82,814,781	$77,768,996
Do. for warehousing	59,153,909	42,078,473
Free goods	55,585,672	45,866,953
Specie and bullion	7,683,261	14,014,323
Total entered at port	$205,237,523	$179,228,745
Withdrawn fr. wareh'se	42,283,721	88,055,151

The duties received at New York for seven months ending with July, were:

	1877.	1878.
January	$8,058,938 72	$7,154,924 85
February	8,224,434 61	7,914,953 48
March	8,695,637 63	8,571,501 20
April	7,569,482 75	7,696,243 39
May	7,054,082 33	6,527,083 58
June	6,102,426 72	5,957,135 22
July	7,182,747 46	8,103,513 74
Total	$52,887,750 22	$51,925,355 46

The exports from New York to foreign ports in the month of July, were:

	1877.	1878.
Domestic produce	$22,511,448	$27,559,092
Foreign free goods	93,809	306,508
Do. dutiable	254,436	499,672
Specie and bullion	1,588,648	645,571
Total exports	$24,448,341	$29,010,838
Do. exclusive of specie	22,859,693	28,365,267

The exports from New York to foreign ports for seven months from January 1, were:

	1877.	1878.
Domestic produce	$152,892,523	$194,523,067
Foreign free goods	1,448,926	2,150,846
Do. dutiable	2,503,682	3,550,096
Specie and bullion	23,140,146	9,942,764
Total exports	$179,985,277	$210,166,273
Do. exclusive of specie	156,845,131	200,223,509

☞ The Chancellor of the State of New Jersey has rendered a decision in the matter of the application of the officers of the Cape May Short Line Railway as to the constitutionality of the amendments to the General Railroad law passed by the Legislature last winter. The Chancellor assumes, in effect, that he has no authority to reverse legislative enactments, and concludes that those interested have absolutely no redress for any assumed injury done by the operation of the new law.

☞ The gross earnings of the Erie Railway for the month of May, 1878, were $1,172,961, the expenses $919,482 and the net earnings $253,479—a decrease compared with the month of May, 1877, of $51,551. From January 1 to May 31, 1878, the gross earnings were $5,872,677, the expenses $4,401,246, and the net earnings $1,471,431—an increase in net earnings during the five months compared with the corresponding period of the previous year of $198,470.

Progress of French Rail Industry.

The production of rails in France in 1877 exceeded the consumption, having amounted to 73,102 tons of iron rails and 184,668 tons of steel rails, while the consumption of rails by the French railway companies during the year was estimated at 48,888 tons of iron rails and 186,549 tons of steel rails. The consumption in 1877 exhibited a small decrease as compared with 1876, the demand for iron rails having fallen off 15 per cent while that for steel rails increased only 4 per cent. The Orleans Railway Company is the largest purchasers of iron rails in France, having taken 30,000 tons of iron rails last year, and 18,000 tons of steel rails. The Northern of France and the Western of France Railway Companies took only steel rails last year; the greater part of the rails purchased in 1877 by the Eastern of France and the Paris, Lyons and the Mediterranean Companies were also steel.—*Coal Trade Journal.*

☞ The European and North American Railway, Western Extension, will be sold at St. John, N. B., on the 31st inst. under foreclosure of the 1st mortgage for $2,000,000. The bonds are chiefly held in England, and it is stated that arrangements have already been made to purchase the road and organize the St. John and Maine Railway Co. The road is about 91 miles in length, extending from St. John to Vanceboro.

☞ Trains are now running from the depot at Flatbush and Atlantic Avenues, Brooklyn, to Brighton Beach. The route is over the rapid transit road on Atlantic avenue, as far as Franklin avenue, where the Brooklyn, Flatbush and Coney Island Railroad is met. The length of the road is seven miles and a half. The directors hope to be able to extend it so that one of the ferries may be reached.

☞ The Receiver of the Detroit and Milwaukee Railroad reports the receipts during the month of July (including $40,853 from previous report) at $124,053, and the disbursements at $88,181—leaving a balance July 31, of $35,872. The disbursements exceeded the receipts by $4,981. The amount of Receiver's notes and certificates outstanding at the close of the month was $346,598.

☞ Preliminary work has been commenced on the Camden and Atlantic (N. J.) Railroad for a double track. It is intended to lay an additional track to Haddonfield as soon as possible, and thence it will be continued to Atlantic City, probably by the opening of the season of 1879.

☞ The New Jersey West Line Railroad, which was sold on the 3d inst. under foreclosure of mortgage was intended to run from Jersey City to Bethlehem, Penn. It is completed from Summit to Bernardsville, 15 miles, and graded from Summit to Lyons Farms near Newark.

☞ Mr. H. B. Bishop, who succeeds Col. Pelton as Vice President of the New York Elevated Railroad Company was formerly a sugar merchant in Cuba, and is a brother-in-law of D. O. Mills, ex-President of the Bank of California.

☞ The Cincinnati Taxpayers' Railway company (common carriers) has been incorporated by Joseph Kinsey and others; capital, $10,000.

☞ The track of the narrow gauge railroad, from Camden, N. J., to Gloucester and Mt. Ephraim, is to be extended to Blackwoodtown, a distance of 7 miles. Work on it will be commenced as soon as the necessary amount of stock is subscribed, which has already been nearly accomplished. The surveys have all been made, and it is estimated that it will cost about $7,000 per mile. It is believed that the track will be laid and the road in running order by the first of the coming year.

☞ The contract between the Pennsylvania Railroad in Maryland and the Cumberland and Pennsylvania Railroad, in relation to the crossing of the latter by the former at a point near Cumberland, has been ratified, and the work on the bridge has already begun.

☞ The officers of the Worcester, Mass., Excursion Car Company, are: President, Jerome Marble; Secretary, A. B. F. Kinney; Treasurer, Charles B. Pratt.

☞ The line of the Dallas extension of the Dayton and Sheridan (Cal.) Railroad is now permanently located, and a large force of graders are at work making ready for laying the track.

☞ It is announced that the Delaware, Lackawanna and Western Railroad Company will take possession of the West Line Railroad on the 30th inst. and put it in good condition.

☞ The Compressed Air Cars of the Pneumatic Tramway Engine Company are now running daily, for passenger traffic, on Second Avenue, between the depot at 96th street and Harlem.

☞ The Denison and Pacific Railroad is now graded to within one-half mile from Whitesboro, Texas.

☞ Mr. M. Bowell has been elected President of the Belleville and North Hastings (Ca.) Railway.

☞ One-half of the forty miles of the Boston, Hoosac Tunnel and Western Railroad is built.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, Aug. 1, 1878.

A DIVIDEND OF THREE (3) PER CENT. HAS been declared by this company, payable on the 2d day of September next, to the holders of the capital stock of the company, as registered at the close of the 14th day of August, after which and until the 5th day of September, the transfer-books will be closed.

L. V. F. RANDOLPH, Treasurer.

WM. A. GUEST & CO.,
No. 17 Nassau Street,
NEW YORK.

Purchase all marketable Railway Securities. A specialty of Stocks and Bonds of Roads leased to Erie and New York Central, either interest-paying or defaulting. Also, Stock and Bonds of City Railroads.

A. WHITNEY & SONS,
CAR WHEEL WORKS,
Callowhill and Sixteenth Sts.,
PHILADELPHIA, PENN.

FURNISH CHILLED WHEELS for Cars, Trucks and Tenders. CHILLED DRIVING WHEELS and TIRES for Locomotives. ROLLED and HAMMERED AXLES.

WHEELS and AXLES FITTED COMPLETE.

PATENT
MINERAL WOOL.
ABSOLUTELY FIRE-PROOF,
UNDECAYING
AND THE BEST
Non-Conductor of Heat, Cold and Sound.
USED EXTENSIVELY FOR
DEADENING WALLS AND ROOFS OF
Dwellings and Ice-Houses,
LINING BOILERS, FURNACES, STEAM AND COLD WATER PIPES, ETC.

Can I Obtain a Patent?

This is the first inquiry that naturally occurs to every author or discoverer of a new idea or improvement. The quickest and best way to obtain a satisfactory answer, without expense, is to write to us describing the invention, with a small sketch. All we need is to get the *idea*. Do not use pale ink. Be brief. Send stamps for postage. We will immediately answer and inform you whether or not your improvement is probably patentable; and if so, give you the necessary instructions for further procedure. Our long experience enables us to decide quickly. For this advice we make *no charge*. All persons who desire to consult us in regard to obtaining patents are cordially invited to do so. We shall be happy to see them in person at our office, or to advise them by letter. In all cases, they may expect from us a careful consideration of their plans, an honest opinion, and a prompt reply. TOTAL COST OF U. S. PATENT, ONLY $55. *N. B.—These are by far the* SAFEST, BEST *and* CHEAPEST *terms offered by any responsible Patent attorney in the United States.* For all further information, please address: HENRY GERNER & SON, 24 Barclay st., P. O. Box 4,544, New York.

FINANCIAL.

ALEX. FROTHINGHAM & CO., BANKERS AND Brokers, No. 12 Wall st., make for customers desirable investments of large or small amounts in stocks of a legitimate character, which frequently pay from five to twenty times the amount invested every thirty days.

Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent 1y23*

23 Nassau Street,
NEW YORK.

THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

New York, Saturday, August 31, 1878.

Secretary Sherman's Speech on Finance.

At Toledo, Ohio, on the 26th August, Secretary of the Treasury Sherman made a semi-political speech which develops with considerable clearness the financial policy of the administration.

On most of the points presented by Mr. Sherman we believe him sound and correct; but in his defence of the national bank note currency he is so plainly in error that we shall not merely dissent but show his evident heresy.

After saying that two questions of the many, silver and redemption, or as the telegraph has reported it, resumption, now principally occupied the public mind, the speaker gave his views at length; the substance of which we take up omitting all reference to politics or the speech of Senator Thurman to which this is a reply.

Mr. Sherman declared himself in favor of the largest amount of currency necessary for business wants; not coin alone, but paper money also in proper abundance. The essential qualities of all *good money* (the italics are ours) are stability, equality and convertibility. A dollar of one kind should buy as much as a dollar of any other kind. Depreciated money cheats the ignorant and enriches the broker and money changer.

This is sound finance and sound sense as well. We shall allude to this argument again because Mr. Sherman pointedly contradicts himself afterwards in order to prove a theory, and is not probably aware that he is so laying himself bare.

Concerning the ability of the Treasury to redeem greenbacks on the 1st of January, 1879, it was stated that $134,580,000 in coin was now available after all coin liabilities had been provided for. The greenbacks issued and subject to redemption at the date fixed by law are $346,000,000; to which may be added $322,000,000 national bank notes, making $668,000,000 in all. It has been freely admitted by all authorities that this volume of money, $668,000,000, is not too great for our current wants. The amount cannot be lessened except by design of the Secretary of the Treasury; since he is allowed by law to issue new greenbacks in place of old ones redeemed. The same fixed amount of circulation is also insured to the national banks.

To redeem this entire volume of paper money at the Treasury, says Mr. Sherman, would be difficult; therefore it is better that the national bank notes not payable in coin should continue in circulation.

This we pronounce a flat contradiction of Mr. Sherman's argument that all currency should be alike in "stability, equality and convertibility." The greenback gives us coin whenever we desire it, but the national bank note does not. When we offer the bank note for redemption, which can only be at its own place of issue, we are given not coin but a greenback, which in turn must be presented at the Treasury for redemption. If Mr. Sherman was a practical banker he would know that national bank notes cannot be maintained at par with greenbacks after redemption of the latter is begun. The public expect and desire a paper currency equivalent to coin; and whenever that currency is found not equivalent to coin it will be immediately at a discount. We predict that unless the national banks voluntarily redeem their notes over the counter in coin when desired, the entire issue of bank note currency will be at a permanent discount. The brokers will begin again their old traffic in assorting and returning bank notes for redemption; whilst the public will find itself not much benefited by practical resumption. The banks will from necessity hoard greenbacks, leaving for the business world not gold and paper at par, but national bank notes and silver, both at a discount for gold.

This criticism of Mr. Sherman's policy is not unfriendly. The question of our currency is one of very grave importance and concerns all alike. If Mr. Sherman could only assure himself of the fact that the nation is less timid than he is it would be better for all concerned. At the next session of Congress we shall undoubtedly see new legislation demanded concerning our finances, because existing laws will be found inadequate to the requirements of the times. We shall not be satisfied with less than complete and absolute resumption. Such resumption is not possible until *all* paper money is redeemable in coin. This is the rock upon which Mr. Sherman's policy will be wrecked.

Ohio and West Virginia Railway.

The officers of the Ohio and West Virginia Railway Company, an organization recently formed for the purpose of purchasing and continuing to completion the Columbus and Gallipolis Railway, are: President, J. B. Hall; Vice President, Chas. C. Walcutt; Treasurer, Theodore P. Gordon. The directors are: D. W. Caldwell, Samuel Thomas, James Ballard, J. C. Harper, Charles C. Walcutt, J. B. Hall, George McQuigg and Edward Deletombe.

The project was originally inaugurated by the Gallipolis, McArthur and Columbus Railroad Company which, during the years 1871-72-73, expended a very large amount of money in the grading of that portion of the railway between Gallipolis and the intersection with the Marietta and Cincinnati Railroad at or near Vinton Station.

Becoming embarrassed in 1873, work was entirely suspended; and in 1876 the property, rights and franchises were transferred to the Columbus and Gallipolis Railroad Company. Under the direction of this new organization work was con-

tinued until July of the present year, when they too were obliged to succumb to the pressure of the times, and on the 26th inst. yielded all their rights and interests by sale to the Ohio and West Virginia Railway Company.

We understand the new company is on such financial basis that it will be able to proceed at once actively with the work of construction, with the confident expectation that the line from the Marietta and Cincinnati Railroad to Gallipolis, and the branch to Pomeroy, will be completed by the 1st of January next.

Capital's Share of Production.

SOME STATISTICS CONCERNING THE OPERATIONS OF A ROLLING MILL — NOT A DIVIDEND IN FIVE YEARS.

ROME, N. Y., July 30, 1878.

To the Editor of the Utica Herald:

DEAR SIR: In the editorial article of this morning's *Herald* there are some statements that I consider erroneous, and propose to do what I may be able to correct them.

You say: "The steady investment all over the country in four per cent bonds is a demonstration that the popular judgment accepts that as the fixed rate for undoubted security." On this point I have only to say that capital will obey the law of demand and supply, seeking the best investment the law will afford. It may be remarked that the low rate of government security is evidence that a better interest cannot be had in industrial pursuits. Men will sometimes put capital into such pursuits with a view to aid their own industry; but as a mere investment they will consider the attention required, and the hazards of trade, which will require a larger interest than would be satisfactory on government bonds.

In regard to hard times you state: "The first step is for capital to accept the smaller share of its joint product with labor. Lower interest and lower dividends would set in motion many enterprises which cannot start on the basis of eight or ten per cent. This would signify lower prices for many of the necessaries of life without any reduction in wages. An improvement would result in the condition of those dependent on their daily toil, and employment would be given to many hands now idle."

The question of labor and capital is often discussed very loosely, though it is one that should be entered on with candor and well settled facts.

In the above extract it appears to be assumed that the present embarrassment arises from the capitalist. I fully concede that interest must fall as capital becomes abundant. But it is equally necessary that as goods fall in price the rate of wages must fall its share. No production can long be carried on if the market price for goods does not pay expenses. In the expenses there must be something for capital, or it will not be long employed. Two elements are involved in this question—the high rate of interest and the high rate of wages that prevailed not long since.

I am interested and have given much attention to a mill that makes bar-iron. The community in which this mill is situated and where most of the stock is owned will, I think, give it the credit of conducting its affairs with close economy. It has a capital stock of $135,000, all honestly paid up. I have made a careful analysis of the mill, and find it has paid no dividend for the past five years. Not large interest on its capital, but none at all.

I have made a careful comparison of the market price of iron and the cost of manufacture between the last half year of 1873 and the last half year of 1878, and submit the following statement for each. The interest that appears in the statement is that paid on current loans made to conduct the business, and is no part of capital stock. The mill has been in good credit, having promptly met all its liabilities, and thereby obtained its stock and labor at the lowest market price.

The statement is for the cost of producing one ton of bar iron during each term, the material is for two tons and the labor for one ton.

	Cost in 1873.	Cost in 1878.	Per cent of '78 to '73.
Raw material, pig, scrap and coal.	$131 49	$55 65	42 p. ct.
The price of bar iron per ton	111 00	49 00	44 p. ct.
Labor	18 10	10 60	58½ p. ct.
Repairing	2 28	1 20	52.63 p. ct.
General office and salary expenses	1 85	1 34	72 p. ct.
Interest on current loans	4 55	2 49	54.72 p. ct.
Insurance, taxes and water rent	83	45	54 p. ct.
Total cost of manufacture			58.22 p. ct.
In brief—total of material			42 p. ct.
Total of manufacture			58.22 p. ct.
Total iron sold			44 p. ct.

It will be noticed that while bar-iron has fallen to 44 per cent of 1873 the raw material has fallen to 42 per cent of 1873—nearly the same, while labor has only fallen to 58 60 per cent, or 14 per cent less than the product of the labor.

The last half of 1878 (which is better than the first half, on account of reduction in interest and labor) has barely sustained the cost of production, leaving nothing for dividend on capital stock.

You will notice that the rate of interest per ton has fallen on current loans to 54.72 per cent, or nearly four per cent more than labor. Loans for current business are for short terms and cannot be had at the rate of interest on government bonds.

The foregoing statement shows that capital and not labor has been the chief sufferer, and that the revival must come from bringing the rate of wages nearer the market value of the product.

You may claim that iron has been more depressed than other industries. This may be to some extent. As it has been specially petted by the protective theory, it has no doubt suffered more than those that have not depended on artificial aid.

It is evident no capital will go into manufacturing industry under present circumstances; and that which is now so employed will be lost unless the rate of wages are more nearly compared with the market for goods. The fall of fourteen per cent more on the value of the product than on the rate of wages is a bar to all chance of six or eight per cent or any interest at all on capital.

I make this criticism because we need to understand our position in order to apply the proper remedy. No theorizing will induce capitalists to embark in industries that afford no profit on the investment. No doubt it will be some time before labor will accept this position; but the result must come before our industries revive.

Respectfully yours,

JOHN B. JERVIS.

☞ Engineers are now engaged surveying and locating a new railroad from Pittsburgh along the Monongahela river, and the south side of the Youghiogheny river to New Haven. It is to connect with the new Pittsburgh and Lake Erie Railroad, at Pittsburgh. The line as far as a point opposite Dawson Station has been permanently located. This road will give an outlet to the vast fields of coal lying in the forks between the Monongahela and Youghiogheny rivers.

☞ The Columbus and Gallipolis Railroad, which was sold by order of the court on the 26th inst. was purchased by a corporation known as the Ohio and West Virginia Railroad Company for $38,800. The new company expect to build the road from Columbus to Gallipolis.

Atlanta and West Point Railroad.

The earnings of this road for the years ending June 30, 1877 and 1878, were:

	1877.	1878.
From passengers	$88,101 13	$100,828 34
" freight	193,481 71	193,517 83
" mail	13,522 08	13,522 08
" express	5,361 48	5,899 82
" miscellaneous	10,692 42	7,372 49
	$311,158 82	$321,140 56
Expenses, viz:		
Conducting transp.	$45,544 06	$45,843 01
Motive power	62,694 34	55 585 79
Maintenance of way	50,325 06	49,792 80
Maintenance and rent of cars	12,837 24	18,002 51
Rents of Central and Georgia Railroads	6,000 00	6,000 00
Taxes	3,756 00	3,782 00
Litigated claims & fees	1,142 28	2,699 05
	$182,208 98	$181,705 16
Net over current exp.	$128,949 84	$139,435 40
Steel and iron rails, etc.	22,000 00	26,000 00
Net over all expenses	$106,949 84	$118,435 40

The ratio of current expenses to gross receipts is 56⅝ per cent, a reduction of 2 per cent as compared with the previous year. The Superintendent in his report says:

The passenger business shows some reaction from the decline of past years. The increase of through travel over the previous year is 17 per cent in number of passengers, and 18 per cent in revenue; and, of way travel, 15 per cent in number and 13 per cent in revenue. The former is, in part, due to closer Texas connections; and the latter, in part, to the State Fair last October; but I think the increase of both may, in some measure, be fairly attributed to the improving pecuniary condition of the agricultural classes of our people.

The revenue from freight is nearly identical in amount with the previous year, while some of the leading articles which comprise a majority of the tonnage and revenue, have differed widely. With an increase of 5 per cent in way cotton, we record a decrease of 55 per cent in through cotton. The latter item was noted as exceptionally large in my report of last year. The opposite extreme obtains for the year just closed. The decrease is mainly on Montgomery and Selma, and is the result of competition, by which rates were forced below the point at which we could pro rate without loss. Western farm products (except bacon and oats) have fallen off largely, and fertilizers increased, indicating an increased production of farm supplies at home.

The gross revenue shows a small increase over the previous year. I predicted some decrease, and am, therefore, agreeably disappointed. This result has enabled me to purchase 200 tons more of steel rails than I had proposed to do at the commencement of the year.

There is nothing in the present outlook that would seem to denote any material change from the past in our business for the ensuing fiscal year. The growing cotton crop, from which we estimate, directly and indirectly, a large portion of our revenue, promises a full yield. If there shall be no serious casualty to this crop, we may reasonably expect the operations of the ensuing year to give about the same results as the past year.

We have no pressing wants in view, beyond the ordinary current expenses, that will be permitted to interfere with the usual semi-annual dividends. I recommend the completion of wire fencing, and the gradual substitution of steel for the worn iron rails to the extent of any surplus revenue that may accrue.

Since the last report, we have substituted for the old temporary erections in this city, a substantial and commodious freight depot, with convenient offices for the freight department—a long-time, pressing want, now happily supplied. This improvement lessens the risk of, and increases the facilities for, handling and storing freight at our most important shipping and receiving point.

The property of the company, as a whole, has been fairly maintained. There is some deterioration in the "motive power," due to increasing age of engines, and some in the rolling stock; but the betterment in the road department will, I think, fairly balance these decrements.

The roadway and track are in good condition. About ten miles of the original light rail remain in the track. These rails will be gradually replaced with steel. The barbed wire fencing promises an important relief from the cost and risk of killing cattle by our trains. The cost of average fence in use, during the year, is about $1,700, and the reduction of item "stock killed by trains," from the previous report, is $864 45. The total cost of fencing, and the materials on hand, to the 1st instant, is $4,288 87. This amount has been placed as current expenses in "maintenance of way." The road department has been managed with economy and efficiency by our faithful Supervisor.

The motive power is in fair condition, and our Master Machinist is of the opinion that it is sufficient to peform the service our business will probably require during the present year. The expenses of this department compare favorably with previous years. Two of the oldest light passenger engines have been condemned, and consigned to the "scrap heap," leaving nineteen as the number now belonging to the company.

The rolling stock has been reduced by two shanty cars condemned. One good passenger car has been purchased, and an old one condemned.

The company have 19 locomotives, 5 passenger, 4 baggage, 1 express, 5 cab, 113 box, 18 stock, 23 platform and 3 coal cars. Number of passengers carried 41,801, against 36,293 in 1877—an increase of 5,508. Tons of freight transported, 69,133; do. in previous year, 75,684—decrease, 6,551. Bales of cotton transported 70,503, against 99,097 in 1877—decrease, 28,594.

BALANCE SHEET, July 1, 1878.

Road outfit and real estate		$1,193 636 22
Bills receivable		139,992 25

President.—Hon. JOHN P. KING.

Directors.—B. C. Yancey, John S. Bigby, F. Phinizy, W. B. Berry, D. N. Speer, L. M. Hill.

General Superintendent.—L. P. GRANT.

Secretary and Treasurer.—W. P. ORME.

☞ Ground was broken on the 26th inst. for the south lateral branch of the Sutro tunnel to tap the Julia shaft, 1,400 feet distant. It is expected the connection will be made by the 1st of December. From the Julia Mine a branch will be extended southerly to Gold Hill, and another branch will diverge near the Belcher Mine toward American Flat.

The Conference at Saratoga.

We are led to believe that some good may result from this last railroad conference at Saratoga. One important article of the compact, the abolition of all commissions to ticket agents, is a wise conclusion. Too many such leaks have existed heretofore, and railroad managers have often found themselves helpless when attempting to correct them. If one road gave commissions and concessions, others competing with that road must of necessity do the same.

It is a difficult matter to reconcile conflicting interests and bring all into harmony even when the roads study barely their own concerns; but when the multitudinous interests of the East and West are added the problem of adjustment is a hard one.

Chicago and St. Louis are keenly jealous of what may be done in freights or passenger rates; since mercantile competition between those cities is pushed to an extreme point. In the East, New York, Boston, Philadelphia and Baltimore, each strive to gain by any discrimination which may be the result of circumstances or agreement.

The railroad manager is continually under a cross-fire. If he studies the interests of all he has a vast as well as thankless task upon his hands. If he selfishly looks only after the interests of his own road and its connections he is sure to find himself in hot water.

Under such conditions, then, the railroad manager can hardly be blamed for seeking to pool his troubles as well as his rates with his neighbors. Whether this attempt at pooling many and diverse interests can long continue successful is not probable; because the very fact of pooling adverse interests tends in general to separate them more widely.

In the present instance at Saratoga there were other and subordinate interests which interfered to prevent harmony. The New York Central line and its Western immediate connections have contracts with the Wagner Sleeping and Palace Car Company, while the Erie line runs the cars of the Pullman Company only. Neither road is willing to permit the cars of the competing company to run over its Western lines.

The cattle traffic from St. Louis was another bone of contention which has been disposed of, but by arbitration because ordinary means failed.

The roads are now carrying Eastward bound freights at low rates. But we cannot believe any material advance is possible against free water transportation. Nor does it seem wise for the roads to push into competition with the Southern or Mississippi River route after the lakes and canals are closed. The European markets will not take our breadstuffs at prices much above present ruling rates. If rates of freight are low so are prices of grain to the farmer. Any considerable advance in freight must lower the price of grain by just so much to the farmer. Will he consent to it? No. The farmer holds the superior position at this time, and it is well for the railroad manager to understand it. The farmer *will not sell* his grain unless he is satisfied with the present market. He is able to hold over again for low water rates in the Spring or even longer. In pooling for higher rates, more money will be assured to the railroads if a moderate tariff is adopted than if any large advance is demanded. And here the discretion and cool judgment of the business man must decide the matter which will bring gain or loss to the railroad interests he controls.

Hard Common Sense on the Labor Question.

In an article elsewhere copied from the Utica *Herald*, the well known civil engineer, Mr. John B. Jervis, gives some plain figures and facts which are worth careful reading. Working men are clamoring everywhere for an increase of pay. In Philadelphia within the past eight days the operatives in a number of large iron manufactories struck for higher wages.

As an offset to this Mr. Jervis states that an iron mill with which he is conpected has not been able for five years to declare a dividend. Why? Because wages have remained too high in comparison with market prices of the iron produced. In a plain showing the owners of this one mill have not received anything for the use of the capital invested during the past five years. The working man ought to see from this that he is not the only sufferer.

Sales of Union Pacific Railroad Lands.

The Union Pacific Railroad Company has issued a circular showing the sales of its lands up to August 13, 1878, with the aggregate of the prices received, the amount of land grant bonds canceled, and the amount to be provided for, with the number of acres of land whose value is applicable to the cancellation of the remaining bonds. The statement is as follows:

	Acres.	Amount.
Total sales reported December 31, 1877	1,318,279.80	$5,717,127 23
Sales from January 1 to August 13, 1878	249,392 21	1,249,206 63
Total	1,567,672.01	$6,966,333 86
Average per acre		$4 44.3
Amount of land grant bonds issued		$10,400,000 00
Less—		
Cancelled to December 31, 1877	$3,076,000 00	
Cancelled to August 13, 1878	179,000 00	
		3,255,000 00
Outstanding August 13, 1878		$7,145,000 00
Contracts outstanding	$3,609,467 66	
Interest accrued	800,000 00	
Cash on hand	469,035 00	
Total amount applicable to redemption of bonds		4,878,502 66
Am't of bonds to be provided for		$2,266,497 34

The above result shows that the sale of 1,567,672 acres has provided for the cancellation of $8,133,502 66 of land grant bonds, leaving in the hands of the company 11,232,328 acres for the unprovided balance of $2,266,497 34.

☞ The gross earnings of the Denver and Rio Grande Railroad for the month of July, 1878, were $121,574, against $74,276 in July, 1877, an increase of $47,298, or 64 per cent. The net earnings in July were $55,185, against $41,600 in July last year, an increase of $13,585, or 33 per cent. The whole length of the road is 334 miles.

RAILROAD EARNINGS—MONTHLY.

Cincinnati Southern Railroad.

The citizens of Cincinnati have voted by a majority of 5,800 in favor of issuing bonds to the amount of $2,000,000 to complete the Southern Railroad, and the work is now under contract to be finished by August 20, 1879, and there is scarcely a doubt that it will be done before the specified time. The opponents of the road have not ceased their opposition, and probably will not, but they are not formidable now, for the courts have already affirmed the validity of the law under which the original bonds were issued, and there is no new principals involved in the questions now brought forward. The emphatic expression of the will of the people the courts must respect unless the law is clearly against it, which, in this instance, it is not; but, on the contrary, it is in its favor. Therefore there is every reasonable assurance that within one year we shall be in direct communication with the Southern net work of railroads. The opening of this road to business will mark the beginning of a new era of prosperity for Cincinnati.—*Cin. Price Current.*

Statement of the Public Debt of the United States, August 1, 1878.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.
5 per cent. bonds, 1858	$260,000 00	$1,083 33

Central Branch Union Pacific bonds, 1862-64	1,600,000 00	8,000 00
Western Pacific bonds, 1862-4	1,970,560 00	9,852 80
Sioux City and Pacific bonds, 1862-64	1,628,320 00	8,141 60
Totals	$64,623,512 00	$323,117 56

Interest paid by United States, $39,835,039 84; interest repaid by transportation of mails, &c., $9,881,444 25; balance of interest paid by United States, $29,953,595 61.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, July 31, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

Redemption of Five-twenty Bonds.

The Secretary of the Treasury issued on the 26th inst., the sixty-ninth call for the redemption of 5-20 bonds of 1865—consols of 1865. The call is for $5,000,000, of which $2,500,000 are coupon and $2,500,000 registered bonds. The principal and interest will be paid at the Treasury on and after the 26th day of November next, and the interest will cease on that day. The following are the descriptions of the bonds:

Coupon bonds, dated July 1, 1865, namely: $50, Nos. 73,001 to 74,000, both inclusive; $100, Nos. 132,001 to 136,000, both inclusive; $500, Nos. 92,001 to 95,000, both inclusive; $1,000, Nos. 179,001 to 184,000, both inclusive.

Registered bonds, redeemable at the pleasure of the United States after the 1st day of July, 1870: $100, No. 18,951 to No. 19,000, both inclusive; $500, No. 11,151 to No. 11,200, both inclusive; $1,000, No. 87,501 to No. 88,000, both inclusive; $5,000, No. 11,401 to No. 11,600, both inclusive; $10,000, No. 21,801 to No. 22,550, both inclusive.

☞ The project of building a short line to the seaboard from Chambersburg, Penn., (via Waynesboro to Baltimore) is exciting considerable interest along the route of the proposed road.

American Railroad Journal

Saturday, August 31, 1878.

Financial and Commercial Affairs.

"What moral right has the Government to ask its citizens to take its notes as money, and a standard of value merely for the purpose of saving interest?"

This question was asked in public of the public during the present week. It deserves a candid public answer, and such we give it without favor or prejudice.

Whenever, as at this moment, the nation of forty million people is paying an annual tax of fifty cents per capita, interest on bonds securing bank notes in circulation, until more than $250,000,000 has been unnecessarily paid, whilst a saving equal to this amount has come from greenbacks, does not common sense as well as political economy command us to stop a needless waste in our national interest account?

Is it not then the moral duty of the Government to require its citizens to save and economize where this saving wrongs no one but where the great majority are benefited?

Common honesty backed by the law requires every debtor to pay what is due; but it does not demand interest on the debt where interest has not been promised or expected. The greenbacks represent $346,000,000 of national debt; but on all these millions interest is neither paid nor asked for. Why? Because the evidence of this debt, the greenback, is made equivalent to the value given the government by its negotiability, its purchasing power. That purchasing power of the greenback when in the hands of the creditor

is a value equivalent to interest, and pays him for the use of his lent money.

There is no sophistry nor hair-splitting to reach this conclusion. What good reason exists for continuing to pay interest on paper money then? None.

And now we turn the tables and ask what moral right the Government has to ask its citizens to pay interest on a debt where no interest has been promised or expected, and where a full equivalent for interest has been given in the legal purchasing power of the bank note, which is a due bill endorsed by the Government?

Another financial question of most importance to the national banks is the issue of greenbacks under a law of the last Congress. This new issue will be made to fill the place of old greenbacks redeemed after January 1st, 1879. The practical effect of the new issue will be the inflation of the currency to just the amount of new greenbacks issued. Or, to give it from another standpoint, the currency will be increased by coin to the amount of greenbacks redeemed. By the strict wording of the law the new greenback will not be a legal tender, and cannot be used by the national banks as such. Just what complications may arise from this defect in the new greenback it is not now easy to calculate. An effort will doubtless be made either to alter the law giving the new greenback full legal tender powers, or the Supreme Court will be sought for the same purpose.

The Money market exhibits no new features worthy of special remark. As heretofore the wants of all borrowers are readily supplied at low rates provided the security offered is A-1. Subscriptions to the new Governments continue large, still averaging about a million dollars per diem. Since our last another call for $5,000,000 of five twenty bonds, the sixty-ninth, has been made. The amount of bonds now called in but not yet redeemed is $55,000,000. The Secretary of the Treasury reports that not more than $250,000,000 of our bonds are now held abroad.

Call loans are steady at about 2 per cent on Stock collaterals, and 1 per cent on Government securities. Discounts of prime commercial paper are made at 4, 4½ and occasionally up to 6 per cent. Prime paper is in very light supply.

Gold is very quiet at 100⅛ and dull. Transactions for the week have been quite light and the fluctuations barely ⅛ per cent. Loans are made at 1½, 1 per cent and "flat." Mexican dollars have changed hands at .89½ gold, which is their bullion value nearly.

The Stock Market after an extended campaign of activity has settled down into the "fifties," or the average mid-summer transactions. The injured will now have an opportunity to examine their hurts and see where they stand. It was confidently expected that the late conference of railroad magnates at Saratoga would create a firmer tone for all the trunk line stocks. That expectation has not been fulfilled, since little was accomplished at the conference which would or could promote any immediate gain in earnings and consequent dividends. The sales at the Stock Exchange were 56,700 shares Saturday, 64,300 Monday, 56,900 Tuesday and 68,929 Wednesday. Sales of Government bonds at the Stock Exchange have not been large during the week. We now quote prices of the various issues as follows:

United States 6s, 1881, registered, 107⅞@108; do. coupon, 107⅞@108; 5-20s, 1865, new, registered, 102¾@102⅞; do. coupon, 102¾@102⅞; do. 1867, registered, 105⅛@105¼; do. coupon, 105⅛@105¼; do. 1868, registered, 106¾@107¼; do. coupon, 107¼@108; ten-forties, registered, 106¼@106½; do. coupon, 108¾@109; 5 per cents, 1881, registered, 106@106¼; do. coupon, 106@106⅛; 4½ per cents, 1891, registered, 103⅝@103¾; do. coupon, 104⅜@104¾; 4 per cents, 1907, reg., 100¾@101; do. coupon, 100¾@101; sixes, currency, 119⅞@120.

From Boston a quiet Money market is reported. Banks are firm in asking 4 per cent for 4 months' paper, with probably more doing above the rate named than below it. Call loans are made at 3@5 per cent. The currency value of exports for the week was $1,292,434, against $849,210 for the same week in 1877. Increase in exports this year $6,129,437. The gold value of imports for the week was $1,085,596, against $1,158,248 for the same week in 1877. Decrease in imports for the year, $7,265,643.

Philadelphia sympathizing with New York, reports excessive dullness as the only characteristic of the market. Transactions in the Stock market were almost too limited to make quotations. Pennsylvania Railroad shares sold at 32¼@32½, closing at the latter. Reading was quoted nominally at 16¼@16⅜.

Baltimore reports indicate a reviving trade with Money plenty and easily obtained on good securities. The opening of trade is not yet fairly active, but is satisfactory. The prevalence of yellow fever in the South is a considerable drawback. The Stock market closed quiet. Baltimore and Ohio common stock closed at 87@90. Northern Central at 14 bid.

The exports from New York, exclusive of specie, amounted for the week to $7,011,880 currency value.

Sterling Exchange is nominally unchanged, although in actual business rates favor buyers. We quote 60 day bills at 4 83½, and sight bills at 4 88. Moderate importations of our bonds continue, but with the present volume of exports there must soon be a flow of specie this way in spite of all efforts to keep it where it is.

Domestic Produce continues in good export demand. Receipts continue liberal and the present movement bids fair to continue. European advices are favorable for continued exportation, crop reports from the Continent being less favorable and English advices now indicating a demand for our cereals fully up to last year's requirements.

The Cotton market has been irregular and variable since our last report. There is a considerable demand for spot cotton for consumption. Deliveries will be delayed somewhat by the prevailing epidemic, and this is operated upon as far as possible in the market for futures. We now quote futures, August at 12.15; September, 11 64@11.70; October, 11.35@11.39; November, 11.17@11.20; December at 11.10@11.18.

Metals remain dull and nominally unchanged. Transactions in copper, lead and tin have been limited with a quiet market. Pig Iron is in excess of the demand and the market is at a complete standstill. This applies equally to Scotch and American. Quotations for Iron and Rails unchanged. Mills making Steel Rails are generally working full time with orders for the future.

Ocean freights are still steady with a good demand for grain vessels. Engagements were made to Liverpool for grain by steam at 7d.; flour, 2s. 7½d.@2s. 9d. To Glasgow, grain by steam 8½d. per bushel of 60lbs. Cotton freights were to Havre, by steam, ¾c, compressed; by sail, ⅝c. To Hamburg, by steam ¾c. compressed; To Bremen, by steam 11-16c. compressed.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Winona and St. Peter 1st mort., 101; Kansas Pacific 6s, J. & D., 1896, with coup. certif., 97; St. Louis, Kansas City and Northern 7s, Real estate, 1895, 88½; Memphis and Charleston 1st mort., 100; Lehigh and Wilkesbarre 7s, consol., ass., 43; Chicago and Northwestern Interest bonds, 107; Central of New Jersey conv., ass., 70; Cedar Falls and Minnesota 1st mort., 88; Quincy and Toledo 1st mort., ex mat. coupon, 73; Nashville and Decatur 1st mort., 100¼; Boston, Hartford and Erie 1st mort., 26¼; N. Y. Central 6s, sub., 104¼; South Pacific 1st mort., 85; East Tenn., Virginia and Georgia 1st mort., 100¼; St. Louis and San Francisco R. R., 2; do. 2d mort., B & C, 25½; New Jersey Southern R. Union Pacific Railroad.

The earnings, expenses and net earnings of the Union Pacific Railroad Company for the three months ending June 30, 1878, were as follows:

	Gross Earnings.	Expenses.	Net Earnings.
April.	$1,075,058 19	$624,058 78	$450,999 46
May .	1,098,389 11	403,476 20	694,912 91
June..	1,154,231 85	455,535 41	698,696 44
Total.	$3,327,679 15	$1,483,070 84	$1,844,608 81

☞ Work was commenced on the 27th inst. on Fort Avenue, Baltimore, at the entrance to Fort McHenry, upon the new People's Passenger Railway, to run from Druid Hill Park to Locust Point by a circuitous route through West and South Baltimore. The contractors are Clark and Bird.

☞ The Toledo and Woodville Railroad, being the northerly 16 miles of the road between Toledo and Mansfield, Ohio, was sold on the 28th inst. at public auction, the purchaser being the Northwestern Ohio Railroad Company, a corporation created in the interest of the Pennsylvania Company. The price paid was $231,600.

☞ Subscriptions to the Baltimore and Delta Narrow Gauge Railroad are to be paid when the road-bed is made, and the rails actually laid to certain points. Under this arrangement the canvassers are meeting with gratifying success.

☞ Riehle Bros. have just received an order for one of their Testing Machines for Dr. C. Wm. Siemens, of London, England. They are also making one for Messrs. Anderson & Passavant, Pittsburgh, and one for the Hazard Mfg. Co., Wilkesbarre. They report orders brisk. An apparatus testing metals by abrasion is being made at these works.

☞ The San Pablo and Tulare Railroad is now completed between Martinez and a point on the Western Pacific Railroad between Ellis and Bantas, and about the first of October the overland trains will run to Oakland by that route. The line is somewhat longer than by way of Liverpool Pass, but the grades are much easier and will facilitate business.

☞ A new iron steamship, for the New York, Charleston, Savannah and Florida line, was launched by the Harlan & Hollingsworth Company, at Wilmington, Del., on the 28th inst. She is 260 feet long by 38 feet beam and 14 feet in depth, and will accommodate 200 first class passengers.

☞ The Contra Costa Gazette says that the Bay Shore Line between Oakland and the Western Pacific Railroad has been completed, and it is presumed that the Overland, Southern California and San Joaquin valley trains will be turned on to the line the 1st of September.

☞ The east bound freight on the Central Pacific Railroad for the month of July amounted to 11,978,757 pounds, viz: from San Francisco, 10,918,044 ; from Sacramento, 969,623 ; from San Jose, 29,786 ; from Stockton, 7,924 ; and from Marysville, 53,380.

☞ Trains are now running on the Chautauqua Lake (late Buffalo, Corry and Pittsburg) Railroad from Brocton, on the Lake Shore line, to Mayville, at the head of Chautauqua Lake; and to Corry, on the Atlantic and Great Western and Allegheny Valley Railroads.

☞ The Cincinnati City Council has formally announced the result of the recent vote on the issuance of $2,000,000 in bonds to complete the Southern Railway. This formal action will permit the immediate resumption of work on the unfinished portion of the road.

☞ The Lake County (Cal.) Bee says that efforts are being made to organize a company for the purpose of constructing a narrow gauge railroad from Napa City to the Lake county line, by way of Berryessa valley.

☞ The contract for the construction of the Valley Railroad, between Cleveland and the coal regions about Canton, Ohio, has been awarded for $110,000, the iron bridges extra. The road is to be completed by the 1st of January next.

☞ Mr. Levi L. Lincoln, formerly Superintendent of the Maine Central Railroad, has leased the Bangor and Bucksport Railroad for a term of ten years.

☞ The gross earnings of the Philadelphia and Erie Railroad for the month of July, 1878, were $214,081 ; expenses, $162 269 06—net earnings, $51,811 94.

☞ The Lafayette Steel Works have been removed from Jersey City to Williamsport, Pa.

Chicago and Northwestern Railway.

REPORT OF THE LAND COMMISSIONER.

LAND DEPARTMENT, Chicago, June 26, 1878.

ALBERT KEEP, Esq.,
President Chicago and Northwestern Railway Co:

DEAR SIR: According to the last Annual Report of the Land Commissioner, there remained on hand for sale, of lands owned by this company under its several land grants, on May 31, 1877, 2,153,074.99 acres. From this amount there should be deducted 4,123.83 acres of lands contracted to be sold, but not actually deeded at the date of the last report.

The amount of lands, therefore, actually on hand and for sale at the commencement of the last fiscal year was 2,148,951.16 acres.

There have been received during the year, on account of the construction of the Menominee River Railroad, patents for lands under the Michigan State Land Grant—the proportion of which belonging to said company, aggregates 94,247.97 acres. These lands have not been examined or appraised, and consequently are not yet ready for sale.

The total amount of land grant lands sold, and contracted to be sold, during the fiscal year, was 92 144 41 acres, the total consideration for which was $441,728 53. Of this amount there were sold in Michigan 15,736.26 acres for a consideration of $48,076 38, being an average price of $3 06 per acre.

In Wisconsin there were sold 1,569.72 acres, for a consideration of $6,006 55, being an average price of $3 83 per acre.

In Minnesota, of the W. and St. P. R. R. lands there were sold 74,835.73 acres for a total consideration of $387,645 60, being an average price of $5 18 per acre.

There have also been sold, during the year, ninety-four town lots in Minnesota and Dakota, for a total of consideration of $2,460, being an average price of $26 17 per lot.

The total amount of cash received during the year, from sales of lands and lots, and interest on contracts for the same, is the sum of $183,963 24, as follows:

On account of Michigan Land Grant.	$30,761 27
On account of Wisconsin Land Grant.	5,607 25
On account of Minnesota Land Grant	147,594 72
Total.....	$183,963 24
To this amount should be added, for sale of stumpage.....	1,910 00
And indemnity for trespass.....	583 56
Making a total sum of.....	$186,456 80

received and paid into the treasury on account of the land grants.

The number of acres of land actually deeded and conveyed during the year is as follows, to wit:

Lands in Michigan.....	8,278.13 acres.
Lands is Wisconsin.....	1,857.32 "
Lands in Minnesota.....	11,776.13 "
Lands in Dakota.....	576.90 "
Total conveyed	21.988.48

This leaves unconveyed the following lands, to wit:

In Michigan, exclusive of Menominee R. R. R. lands.....	613,998.30 acres.
In Wisconsin.....	358.192.06 "
In Minnesota	716,164.30 "
In Dakota.....	442,786.85 "
Total number of acres....	2,131,091.51

It will be understood, however, that this acreage includes some lands contracted to be sold, but not yet deeded, it having been thought best to show the number of acres to which the company still has the title, to avoid discrepancies which might otherwise arise, in case any considerable number of the contracts now in force should hereafter be forfeited and canceled.

To the above lands should be added the company's proportion of the Menominee R. R. R. lands, which, as above stated, is 94,247.97 acres, which would make a grand total of lands, the title to which is still in the company, of 2,225,339.48 acres, exclusive of lands in Minnesota which may be acquired east of the west line of Range 38, in final settlement of contested claims.

These figures are believed to be as nearly accurate as it is practicable to now give them, for the reason, as stated in former reports of the late Land Commissioner, that changes necessarily occur from time to time, arising from the rectification and adjustment of conflicting titles, settlement of pre-emptions, homestead claims, variation in plats, &c.

It will be seen by the foregoing report, that the sales of lands in Minnesota and Dakota have increased beyond precedent, the amount sold in May, the last month of the fiscal year, having aggregated $117,399 06, as against $1,197 21 in the month of May, 1877.

Our land agent at Marshall, Minn., reports that nearly all of the Government lands lying along the line of the Winona and St. Peter Railroad have been pre-empted, or taken up by actual settlers.

This department is in daily receipt of numerous letters from all parts of the East and West, asking for information, maps and circulars pertaining to these lands, and stating the intention of the writers to migrate to that section in the coming fall. Many inquiries are also received from parties interested in locating colonies, and desiring to secure large tracts of land for that purpose. The lands thus far sold have been purchased almost entirely by actual setters, in comparatively small tracts, and are being rapidly improved and put in order for cultivation. The country is filling up by a class of thrifty and industrious farmers, who are earnest in their efforts to secure homes for their families, and who will develop the resources of the country to their fullest extent.

The regular operation of the Dakota portion of the Winona and St. Peter Railroad to Lake Kampeska, where only occasional trains have hitherto been run, will give a still greater impetus to the sale of lands along that part of our line, and open up a new and most desirable section of that country. During the past three months our land office at Marshall has been taxed to its utmost capacity, and should the rush of immigrants continue, the location of an additional land agency at some point nearer the western terminus of the company's land grant, will become a necessity, the distance from Marshall to Lake Kampeska being too great for the convenience of parties desiring to purchase lands near the latter place.

Very truly yours,
JOHN D. CRABTREE,
Asst. Land Com'r.

State Supervision of Railroads.

Mr. Charles Francis Adams, Jr., has investigated the railroad questions of the day thoroughly, philosophically and dispassionately. His conclusions about them have an undoubted value: We turn, therefore, with some curiosity to his book on "Railroads; their Origin and Problems," just published by G. P. Putnam's Sons, to see what he has to say on State supervision. Though cautious and moderate in his views, Mr. Adams clearly favors the proper regulation of the roads by the State. He finds that only in this country are there many reflecting persons who still have faith in the principle of uncontrolled competition between railroads. In France and Belgium such a principle was never recognized. In Great Britain where it once obtained it is now abandoned. In Germany the Government proposes not only to regulate but to own all the roads. Experience long ago taught the old countries that such corporations, being creatures of the State, ought to be subject to the creative authority. In the United States according to Mr. Adams, the same doctrine has been gradually forced toward general acceptance by the acts of the railroad companies themselves. They have organized pools and rings to prevent competition and place the public at their mercy. In self-defence only the people have been obliged to ask for Government protection against such designs claiming logically that roads which owe their very existence to the State owe also a certain regard for the general good which should be enforced against them as a right, if they neglect to pay it as a duty. This is the strength of the argument for railroad regulation, and it is unanswerable. Mr. Adams does not object to a confederation of railroads. It is unavoidable that the stronger should absorb the weaker ones, and that all the lines in the United States should eventually belong to a very few corporations. This might have its advantages if the roads were finally subordinated to a Government tribunal.—*N. Y. Jour. of Com.*

The Coal Trade.

The total tonnage of anthracite from all the regions for the week ending August 17th, as reported by the several carrying companies, amounted to 542,774 tons, against 271,859 tons in corresponding week last year, an increase of 180,915 tons. The total amount of anthracite mined for the coal year is 9,863,220 tons, against 12,075,533 tons for same period last year, a decrease of 2,212,313 tons. The quantity of bituminous coal sent to market for the week amounted to 71,890 tons, against 64,265 tons in corresponding week last year, an increase of 7125 tons. The total amount of bituminous mined for the year is 1,983,552 tons, against 1,929,443 tons for corresponding period last year, an increase of 54,109 tons. The total tonnage of all kinds of coal for the week is 524,164 tons, against 336,125 tons in corresponding week last year, an increase of 188,039 tons, and the total tonnage for the coal year is 11,846,772 tons, against 14,004,976 tons to same date last year, a decrease of 2,158,204 tons. The product of the mines of the Cumberland coal region for the week ending August 17th was 25,975 tons, and for the year to that date 901,460 tons, an increase of 101,767 tons as compared with the corresponding period of last year. The quantity of coal and coke carried over the Pennsylvania Railroad for the second week in August was 89,958 tons, of which 69,423 tons were coal, and 20,530 tons coke. The total carried for the year is 2,871,787 tons, of which 2,234,663 tons were coal and 617,233 tons coke. These figures embrace all the coal carried over the road, east and west. The coal tonnage of the Reading Railroad for the week ending on the 24th inst. was 181,000 tons, of which 85,000 went to Port Richmond. The shipments from Port Richmond during the week were 56,500 tons.—*Phila. Ledger, Aug.* 26.

Utilization of Blast-Furnace Slag.

Within a few years great progress has been made in the utilization of blast-furnace slag, and that material is now applied in many ways with great advantage. Thus slag "sand" is employed for making concrete, building bricks, mortar and cement; slag "shingle" for concrete, also for roadways; slag "wool" for covering steam boilers and pipes, ice houses, etc., also for filtering purposes; blocks of slag concrete are used for paving, for curbstones and the like; finally, by Britten's process, slag is used in the manufacture of glass for roofing and for other purposes not requiring pure glass. In making building bricks of slag, the slag sand is mixed with selenitic lime, with the addition of iron oxide, and pressed in moulds. The cement is made from the slag-sand, common lime and iron oxides. It is little inferior to Portland cement in strength, while it does not cost one fourth as much. The concrete made from this cement, mixed with the "shingle," is an excellent conglomerate for use in monolithic structures. It is stated by Mr. Charles Wood, in a paper read before the British Iron and Steel Institute, that "it took two good men, with steel bars and sledge hammers, as much as four days to cut through a wall of this concrete twenty-six inches thick." Mr. Wood exhibited to the institute bottles of slag-glass, also specimens of slag-wool. The latter product, according to Mr. Wood,

is obtained as follows: A jet of steam is made to strike a stream of molten slag as it falls into the slagbogies or wagons. This jet scatters the molten slag into shot, and as thread or tail; the shot drops to the ground, but the fine woolly fibre is sucked into a large tube and discharged into a chamber. This chamber is very large, and is covered with fine wire netting. The steam and air carry the woolly particles all over the chamber —the finest into recesses formed for the purpose, the heavier into the body of the chamber. The wool is of a snowy white appearance.—*Popular Science Monthly.*

Geographical Changes Made by the Berlin Treaty.

The territorial changes effected by the treaty of Berlin are of a most comprehensive nature. By the treaty of San Stefano Turkey was called upon to surrender 78,550 square miles, with 4,539,000 inhabitants. The treaty of Berlin deals with 83,300 square miles and 4,882,000 inhabitants, as follows:

	Square Miles.	Inhabitants.	Mohammedans.
Ceded to Roumania	5,935	246,000	142,000
Ceded to Servia	4,326	264,000	75,000
Ceded to Montenegro	1,549	40,000	9,000
Ceded to Austria	15	2,000	....
Ceded to Greece (?)	5,300	750,000	40,009
To be occupied and administered by Austria	28,125	1,061,000	513,000
Formed into the Principality of Bulgaria	24,404	1,772,000	681,500
Included in Eastern Roumelia	13,646	746,000	265,000

The island fortress of Ada Kaleh, recently occupied by Austria, is not referred to in the treaty at all, and will probably remain in the hands of the power which now holds it. Roumania, in exchange for the territory ceded, is called upon to surrender 3,270 square miles, with 140,000 inhabitants, to Russia. The political divisions of the Balkan peninsula will henceforth be as follows:

	Square Miles.	Inhabitants.	Mohammedans.
Roumania	49,468	5,149,000	143,300
Servia	18,816	1,642,068	75,500
Montenegro	2,898	210,000	9,000
Turkey	140,965	8,359,000	3,081,000

But if we exclude the Provinces "indefinitely" to be occupied by Austria, Bulgaria and Eastern Roumelia, there remain to Turkey only 74,780 square miles, with 4,779,000 inhabitants, of whom 2,521,500 are Mohammedans. In Armenia Russia takes 10,000 square miles, with about 350,000 inhabitants. Cyprus, intrusted to the keeping of England, has an area of 2,288 square miles, and about 150,000 inhabitants.—*London Athenæum.*

Madison and Portage Railroad.

At a meeting of the stockholders of the Madison and Portage Railroad Company, held in Madison, Wis., on the 16th inst., the following board of directors was elected: Alexander Mitchell, S. S. Merrill, J. C. Gault, H. C. Atkins, J. W. Cary and Hans Crocker. Alexander Mitchell was elected President, thus making the Madison and Portage a part of the Chicago, Milwaukee and St. Paul Railway. The Milwaukee Wisconsin, in noticing the above, says:

It is rumored that the road will be extended at no distant day from Madison to Freeport, thus making an unbroken and nearly an air line from the Gulf of Mexico to Lake Superior. It is also rumored that the Illinois Central Railroad Company is looking to a connection with the Wisconsin Central at Portage, an engineer of that company having been at Portage looking the line over. It is stated that the proposed road of the Wisconsin Central will cross the Northwestern at Merrimac, and the C. M. & St. P. near Mazomanie.

Philadelphia and Reading Railroad.

Comparative statement of gross receipts, tonnage and passengers, of the Philadelphia and Reading Railroad Company, for the month of July:

	1878. Month.	1878. Year to date.
Gross receipts:		
Railroad traffic	$854,164 14	$7,085,733 39
Canal traffic	84,657 50	466,790 50
Steam colliers	41,133 20	359,142 17
Richmond coal barges	7,766 19	51,485 75
Total Railroad Co.	$987,721 03	$7,962,151 81
Reading Coal & Iron Company	697,184 04	4,579,382 81
Total of all	$1,684,905 07	$12,541,534 62
Tonnage and passengers:		
Tons of coal on railroad	440,722 04	3,399,383 07
Tons of merchandise	232,017 17	2,057,648 00
Passengers carried	586,077	4,154,383
Coal transported by steam colliers	53,518 00	372,541 00
Tons of coal mined:		
By coal and Iron Co	191,880 03	1,568,883 11
By tenants	85,087 01	631,126 00
Total mined from lands owned and controlled by Co. & from leasehold estates	276,967 09	2,200,009 11

	1877. Month.	1877. Year to date.
Gross receipts:		
Railroad traffic	$917,227 92	$7,297,097 82
Canal traffic	115,626 40	521,696 47
Steam colliers	42,387 86	488,726 80
Richmond coal barges	14,398 65	71,927 07
Total Railroad Co.	$1,089,640 83	$8,329,447 66
Reading Coal and Iron Co.	907,290 27	5,578,134 87
Total of all	$1,996,931 10	$13,907,582 08
Tonnage and passengers:		
Tons of coal on railroad	592,178 00	4,207,071 14
Tons of merchandise	231,870 12	1,991,175 00
Passengers carried	609,055	4,301,331
Coal transported by steam colliers	53,592 00	368,900 00
Tons of coal mined:		
By Coal and Iron Co.	376,249 12	2,140,378 03
By tenants	72,252 02	750,766 18
Total mined from lands owned and controlled by Co. and from leasehold estates	448,501 14	2,891,145 01

Calumet and Hecla Mining Company.

At the annual meeting of this company held in Boston on the 21st inst. the Treasurer submitted the following statement:

ASSETS.

Cash at Boston office	$111,870 33
Cash at mine	7,571 97
United States Government bonds	305,962 62
Loans	240,500 00
Copper, at 14c. net	1,857,894 64
Due from sales of copper in April	1,757 57
Supplies at mine	223,198 83
Bills receivable, at mine	14,435 11
	$2,763,191 07

LIABILITIES.

Drafts in transitu	$9,624 38	
Bills payable, at mine	123,819 73	
		133,444 11
Excess of assets		$2,629,746 96

The following directors were re-elected: Alexander Agassiz, (President), Quincy A. Shaw, George Higginson, H. H. Hunnewell, James N. Wright. Charles W. Seabury was chosen Treasurer and Secretary.

The Railroad Accounts Law.

Mr. Theophilus French, Auditor of Railroad Accounts, at Washington, an office created by act of Congress, in order that there may be no misunderstanding in reference thereto, gives the following interpretation of the new law, and the classification of the roads upon which its provisions are mandatory:

The question is often asked, What railroads are included in the "act to create an auditor of railroad accounts, and for other purposes, recently passed. Section 3 of the act says: "All railroad companies whose roads are in whole, or in part, west, north, or south of the Missouri River, to which the United States have granted any loan of credit or subsidy, in bonds or lands." Section 6 of the act says: "This act shall apply to any and all persons or corporations into whose hands either of said railroads shall lawfully come, as well as the original companies." As to geographical limits, it is held that the lines upon which said limits are to be determined are a longitudinal one 90° 9′ 14″ west, running north and south, from which to determine what roads are "west of the Missouri River," and a latitudinal one 38° 38′ 3″ north, running directly west from the junction of the Missouri with the Mississippi River, from which to determine what roads are "north and south of the Missouri River;" and it is further held, that whether grants were directly made to corporations, or indirectly through States to corporations, such railroads were recipients of lands or subsidies, and subject to the conditions in the acts granting the lands. The companies embrace within this construction of the act have been divided into five classes, as follows:

First, the Union Pacific and Central Pacific, to each of which bonds and lands have been granted, and both of which are included in the Sinking Fund act, approved May, 7 1878.

Second, the Kansas Pacific, Sioux City and Pacific, and Central branch of the Union Pacific, to each of which bonds and lands have been granted, but which are not included in the Sinking Fund act.

Third, the Denver Pacific, to which lands only have been granted, but which is considered an extension of the Kansas Pacific.

Fourth, the Texas and Pacific, Southern Pacific, Northern Pacific, St. Louis and San Francisco, Atlantic and Pacific, Burlington and Missouri River in Nebraska, the Oregon and California, and the Oregon Central, to all of which lands have been granted directly as corporations, and under certain conditions.

Fifth, the Hannibal and St. Joseph, the St. Louis, Iron Mountain and Southern, the Missouri Pacific, the Little Rock and Fort Smith, the Memphis and Little Rock, the Missouri, Kansas and Texas, the Atchison, Topeka, and Santa Fe, the Leavenworth, Lawrence and Galveston, the Missouri River, Fort Scott, and Gulf, the St. Joseph and Western, the North Louisiana and Texas, the Louisiana and Texas, (Morgan's) the Chicago, Burlington and Quincy, the Chicago, Rock Island and Pacific, the Cedar Rapids and Missouri River, the Dubuque and Sioux City, the Iowa Falls and Sioux City, the Sioux City and St. Paul, the St. Paul and Sioux City, the Chicago, Milwaukee and St. Paul, the Chicago and Northwestern, (Winona and St. Peters,) the Southern Minnesota, the St. Paul and Duluth, the St. Paul and Pacific, (first division,) the St. Paul and Pacific, (St. Vincent extension,) the Wisconsin Central, the West Wisconsin, (now Chicago, St. Paul and Minneapolis,) and the North Wisconsin, to all of which grants of lands have been made through the States with certain conditions.

☞ The line for a railroad between Lenconia and Famagosta, Cyprus, is being surveyed.

☞ Messrs. Morton, Rose, & Co., of London, offer for subscription £412,000 in 6 per cent debentures of the Brazilian Imperial Central Bahia Railway Company (limited). The issue price is £95½ per cent. An imperial guarantee of 7 per cent per annum is enjoyed by the company for thirty years upon its authorized capital, £1,462,500. This gives a net income of £102,375. The total debenture issue is to be £725,000, interest and sinking fund on which will take £50,750 per annum. The bonds are redeemable at par within thirty years by annual earnings, the first of which will take place on the 1st of July, 1879.

☞ The Reading (Penn.) Times says a suit to foreclose the mortgage held by Hiester Clymer, of that city, and G. Dawson Colemen, of Lebanon, as trustees of the South Mountain Railroad Company, is now pending in the United States Circuit Court. Joseph Hayne, of New York, representing bonds to the amount of $300,000, has filed a bill in equity to sell the road. The mortgage is the first lien to secure bonds to the amount of $2,400,000, only $1,016,000 of which, however, have been negotiated. The trustees are willing that the foreclosure should occur, and by the 1st day of September the Court will so order.

☞ A railroad of 3 feet gauge, from Martin's Station on the Atlantic, Mississippi and Ohio Railroad, in Pulaski County, Va., to the Altoona coal mines, a distance of 8¾ miles, is being constructed by the Altoona Coal and Iron Co. The survey of the road is nearly finished and three miles are ready for letting to contract.

☞ The stockholders of the Chapman Slate Company have authorized the directors to borrow $70,000 to construct a railroad from Chapmanborough to Catasauqua, Penn., to connect with the Lehigh Valley Railroad at that place, a distance of about nine miles.

☞ Regular passenger trains commenced running on the East Side New York Elevated Railroad, between South Ferry Station at the Battery and the Grand Central Depot at Forty-second street, on the 26th inst.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, Aug. 1, 1878.

A DIVIDEND OF THREE (3) PER CENT. HAS been declared by this company, payable on the 2d day of September next, to the holders of the capital stock of the company, as registered at the close of the 14th day of August, after which and until the 5th day of September, the transfer-books will be closed.

L. V. F. RANDOLPH, Treasurer.

WM. A. GUEST & CO.,
No. 17 Nassau Street,
NEW YORK.

Purchase all marketable Railway Securities. A specialty of Stocks and Bonds of Roads leased to Erie and New York Central, either interest-paying or defaulting. Also, Stockf and Bonds of City Railroads.

A. WHITNEY & SONS,
CAR WHEEL WORKS,
Callowhill and Sixteenth Sts.,
PHILADELPHIA, PENN.

FURNISH CHILLED WHEELS for Cars, Trucks and Tenders. CHILLED DRIVING WHEELS and TIRES for Locomotives. ROLLED and HAMMERED AXLES.

WHEELS and AXLES FITTED COMPLETE.

PATENT
MINERAL WOOL.
ABSOLUTELY FIRE-PROOF,
UNDECAYING
AND THE BEST
Non-Conductor of Heat, Cold and Sound.
USED EXTENSIVELY FOR
DEADENING WALLS AND ROOFS OF
Dwellings and Ice-Houses,
LINING BOILERS, FURNACES, STEAM AND COLD WATER PIPES, ETC.

P. O. Box, 4461. 26½ BROADWAY, N. Y.

Safety Railroad Switches
WITH
MAIN TRACK UNBROKEN.
RAILROAD CROSSINGS, FROGS,
and other
ROADWAY SUPPLIES.
MANUFACTURED BY
THE WHARTON RAILROAD SWITCH CO.,
Office, 28 South 3d Street.
Works, 23d and Washington Ave.
PHILADELPHIA.

Hopkins' Patent Lead-Lined
JOURNAL BEARINGS.
USED ON NEARLY ALL THE
Leading Railroads of the United States and Canadas.
NON-HEATING,
PERFECTLY SELF-FITTING,
CHEAPER AND BETTER THAN ANY OTHERS.
D. A. HOPKINS,
Patentee and Manufacturer,
113 Liberty Street, New York.

Can I Obtain a Patent?

This is the first inquiry that naturally occurs to every author or discoverer of a new idea or improvement. The quickest and best way to obtain a satisfactory answer, without expense, is to write to us describing the invention, with a small sketch. All we need is to get the *idea*. Do not use pale ink. Be brief. Send stamps for postage. We will immediately answer and inform you whether or not your improvement is probably patentable; and if so, give you the necessary instructions for further procedure. Our long experience enables us to decide quickly. For this advice we make *no charge*. All persons who desire to consult us in regard to obtaining patents are cordially invited to do so. We shall be happy to see them in person at our office, or to advise them by letter. In all cases, they may expect from us a careful consideration of their plans, an honest opinion, and a prompt reply. TOTAL COST OF U. S. PATENT, ONLY $55. *N. B.—These are by far the* SAFEST, BEST *and* CHEAPEST *terms offered by any responsible Patent attorney in the United States.* For all further information, please address: HENRY GERNER & SON, 24 Barclay st., P. O. Box 4,544, New York.

FINANCIAL.

ALEX. FROTHINGHAM & CO., BANKERS AND Brokers, No. 12 Wall st., make for customers desirable investments of large or small amounts in stocks of a legitimate character, which frequently pay from five to twenty times the amount invested every thirty days.

Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent 1y23

THE ROGERS
Locomotive & Machine
WORKS,
PATERSON, N. J.,

HAVING extensive facilities, are now prepared to furnish promptly of the best and most approved description, either

COAL OR WOOD BURNING;
LOCOMOTIVE ENGINES,
AND OTHER VARIETIES OF
RAILROAD MACHINERY.

RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh, Steel or Iron Rails,** and of any required weight and pattern.
PERKINS, LIVINGSTON, POST & Co.,
23 Nassau Street,
NEW YORK.

THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

Railroad officers desiring further information will please address

New York, Saturday, September 7, 1878.

American Ingenuity.

The exhibit of American machinery at the Paris Exposition has called the attention of all Europe to the fertility and enterprise of American invention. We, who have been accustomed from our earliest years to see the word "patent" upon nearly every article of necessity or luxury, do not realize to what extent social life has been shaped by inventions.

It was not true at the outset that we were a more inventive or ingenious people than others. But we have been from the outset surrounded by circumstances which "shaped our ends." Possessed of a vast territory so fertile that the simplest husbandry was rewarded munificently, the one constant demand was for laborers. It was impossible to supply this demand by our own increase of population. So earnest and well maintained has been this demand for a whole half century that the commonest genius who could contrive how to lessen the cost of labor even a little by his inventions was certain of an ample reward.

Understanding clearly their wants, our legislative fathers at an early day gave to their constituents a patent office the practical workings of which have left little more to be desired by the inventor. Not only is he thoroughly and fully protected in the sole profit, if any, arising from his invention for a considerable term of years, but the cost has been placed at a low point.

No other condition of society than ours could have stimulated invention until those simplest of household labors, washing and churning, would each exhibit a list of patented inventions numbering many thousands. Nor would another nation be likely to show such an example of persistent effort as that afforded a few days since in a patent awarded to the venerable Thaddeus Fairbanks, the original patentee of the platform scale, who must be now about ninety years of age.

There are those living yet who remember sitting round the great chimney at night and separating by hand the seed from the lint of the cotton that was finally spun and woven by hand into cloth for domestic uses. The cotton gin came presently and revolutionized the world. There are those who lament over the introduction of machinery and long for the old days of manual labor; but would they not make a louder complaint when called upon to pay from fifty to seventy five cents per yard for cotton fabrics as in the old days they long for? Ten millions of people in this country would be beggared by the destruction of cotton machinery thoughout the world. Other millions in other lands would be ruined similarly, and the whole civilized world would come to a standstill.

Scarcely less remarkable are the results from agricultural machinery. And these inventions are so recent that we are only now beginning to feel the results they are producing. Cyrus H. McCormick, the inventor of the reaper, is yet an active man in the vigor of life. Another inventor has an equal right to high honor, George W. Brown, the inventor of the corn planter.

These men and others have been public benefactors, because they have cheapened the price of bread to the laborer. They have made it possible to grow five bushels of grain where only one could be grown by hand labor. They have given employment to thousands of men and millions of money. Railroads, steamboats, canals, and all the list of carriers owe these men a debt that will never be discharged. Then, since the whole fabric of our society has been strengthened and molded by our inventions, why cry out against machinery?

As a rule our mechanical inventions have improved the quality of manufactures while lessening the cost. The London *Times*, in a recent article upon American inventions, especially gives praise to our manufacture of gold pens. Our English cousins have attained very great excellence in the manufacture of steel pens, but that the Americans should offer a gold pen of a durability and excellence superior to anything yet discovered astonished the "Thunderer." The writer in that journal had used such a pen for some years without suspicion of its wearing out. He had been accustomed to regard English manufactures as most reliable and lasting; but—this conclusion is ours—the American gold pen bids fair to outlast English mental vigor unless the editor is young.

In no other country has the inventor so wide a field for enterprise, and nowhere else are new and novel things seized upon with the same avidity as in this country. The sewing machine, which was to starve all the seamstresses, has, strange to say, clothed them gorgeously according to the standard of fifty years ago. And the same will apply to all inventions of real value. It may seem an extravagant assertion, but American ingenuity is destined some day to both feed and clothe a good share of the civilized world.

Baltimore and Ohio Railroad Stock.

We have been aware for some days that the Finance Commissioners of the City of Baltimore were in treaty for the sale of the stock arising from the last dividend declared by the Baltimore and Ohio Railroad Company on the amount of stock of that company held by the city. It is ascertained that the stock in question (1800 shares) has now all been disposed of in one transaction to parties at $86 per share, the negotiation having been conducted by a leading firm of this city. This is the highest price paid for a large amount of stock for some time past, and is $1 above the figure obtained by the Johns Hopkins trustees for

the 600 shares sold a short time since by them, accruing as dividend on the Baltimore and Ohio stock forming part of the endowment of the University. That stock went to England, as have some other lots which have recently been sold in the regular markets. The city's thirteen hundred shares just sold were taken by parties mostly residing in Baltimore, though it is understood that a portion also goes to England.—*Balt. Sun.*

A Voice from Japan.

[From the Tokio, Japan, Times, June 8, 1878.]

Messrs. Fairbanks & Co., manufacturers of scales for the world in general, have circulated in America the *fac simile* of a certificate in the Siamese language and character, showing that their wares have been for many years in use at the Custom House of Bangkok, and have not only given constant satisfaction, but have occasioned surprise by their durability and unchanging accuracy. This does not seem so remarkable a testimonial in the East as it possibly may be at home.

If Messrs. Fairbanks & Co. had any desire to obtain similar autographic assurances from all the States in Asia where trade is carried on, they could do so without difficulty. No custom house in China, we believe, and certainly none in Japan, is without a supply of them; and in all official departments where the use of scales is requisite, these alone are relied upon. The quaint Siamese chirography may have plenty of companion curiosities whenever it suits the parties concerned to send for them.

Connecticut & Passumpsic Rivers Railroad.

The earnings of this road for the years ending June 30, 1877 and 1878, were as follows:

	1877.	1878.
From passengers	$230,714 02	$201,030 61
" freight	333,823 76	311,023 54
" mails	10,978 74	20,768 97

Taxes	1,071 92	5,572 29
	$360,285 35	$336,021 64
Net earnings	$244,310 32	$222,590 64
Appropriated as follows:		
Coupons on bonds & other interest	$117,662 49	
Dividend February 1, 1878, 2 per cent	51,456 00	
Dividend August 1, 1878, 1 per cent	25,728 00	
		194,846 49
Surplus of earnings		$27,741 15
Balance of earnings from last year's report		59,926 17
Surplus of earnings now on hand		$87,670 32

Compared with the previous year the gross earnings show a decrease of $45,988 39, with a decrease in operating expenses of $24,268 71, showing a decrease in net earnings of $21,719 68. The report says:

It will be seen that our net earnings were enough to pay 2 per cent on the 1st of August; but at the time of declaring the August dividend, the accounts were not all made up, so that we could feel sure that we had earned it. We thought it more prudent to declare 1 per cent, and we are very glad that the error was on the safe side. The result of the year's business is rather gratifying to the directors, considering all the obstacles we have had to contend with for the last three-quarters of the year. We now have the satisfaction of stating that the controversies have all been amicably arranged, and our relations with all connecting roads are on a friendly basis.

The contract with the Boston, Concord and Montreal Railroad, in connection with the lease of the Southeastern Railroad, has been cancelled, and all matters between that road and this, settled up to May 1, 1878, a new contract being entered into at that time for ten years, which, we think, will work to the material advantage of both roads. New and permanent contracts have been made with the Southeastern Railroad, whereby the completion of that road between Sutton Junction and Sorel, on the St. Lawrence River, is secured, the parties contracting being known to be responsible; and they will, we feel confident, have the road ready to operate by the 1st of January next. This will give us an independent line from Boston, and other parts of New England, to the St. Lawrence River, which we have labored for years to accomplish, and will, we believe, prove of great advantage to this road, and to the line of which it forms a part.

We have also secured a line direct to Montreal, over the Montreal, Portland and Boston Railroad, crossing the Stanstead, Shefford and Chambly Railroad at West Farnham, and going direct to St. Lambert, thus avoiding the necessity of using the Stanstead, Shefford and Chambly Railroad by way of St. Johns.

This virtually gives us access to the River St. Lawrence, as the Richelieu River is navigable for steamers from Chambly, a station on the Montreal, Portland and Boston Railroad, to its outlet into the St. Lawrence at Sorel. These connections with the St. Lawrence River must certainly prove of great importance to the future business of our road. The roadbed and tracks have been maintained in good condition, and are better than a year ago. Fifty-six thousand two hundred and eighty-five (56,285) new sleepers, six hundred and seventy-six tons of new iron rails and one hundred tons of steel rails have been laid in the track. Seven thousand and sixty-nine (7069) rails have been taken up, repaired and relaid during the year.

The bridges have been kept in good repair and their condition improved. All necessary repairs have baen made to stations and buildings. A new wood shed, two hundred feet by fifty feet, has been built at Newport, and the wood department has been brought into an economical and satisfactory condition. One new engine has been built to replace one torn down, and one new passenger car has been purchased within the year. There has been no other change in the equipment of the road, which is ample for its present business and has been kept in good repair. We have had no accident of much importance, and no passenger has been injured during the year. No loss by fire has occurred but what was covered by insurance.

The equipment of the road consists of: 27 engines; 15 passenger, 5 baggage, 2 baggage and smoking, 2 mail, 660 freight; 2 boarding-house, 5 snow ploughs, 2 gongers, 20 gravel, 3 crane, 28 push, 42 hand and 82 wood cars.

The number of miles run by engines during the year was 405,086. Number of tons carried, 181,923; do. carried one mile, 8,179,341. Passengers carried, 133,808; do. carried one mile, 4,464,988.

Balances, August 19, 1878.

Superintendent.—H. E. Folsom, Lyndonville, Vt.

Locomotives for Burning Coal Dust.

In the mining districts of Pennsylvania there are immense quantities of waste coal, estimated at 60 million tons. The cost of taking out is quite as much as that of the best coal. Of the total product of the mines 15 per cent is taken to the waste heaps of the anthracite region and 75 per cent of these screenings is pure carbon. It is only necessary to have furnaces properly constructed for its consumption to utilize this enormous waste. The draft of the ordinary locomotive is so impulsive as to render futile all attempts to burn this fine coal, the utilization of which has engrossed the attention of the Philadelphia and Reading Railroad Co., which from having consumed more than 15,000 tons during the last year in generating steam in the stationary boilers of the company, has constructed seven locomotives upon an entirely new plan which enables them to consume this waste coal. One of these locomotives has been sent to the Paris Exposition and the others have been in daily operation for the past year on the company's lines. So satisfactory have been their performance that three more engines are in course of construction, one of which will be adapted to passenger traffic.

Recently one of these locomotives was placed upon the Old Colony Railroad, and the trial trip witnessed by a large number of railroad officials, mechanical engineers and others interested, all of whom gave it their approval.

In order to obviate the difficulties encountered in consuming anthracite coal in the ordinary locomotive, this is constructed with a largely increased fire surface. The consumption of fuel in the ordinary locomotive is at the rate of 40 to 60 lbs. per hour per square foot of grate surface, while in the engine when doing its hardest work

the consumption is only 16 lbs. per hour. The fire box is behind and on a line with, instead of under, the boiler, and while in the common locomotive the dimensions are 60 and 66 by 82 inches, the new design is 8 feet 6 inches long by 7 feet 6½ inches wide. The heating surface of the fire box is 106 square feet; of the combustion chamber, 26 feet, making a total of 982 square feet. The grate-rest is between water bars, which prevent them from burning out, and the area is 64 feet. The diameter of the six driving wheels is 54 inches, and above them are placed the boiler and fire-box. The cab is over the rear end of the boiler, while on top of the fire-box are seats, protected from the sun by an awning. The weight of the engine is 88,150. At the front end of the boiler is a revolving register, which when open has an area of 600 square inches. On account of the free steaming qualities of the engine, it becomes necessary to open this register, in order that the steam may pass directly to the stack without passing through the fire. The fuel used by this engine can be delivered in Boston at $2 25 per ton or $1 50 less than the cost of fuel which is now used. As the fuel remains perfectly quiet in the fire-box the consumption is slow, and although the engine has no spark arrester, not a spark escapes from the stack; neither is there any annoyance from smoke and gas, which are consumed. Its construction insures complete protection from fire, as no coals drop out on the track, and no sparks are blown from the smoke stack. Economy in fuel, comfort to the traveler, and security against burning bridges and woodlands will be secured by the adoption of this style of locomotive.

A train consisting of 28 freight and two passenger cars left Boston at ten o'clock a. m., and was run to South Braintree, where the freight cars were detached. Fall River was reached at 12.38. The return trip was made in much less time than the run down. An effort will be made to place the locomotive on the Boston and Albany Railroad, and test its capabilities on the heavy grades among the Berkshire hills.

Connecticut River Railroad.

The entire funded debt of this company, which matured on the 1st inst., is now being paid at the Globe National Bank in Boston. In connection with this event the following brief history of the road, which we copy from the Springfield Republican, may not be out of place:

A special meeting of the stockholders of the road, held August 3, 1858, authorized the issue of coupon bonds to the amount of $250,000—interest payable semi annually at 6 per cent per annum, and the directors were instructed not to issue the bonds or any part of them at less than par. The mortgage of the road to carry the preceding vote into effect was authorized by the stockholders January 19, 1859, and the deed was executed March 1 to J. H. Butler of Northampton, Ezra Lincoln of Boston and William Conner, Jr., of this city, as Trustees for those who should become holders of the bonds. The coupons on those bonds have always been paid promptly when due; they mature September 1 and are to be paid in full, and no new ones will be issued to take their place. Since 1861, besides paying the interest, which has amounted to $15,000 each year, the policy of the company has been to pay into a sinking fund $8000 annually, making a total payment on this account of $23,000 a year. The capital stock of the company is $2,100,000, and the dividends at the present time amount to 8 per cent. As 1 per cent on the stock would be $21,000, something more than this rate has been paid toward the interest and sinking fund each year. D. L. Harris was chosen President of the road in 1855, and about that time the stock was worth $35 a share; it now stands at $131. When the bonds were issued the road consisted of 50 miles of single track from Springfield to South Vernon. There is now a double track to Northampton, and it will be extended over the rest of the line as fast as the business will warrant. The road had then all iron rails, but for the last four years its policy has been to lay four miles of steel rails a year. The life of a steel rail has not yet been determined, but their greater economy is beyond all question. On the 92 miles of main track, 55½ miles have steel rails, or 62½ per cent of the whole. On the curve just out of the depot in this city iron rails had to be renewed once in two years and a half. Steel rails in the same location are still in use that have been down some 12 or 15 years. Altogether the company have every reason to be proud of their standing. It is believed that the bonds to be taken up are largely held in Boston.

Bituminous Compound of Mineral Wool.

On one of the fiscal Railways of Prussia experiments are now being made with the above compound for "waterproofing" viaducts.

This compound—made of Mineral Wool and Asphaltum—is applied on top of the brick work and then covered with a three-feet layer of gravel and stone, on which the rails and ties rest.

The ordinary asphaltum compositions heretofore used are apt to crack during frost—when subjected to the jar of Railway traffic—thereby exposing the masonry of the viaducts to the influences of the weather; whereas the Mineral Wool compound is said to be much more elastic and durable, as it neither melts as quick as asphaltum nor hardens to brittleness when exposed to frost.

The original Mineral Wool patents are only in force in this country, but several improvements—amongst which the one before mentioned—are patented here as well as in England and on the continent of Europe by Mr. A. D. Elbers of this city.

Northern Railway of Canada.

At the semi annual meeting of this company, held in Toronto, Canada, on the 24th ult., Mr. F. W. Cumberland, the Managing Director, read the semi annual report of the Canadian directors for the half year ending June 30, 1878, which stated the gross traffic receipts from all sources at $323,-217 24, against $338,109 56 in 1877, showing a decrease of $14,892 32, or at the rate of 4.40 per cent. The working expenses of the half year were $212,804 91, against $218,084 24 in 1877. The net revenue for the half year, including balance of $1,618 71, was $110,412 33, the payment of interest dividends accruing due, have all been punctually met. The expenditure during the half year, upon new and additional works, chargeable to capital, was $4,594 08, as in comparison with $4,741 47 in 1877. The lease of the North Simcoe Railway, dated January 14, 1878, is to go into operation only on the completion of the road, ready and fully equipped for traffic service. The works of that road are now in active progress, with every probability of completion in October next. And having regard to the limited rental, £72 per mile per annum, measures are perfected that will secure 42 miles more of the main line being laid with steel rails, thus completing a steel permanent way to Allanda'e without any increase in the normal expenditure of the year. The tendency of through grain rates is stated to be upward, and the prospect good for increased traffic.

Officials in Uniform.

There has sprung up within a recent period the belief that all public officials, whether employed by corporations, as railroads and steamers, or in municipal or government special service, fill the requirements of their respective offices best when distinguished by a uniform.

All nations have uniformed their armies and navies since a remote age; but only within a recent period have the police and firemen been so dressed, while not until within a still later date have the railroads uniformed their employees. To this list the Government has added the officials of the Post Office and Custom House; and the Telegraph Companies their messengers. Nicoll the Tailor, whose card appears elsewhere has extraordinary facilities for uniforming, either singly or by contract, in large quantities. We commend him to those, either corporations or individuals, whose wants demand prompt execution and moderate prices.

☞ The first annual meeting of the stockholders of the Boston, Hoosac Tunnel and Western Railway Company of New York was held at Saratoga on the 21st of August, when the following Board of Directors was elected: Hon. Fred. L. Ames, Elisha Atkins, John R. Brewer, F. Gordon Dexter, John B. Alley, George R. Blanchard, George I. Post. A. A. Gaddis, William Claflin, Coe F. Young, William L. Burt and John W. Candler. These directors held their first meeting on the 31st of August, and organized as follows: President, William L. Burt, of Boston; Vice President, John R. Brewer, of Boston; Treasurer, Estes Howe; Secretary, Theodore Voorhees.

☞ At a meeting of the stockholders of the Albany and Susquehanna Railroad Company, held at its office, in Albany on the 3d inst. the following directors were elected: Thomas Dickson, Charles Tracy, J. Pierpont Morgan, Robert H. Pruyn, Henry Smith, W. L. M. Phelps, Col. F. Young, Arnold B. Watson, James Roosevelt, John Westoner, Minard Harder, Robert M. Olyphant, Henry M. Olmstead. The board organized by the re election of Col. F. Young as President; Robert H. Pruyn, Vice President; W. L. M. Phelps, Secretary and Treasurer.

☞ The directors of the Brooklyn, Flatbush and Coney Island Railroad Company, elected on the 2d inst., are James Jourdan, John Lefferts, Benjamin G. Hitchings, Charles Storrs, Albert Daggett, Robinson Gill, Thomas Sullivan, James N. Smith, A. B. Baylis, Henry C. Murphy, Benjamin F. Tracy, Stephen H. Herriman and William Marshall. James N. Smith is President of the company.

☞ The Central Branch Union Pacific Railroad has been completed, and is now open for business to Beloit, 182 miles west of Atchison, Kansas. The company has also finished grading for the branch from Concordia to Scandia, a distance of 20 miles.

Portsmouth and Dover Railroad.

At the annual meeting of the stockholders of the Portsmouth and Dover Railroad Company, held at Portsmouth, N. H., on the 28th ult., the following board of directors was elected: Frank Jones, Daniel Marcy, William H. Sise and Albert R. Hatch of Portsmouth, and Oliver Wyatt, Andrew H. Young and Charles E. Sawyer of Dover. Frank Jones was elected President, William H. Hackett Clerk, and George E. Treadwell Treasurer. The President stated that all demands against the road had been settled with the exception of the Benn claim of Dover, and suggested that a committee be appointed from the directors to settle the same. He also desired that arrangements should be made to turn the road over to the Eastern in New Hampshire, which was referred to the directors, with power.

Statement of the Public Debt of the United States, September 1, 1878.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.
5 per cent. bonds, 1858	$260,000 00	$2,166 67

Sioux City and Pacific bonds, 1862-64	1,628,320 00	16,283 20
Totals	$64,623,512 00	$646,235 12

Interest paid by United States, $30,835,030 84; interest repaid by transportation of mails, &c., $10,241,740 00; balance of interest paid by United States, $20,593,290 86

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, August 31, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

Redemption of Five-twenty Bonds.

The Secretary of the Treasury issued on the 4th inst., the seventieth call for the redemption of 5-20 bonds of 1865—consols of 1865. The call is for $5,000,000, of which $2,000,000 are coupon and $3,000,000 registered bonds. The principal and interest will be paid at the Treasury on and after the 4th day of December next, and the interest will cease on that day. The following are the descriptions of the bonds:

Coupon bonds, dated July 1, 1865, namely: $50, Nos. 74,001 to 75,003, both inclusive; $100, Nos. 136,001 to 138,000, both inclusive; $500, Nos. 95,001 to 97,000, both inclusive; $1,000, Nos. 184,001 to 189,000, both inclusive.

Registered bonds, redeemable at the pleasure of the United States after the first day of July, 1870, as follows: $50, Nos. 2,451 to 2,485, both inclusive; $100, Nos. 19,101, to 19,120 both inclusive; $500, Nos. 11,201 to 11,226, both inclusive; $1,000, Nos. 38,001 to 38,400, both inclusive; $5,000, Nos. 11,601 to 12,000 both inclusive; $10,000, Nos. 22,551 to 22,880, both inclusive.

☞ The Reading (Penn.) Eagle says the project of building the Oley Valley Narrow Gauge Railroad from Monocacy to Friedensburg is again under discussion.

American Railroad Journal.

Saturday, September 7, 1878.

Financial and Commercial Affairs.

In our financial columns we have referred heretofore to the decision of Mr. Secretary Schurz in the well-known case of Dudymott, pre emptor, against the Kansas Pacific Railroad. This decision, involving the title to lands worth $20,000,000 or more at present valuation, was adverse to the railroad. The Kansas Pacific Railroad Company thereupon applied to the Secretary of the Interior for a suspension of action and a reconsideration of the decision. Other roads were equally interested in the decision, and it was understood that this case of Dudymott would be made a test one, and upon it rests the right of the Government to interfere in the matter of pre-emption of granted lands.

On the 3d instant, the Secretary gave a second decision in which, after reviewing the law making the land grant, the conditions and obligations attendant upon the grant, the effect of the mortgage upon the road's title, the limitation and meaning of the term "disposed of"—upon which term the road lays peculiar stress—with other points in detail bearing upon the question, the first decision is confirmed.

The Secretary now gives almost precisely the same arguments in support of his decision that the JOURNAL gave at first in discussing the legality of the decision. We then said that the execution of a mortgage, or as in this case a deed of trust, was not in effect either a sale or a disposal of the land. The title remained still in the railroad, whose officers were making sales and executing deeds for the same when sold. We cannot

arrive at a different conclusion. The amount at stake is so large that the railroads will probably still contest the decisions made and take the case to the United States Supreme Court.

We now repeat that the various railroads will not themselves suffer seriously by this decision, if confirmed by the Supreme Court. The bondholders who accepted a deed of trust upon the lands in question may find their security not as ample as they expected.

The amount of silver coined at the mints since the Silver bill went into effect is over $13,000,000. The amount of this new silver money put in circulation up to August 31st was only $2,700,000. On the 19th July the Treasury sent notices to the depository banks that silver dollars would be furnished on demand for paper money. No demands were made for the dollars. Everybody preferred paper for the excellent reasons that it is intrinsically much nearer in value to gold than the silver dollar is; also because the paper money is most convenient.

Now, on the 3d instant, the Treasury offers to pay the express charges to any bank or banking institution on silver in sums of even thousands if such bank will part with its paper for silver dollars. We respectfully suggest to the Secretary of the Treasury that a bonus of ten per cent is the next best thing to offer after paying express charges.

Receipts at the U. S. Treasury for the month of August were for customs, $13,679,297 60; against $13,823,729 87 in 1877. From Internal revenue, $8,855,650; against $9,710,944 98 in 1877.

The official statement of United States currency outstanding Aug. 31st was: Old demand notes, $62,240; Legal tender notes, $346,681,016; one-year notes of 1863, $14,850; two-year coupon notes of 1863, $23,800; compound interest notes, $272,940; fractional currency, all issues, $16,351,728 10—total, $363,457,869 10.

The public debt statement for August, given elsewhere, shows a decrease in the debt for the month of $6,475,504, and the following balances in the U. S. Treasury: Currency, $2,122,171 97; special fund for the redemption of fractional currency, $10,000,000; special deposit of legal tenders for redemption of certificates of deposit, $49,460,000; coin, $238,420,709 57, including coin and silver certificates, $44,017,850; outstanding legal tenders, $346,681,016. The decrease in the public debt since June 30th is $6,681,811.

The receipts and disbursements at the office of the Assistant Treasurer of the United States at New York for the month of August, 1878, were: Receipts from all sources $54,914,249 82. Payments for various accounts $47,237,054 57. Balance, $180,569,815 50.

Receipts for customs at the port of New York for the month of August were $10,396,446 18, against $10,307,296 86 last year. An increase in 1878 of $86,149 32. Total value of imports, exclusive of specie, at the port of New York from Jan. 1 to Aug. 31, $192,915,748.

The business at the United States Assay Office at New York for the month ending August 31, 1878: Deposits of gold, $1,017,000 deposits of silver, $721,000. Total deposits, $1,788,000. Gold bars stamped $778,528 42; silver bars stamped, $1,889,544 91; transmitted to Mint at Philadelphia for coinage, gold, $1,351,423 06.

The Money market at this time offered no change for remark since our last. Money is in excess of any legitimate demand. Borrowers with gilt-edged securities can supply their wants at low rates of interest. Call loans are made at 1⅓@2 per cent. Gold has remained unchanged throughout the week, dull at 100⅓. Silver is reported from London dull at 52⅛d. per ounce. The Bank of England has been gaining in coin, whilst the weekly statement of the Bank of Germany shows a loss of 15,000,000 marks, specie.

The Stock market has shown more activity during the last week, the sales having been Saturday, 120,200 shares; Monday, 130,100; Tuesday, 114,500, and Wednesday, 118,400.

There is little of the speculative feeling so prominent in July and the early part of August. Investment stocks are more sought for since the speculative flurry "of the fancies" has subsided. The subscriptions to the new four per cents have been well maintained until Tuesday, the 3d instant, when the sales reported were only $144,000. We now quote Government bonds of all issues as follows:

United States 6s, 1881, registered, 108⅛@108⅜; do. coupon, 108⅛@108⅜; 5-20s, 1865, new, registered, 102⅛@102¾; do. coupon, 102⅛@102¾; do. 1867, registered, 105⅜@105½; do. coupon, 105⅜@105½; do. 1868, registered, 107⅛@107⅜; do. coupon, 107¼@107¾; ten-forties, registered, 106¼@106½; do. coupon, 106⅜@106½; 5 per cents, 1881, registered, 106½@106⅝; do. coupon, 106⅛@106⅜; 4½ per cents, 1891, registered, 103¾@103⅞; do. coupon, 103¾@103⅞; 4 per cents, 1907, reg., 100⅝@100⅞; do. coupon, 100⅝@100⅞; sixes, currency, 120⅛@120⅜.

From Boston the month is reported opening on a dull money market. Borrowers have no difficulty in making good terms with banks where they are known. Banks discount strong commercial names at four months date for 4 per cent; while occasional discounts are made at 3½. Short dates would go even lower but no such paper is offered.

Philadelphia advices report a steady money market. Call loans are quoted at 3@4 per cent. Commercial paper is in good demand at 4½@5 per cent for short dates. Four months date and longer time at 5@5½ per cent. Loans on government securities are readily made at 3@4 per cent; on other securities at about 6 per cent. At the Stock Board sales of Pennsylvania Railroad shares were made at 32⅝@32¾, the market showing more firmness at the close. Reading quoted at 16⅞@17.

Baltimore advices indicate an improved demand for money to move the crops. The volume of business is also increasing. Money is still very abundant with low rates of discount prevailing. Call loans are quoted at 4@5 per cent; with mercantile paper at 5@6 per cent. Sales of Baltimore and Ohio scrip were reported at 90—an advance. Stock market dull and transactions nominal.

Foreign exchange at the close was in good supply and prices were slightly lower for actual business. We now quote 60 day and sight bills at 4 88 for the former, and 4 87½ for the latter.

The exports of domestic produce from the port of New York for the week amounted to $7,625,433, against $7,261,045 for the corresponding week last year. The total exports of produce since January 1, this year, were $230,948,918, against $185,785,057 in 1877 for the same time.

Metals continue in small demand and prices are not quotably different from our last report.

Domestic Produce has ruled firm under an active export demand, with prices somewhat irregular. A noticeable feature of the week was the purchase of some 800,000 bushels wheat for French account.

Cotton has been irregular. The wide difference between spots and near futures is being closed up. We now quote middling uplands at 12⅛ cents. Futures at the close were: September, 11.46@11.58; October, 11.24@11.27; November, 11.05@11.08; December 11.01.

Ocean freights active and irregular. Engagements to Liverpool, grain by steam, at 6⅛d. per 60lbs. To London, grain by steam, 7⅛d. per 60lbs. To Havre, grain by steam, 19@19½c.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Nashville, Chattanooga and St. Louis 1st mort., 100½; Rome, Watertown and Ogdensburg 7s, consol., 82; Kansas Pacific 7s, Denver Div., M. & N., 1899, with coup. certif., 69; Lehigh and Wilkesbarre 7s, consol., ass., 47; Missouri, Kansas and Texas 7s, consol. ass., 89½; Louisiana and Missouri River 1st mort., 99½; Kansas Pacific 6s, J. & D., 1896, with coupon certif., 97¼; Clev., Col., Cin. and Ind. 7s, consol., 85; Buffalo, New York and Erie 1st mort., 1916, 107½; Toledo and Wabash 2d mort., 90; East Tenn., Virginia and Georgia 1st mort., 100½; South Pacific 1st mort., 85; Cedar Falls and Minnesota 1st mort., 89; Ind., Bloom. and Western 1st mort., 23.; Louisville and Nashville 2d mort., 87½; St. Louis and San Francisco R. Maryland and Delaware Canal.

The engineering party to survey routes for the proposed Maryland and Delaware canal left Baltimore by steamer on the 27th ult. They will begin the survey at a point on the Choptank river, near Cambridge. The party will be divided into two corps, and two lines of survey will be begun at once. Major Hutton, who is superintendent of the survey, will pay them occasional visits to properly direct the work. The corps of engineers comprises Capt. W. H. Smith, of Easton, Mr. Tharp, of Talbot county, and Messrs. Nicholas Goldsborough, J. N. Sudler and Thos. I. George of Baltimore. About fifteen hands complete the party. The survey will take about three months for completion.

☞ Articles of incorporation were filed at Springfield, Ills., on the 30th ult. of the Bloomington and Northwestern Railroad Co. The corporators are D. B. Stuart, E. Merritt, H. I. Terpening, J. T. Turner, and E. H. Ward, all of Potosi, McLean county. The company proposes to build a railroad from Strawn, Livingston county, to Clinton, and thence to Bloomington. The principal office is to be at Chicago. The capital is $400,000.

The Williamstown Railroad.

Some time ago a railroad to connect Atco, Williamstown and Glassboro', N. J., was started. It was to have been 16 miles in length, but only 11 miles, from Atco to Williamstown, were built, the balance being only graded. The reason of this was want of funds, but so much of the road as was finished was operated. It has earned and is earning nothing, and, the road being out of repair, Mr. Charles D. Freemen, President of the Camden and Atlantic Railroad Company, offered to buy the road for $20,000. A meeting of the bondholders was held to consider the proposition, and the affairs of the road, &c., were discussed. An arrangement was arrived at with Mr. Freeman of the following character. He to pay eight per cent in cash for the bonds, retaining one-fifth of one per cent to pay the expenses of foreclosing the mortgage upon the road when the majority of the bonds of the company should be delivered to him, and in case the getting of legal possession of the road should not cost him more than $20,000, then he would return to the bondholders the one-fifth of one per cent retained by him. The bonded indebtedness of the road is $250,000.

☞ The West Chester (Penn.) News says that "parties are now in New York endeavoring to raise funds for building the new Narrow Gauge Railroad from this place to Philadelphia. The prospect for raising the necessary amount is quite flattering. The new road will go by way of Newtown Square and run over that portion of the road graded some four or five years ago by another company."

☞ The foreclosure sale of the Montclair and Greenwood Lake Railway Company, which was to have taken place at Taylor's Hotel, Jersey City, on the 31st ult., was postponed. According to the statutes of the State of New Jersey the Master in Chancery has the power to postpone it from week to week, and it is asserted that the sale will not take place until the 14th inst.

☞ The Rockford, Milledgeville and Western Railroad, to run from Rockford, in Illinois, to some point on the Mississippi river, in Carroll or Whitesides county, Illinois, have filed articles of incorporation in the Secretary of State's office at Springfield. The capital of the company is $300,000.

☞ A London dispatch says that Commander Cameron will start for Cyprus soon. Thence he will cross to Asia Minor to survey a route for the construction of a railway to the Persian Gulf. His route will lie through Aias, Marash, Aintab, Diarbekir, Mardin, Mosul, Bagdad and Bassorah. The survey will probably occupy ten months.

☞ Work on the proposed railroad from Catasauqua to Chapmansville will probably begin early in the fall. The route has been surveyed and the right of way for 5½ of the 9½ miles of the road has been secured.

☞ It is proposed to extend the Sunbury and Hazleton road to Wilkesbarre, Pa. The distance is but 36 miles.

☞ The Detroit and Milwaukee Railway was sold on the 4th inst. to the Great Western Railway Company of Canada, for $8,500,000.

Canadian Railways.

T. N. Molesworth, Esq., Engineer of Public Works of the Province of Ontario, has favored us with a copy of a very valuable table entitled "Table of mileage of all railways in the Province of Ontario completed or under construction on the 31st of August, 1878." This shows a total of railway in operation measuring 3,112½ miles, of which 1,464 miles were completed prior to the Confederation (July, 1867,) and 1,648½ miles since that event. At date (Aug. 31, 1878,) there were under construction 340½ miles. The statistical value of such a compilation prompts us to transfer it to the columns of the JOURNAL without abbreviation, and as follows:

Name of Railway.	Terminal Points.	Open July, '67. Miles.	Opened since '67. Miles.	Now in progress. Miles.
Grand Trunk—				
Main Line	E. Province Line to Point Edward	457	....	....

North Simcoe	Barrie to Penetanguishene	....	....	33
Total length of all lines		1,464	1,648½	340½

☞ The Waterloo and Acton (Canada) Railway is being actively pushed on. The line is divided into sub sections of from one to three miles, and several hundred men are employed upon it. Trains are expected to be running in November next, and upon its completion the $50,000 bonus from Shefford County will become due. The road between Sutton Junction and Waterloo is nearly all ballasted and ready for cars. It is stated that work will be begun on the Magog and Sherbrooke Railway next winter.

☞ The European and North American Railway, for extension from St. John westward, was sold at St. John, N. B., on the 31st ult., under foreclosure of mortgage. It was bid in by the St. John and Maine Railway Company, which is formed from the bondholders, who are mostly located in London, for $10,000. The road is 92 miles long, and is situated between St. John, N. B., and Vanceboro, Me., and will in future be operated by and under the name of the company that purchased.

Portsmouth, Gt. Falls and Conway R. R.

At a meeting of the stockholders of this company held at Portsmouth, N. H., on the 28th ult., Wm. P. Phillips of Salem presented the following votes which, on motion of Albert Hatch of Portsmouth, were passed, approved and confirmed by a stock vote, 6,870 shares being thrown:

Voted, That this corporation accept the act of the General Court of the State, approved on the 9th day of August, entitled "An act in addition to the acts to incorporate the Portsmouth, Great Falls and Conway Railroad."

Voted, That the directors of this corporation, in liquidation and payment of all its existing indebtedness, be and are hereby authorized to issue bonds of this corporation to the amount of $1,000,000, bearing interest at the rate of 4½ per cent per annum, payable semi-annually, and to secure the payment of the same by mortgage of franchise and all property of the corporation, said bonds to become payable in 60 years, dating from the first day of June, 1877, and bearing interest from that time, and to be exchanged for the $1,000,000 of bonds of this corporation now outstanding, and to be in full payment of said bonds and of all other debts due by this corporation to any holder of said bonds.

Voted, That the directors of this corporation be and are hereby authorized to unite with the Eastern Railroad in New Hampshire and the Eastern Railroad Company in cancelling the existing lease and contracts existing between them, or either of them and this corporation, and to make a new lease of the railroad franchise and property of this corporation to the Eastern Railroad Company for a rent equal in amount to the interest on the bonds authorized to be issued under a vote of this corporation, adopted this day, and to be applied to the payment of said interest as the same may fall due; provided that said lease shall contain the further condition that the stockholders of this corporation shall receive also as rent from the Eastern Railroad Company such dividends per share upon their stock as the stockholders of the Eastern Railroad may hereafter receive upon their own stock, and at the same time.

Voted, That all powers to make leases, deeds and other instruments and papers necessary and proper to carry out the foregoing votes and the act of the Legislature this day accepted, according to the true scope and intention thereof, be and are hereby conferred upon the directors of this corporation.

☞ At a meeting of the directors of the New York and New England Railroad Company in Boston on the 27th ult., S. A. Carleton, President of the National Security Bank, and John Goldthwaite, were elected directors in place of Thomas Dickson, of New York, and Edward W. Kinsley, resigned, the latter having been appointed Railroad Commissioner.

☞ A large force of men are at work constructing an iron bridge over the Neponset river at Readville for the New York and New England Railroad. Three tracks will pass over it, the increased accommodations being necessary on account of the erection of the new locomotive works at that point.

☞ There is a probability that the Bradford and Mount Pleasant Railroad will be extended to Latrobe, on the line of the Pennsylvania Railroad. Favorable reports have been made by engineers who have surveyed the different routes.

☞ The surveying corps of the Miami Valley (Ohio) Railroad have finished the survey and location of the road to Harrisburg, and will push in the direction of Columbus as rapidly as possible.

Ocean Freights.

We are to-day stronger on land than ever before in our national history. And, strange to say, we are one of the weakest nations on the sea. So far as maintaining an immense navy of war vessels is concerned it is best perhaps that we do not attempt to compete with our neighbors in that direction. But when we are producing breadstuffs enough to feed another nation equal in numbers to ourselves it is a singular anomaly that we should own scarcely a ship to carry this vast tonnage of food across the sea for consumption.

The American farmer has now reached a position where he is able by the aid of ingenious machinery to raise and harvest great crops at the lowest cost. Inland carriage to the seaboard is easy, rapid and cheap. But at the point of exportation American enterprise and skill end. The whole vast volume of ocean carrying traffic is turned over to European vessels as if we had no right or ability to do more than furnish freights for them.

Mr. John Roach, the well-known builder of iron vessels, appeared before the Congressional Committee now sitting in this city and gave his experience as a ship builder, as well as some facts concerning the depressed state of his branch of industry; but he did not offer any practical remedy.

The situation is easy to comprehend—we are earning a very large sum from agricultural productions. Then having earned this profit we give back a large share of it because we can neither build nor buy needed ships.

Are we like Samson shorn of our locks and so compelled to sit helpless until they grow again? But ships only grow from the strong arm of the builder. If we cannot now build as cheaply as our neighbors on the Clyde why not buy from them and strive earnestly until we overtake them? Why let them both build the ships and carry the freights? The profit from carrying is infinitely greater than that of building the ship. The builder launches his vessel, puts a single profit in his pocket and goes on to prepare materials for another. The ship itself, the work of his hands, if staunch and fortunate, serves to enrich father, son, and possibly the grandson.

For half a generation we have suffered our ocean freights to be carried almost wholly by others. Foreign vessels will earn this current year more than eighty million dollars in carrying our products to Europe. Is this to last always? If it is let us like business men make a yearly contract, invite proposals and let out our ocean freights to the lowest bidder. Wild as that may seem it is not more foolish than our present mode.

Noiseless Escape of Steam.

Our readers will be glad to learn that the nuisance of the steam blowing from safety valves of locomotives may now be stopped by application of a new device which conducts the steam through a two-inch pipe from the safety valve to the tender, silently and invisibly, where it is used to heat the feed water. That this has not been done before is not surprising from the difficult mechanical conditions that have had to be overcome. Here is an inconceivable force of steam, sufficient to rend the most massive wrought iron if uncontrolled, finding vent through its natural safety outlet. It strikes the air with a velocity of sixteen hundred feet a second, and its explosion is attended with a noise proportionate to that force. To give the relief required noiselessly was a mechanical problem, and that it has at last been solved will be welcome intelligence to many railroads as well as to the public. This invention is in the hands of a company who recently procured a charter from the Legislature of Connecticut, but whose place of business is in Boston.—*Hartford Times.*

The Coal Trade.

The total tonnage of anthracite from all the regions for the week ending August 24th, as reported by the several carrying companies, amounted to 362,891 tons, against 281,904 tons in corresponding week last year, an increase of 80,487 tons. The total amount of anthracite mined for the coal year is 10,225,611 tons, against 12,356,920 tons for same period last year, a decrease of 2,131,309 tons. The quantity of bituminous coal sent to market for the week amounted to 65,250 tons, against 64,959 tons in corresponding week last year, an increase of 291 tons. The total amount of bituminous mined for the year is 2,048,801 tons, against 1,994,073 tons for corresponding period last year, an increase of 54,728 tons. The total tonnage of all kinds of coal for the week is 427,641 tons, against 346,346 tons in corresponding week last year, an increase of 81,295 tons, and the total tonnage for the coal year is 12,274,412 tons, against 14,350,993 tons to same date last year, a decrease of 2,076,581 tons. The product of the mines of the Cumberland coal region for the week ending August 24th was 44,469 tons, and for the year to that date 945,929 tons, an increase of 86,171 tons as compared with the corresponding period of last year. The shipments to the Baltimore and Ohio Railroad were, for the week, 19,715 tons; for the year, 535,142 tons, an increase of 28,394 tons as compared with 1877. The shipments to the Chesapeake and Ohio Canal were, for the week, 20,066 tons; for the year, 339,423 tons, an increase of 69,936 tons as compared with 1877. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week in August was 94,548 tons, of which 74,441 tons were coal, and 20,107 tons coke. The total carried for the year is 2,966,335 tons, of which 2,309,134 tons were coal and 657,340 tons coke. These figures embrace all the coal carried over the road, east and west. The coal tonnage of the Reading Railroad for the week ending on the 31st ultimo was 157,270 tons, of which 60,000 went to Port Richmond. The shipments from Port Richmond during the week were 70,000 tons. The amount of stock on hand at Perth Amboy on the 24th of August was 81,560 tons. Receipts during the week 8440 tons, giving a total to the 31st of August of 90,000 tons. The shipments during the week were 18,398 tons, leaving of stock on hand 71,602 tons. The stock on hand August 31, 1878, was 55,767 tons.—*Phila. Ledger, Sept. 2.*

A Narrow Gauge Mountain Railroad.

If any man thinks it is not wrong to build broad gauge railroads, which cost from $40,000 upward per mile through a sparsely settled country, he ought to go to Tahoe and look at the lumber railroad there. It is nine and a half miles long, three-foot gauge, and has an average grade of one hundred and thirty feet per mile. The cars carry each an average load of fourteen tons, and twenty five or thirty per centum more of the power used is utilized than on the most favorable portion of the mountain sections of the Central Pacific Railroad, while the wear of rolling stock and track is fifty per centum less than on the broad gauge road. Despite the grade and the fact that there are hardly twenty rods of straight track anywhere on the line of the road, the cars dash down at the rate of from twenty to twenty-five miles an hour, and so far there has never been an accident worth mentioning on the road, though this is the third or fourth season that it has been in full operation. It zigzags up the mountain, one track above the other, after the plan first adopted by the engineers of Harry Meiggs, in Peru, and the track crosses back on itself, so that in going east you catch the cinders which come from the smoke-stack of the locomotive as it was going west the moment before.—*Virginia City (Nev.) Enterprise.*

Duty on Locomotive Tires.

The following letter from the Acting Secretary of the Treasury to the Collector of Customs at New York was issued from the Department at Washington on the 2d inst.:

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
WASHINGTON, D. C., Aug. 29, 1878.

Collector of Customs, New York:

SIR: By the decision of the department, dated March 1, 1873, (S. S., 1,439,) steel locomotive tires were held to be dutiable at the rate of 45 per cent ad valorem (less 10 per cent) under the provision in section 3 of the act of June 30, 1864, for all manufactures of steel, on the ground that they were not provided for in the clause of the same section specially imposing duties at the rate of 3 cents per pound on locomotive tires, such clause being found among the clauses relating exclusively to iron and manufactures thereof. The question involved was subsequently brought before the United States Circuit Court at New York, in the case of Thomas Prosser against Arthur, and was decided adversely to the position taken by the department, the court holding that the provision above cited enumerating tires specifically, embraced all locomotive tires, whether composed of steel or iron.

The department declined, at the time this decision was rendered, to acquiesce therein, but upon recently reconsidering the question, decided to submit to the Attorney General for his opinion whether the decision of the court should be adopted. That officer states, under date of the 8th inst., that, in view of the opinion of the court of the fact that schedule E of the Revised Statutes observes no order of arrangement as regards iron or steel, and in the light of other decisions recently made, this department would be warranted in accepting the decision of the court as the proper rule of action. You will therefore levy duties at the rate of 3 cents per pound on all locomotive tires, or parts thereof, hereafter imported or withdrawn from warehouse for consumption, whether composed of steel or of iron.

Very respectfully,

JOHN B. HAWLEY, Acting Secretary.

Trial Trip of the First Locomotive.

The first locomotive trial trip in the United States, and, it is claimed, in the world, was made at Honesdale, Penn., August 8, 1828. The track was built by the Delaware and Hudson Canal Company to connect their mines with their canal. The engine was the "Stourbridge Lion," and its drawings and construction were superintended by its driver, Horatio Allen, at Stourbridge, England. Mr. Allen is still living at South Orange, New Jersey, seventy seven years of age, and he says that he made the trial trip on the Stourbridge Lion alone, as it was generally feared that it would leave the hemlock track at the curves, or break down the trestlework across the Lackawaxen river. It did neither. It was more than a year after this, October 6, 1829, that Stephenson's Rocket made its trial trip in England. Col. J. A. Clark, now an employe in the Treasury Department at Washington, has restored the Stourbridge Lion. It is a strange monster, with a boiler 16½ feet long, on four oaken wheels, with iron tires and all drivers. The cylinders are upright at the back and each side of the furnace, with connecting rods to the crank pins in the wheels.

☞ It is stated that some American capitalists are treating for the purchase of the Trujillo railways of Peru with the design of developing the great coal deposits in the vicinity of Trujillo.

Railroad Across the Island of Newfoundland.

The Government of Newfoundland has addressed a circular to a number of prominent American contractors inviting their attention to a movement which is on foot looking to the construction of a railroad across the island from St. Johns to St. George's Bay, or some other convenient point on the West coast. A preliminary survey has proven the practicability of the scheme and the Legislative Assembly of Newfoundland has resolved to vote an annual subsidy of $120,000 to any individual or company which will take the matter in hand, besides granting liberal concessions of crown lands for the purpose. The completion of the proposed line would have the effect of opening up enormous deposits of copper, iron, coal, nickel, lead and other minerals, which are now almost inaccessible, while it would also cut through the great pine and spruce forests of the interior, which are also at present utterly useless. The construction of the railroad, would shorten the ocean voyage by one thousand miles.

Can I Obtain a Patent?

This is the first inquiry that naturally occurs to every author or discoverer of a new idea or improvement. The quickest and best way to obtain a satisfactory answer, without expense, is to write to us describing the invention, with a small sketch. All we need is to get the *idea*. Do not use pale ink. Be brief. Send stamps for postage. We will immediately answer and inform you whether or not your improvement is probably patentable; and if so, give you the necessary instructions for further procedure. Our long experience enables us to decide quickly. For this advice we make *no charge*. All persons who desire to consult us in regard to obtaining patents are cordially invited to do so. We shall be happy to see them in person at our office, or to advise them by letter. In all cases, they may expect from us a careful consideration of their plans, an honest opinion, and a prompt reply. TOTAL COST OF U. S. PATENT, ONLY $55. *N. B.—These are by far the* SAFEST, BEST *and* CHEAPEST *terms offered by any responsible Patent attorney in the United States.* For all further information, please address: HENRY GERNER & SON, 49 Chambers st., P. O. Box 4,544, New York.

FINANCIAL.

ALEX. FROTHINGHAM & CO., BANKERS AND Brokers, No. 12 Wall st., make for customers desirable investments of large or small amounts in stocks of a legitimate character, which frequently pay from five to twenty times the amount invested every thirty days.

Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent 1y23

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh, Steel or Iron Rails,** and of any required weight and pattern.

PERKINS, LIVINGSTON, POST & Co.,
23 Nassau Street,
NEW YORK.

THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

Railroad officers desiring further information will please address

Anticipating Redemption.

This nation has been misbehaving like a bad child. One year ago there was a constant cry for silver. Silver was the only toy that would satisfy the child. Congress like an indulgent mother proceeded to gratify the child by furnishing silver in abundance. But no sooner was the child given all it asked for than it suddenly discovered this silver toy was not what it wanted after all; it didn't want silver now but it did want dollars. Of course it must be gratified again.

It is likely at the next session of Congress that we shall see the curious sight of the same gentlemen who so earnestly championed the silver bill as earnestly asking for its repeal. The reasons, of course, will be that the bill did not meet the wants of the country; that and the attendant changes brought about by the resumption of specie payments, with a trifle of politics added to give a brisker flavor; then who will dare to laugh?

Legislative wisdom is a good thing in its place; and the appearance of wisdom seems to be the next best thing. The gentlemen who gave us the silver bill cannot now claim to have done a wise act, but after its repeal at their suggestion they can point to the final result as a mild financial triumph.

We noticed only last week in our financial columns the liberal offer of the Treasury to pay express charges on silver dollars in sums of one thousand to ten thousand dollars for the benefit of all banks or banking institutions which might desire to see new silver money. The liberality of the Treasury was unusual and one would expect to see and hear new dollars everywhere. Nothing of the kind has taken place, no new dollars are wanted.

And now comes a more singular act on the part of the Treasury. The Secretary in a circular to Sub-Treasurers permits them to *exchange* silver for legal tender notes; in fact to begin practical redemption of greenbacks on and after the 16th instant.

No harm will come from this haste in redemption, practically. Even the Secretary himself can scarcely expect any good from it. He felt it his duty evidently to leave no stone unturned to put the new silver dollars in circulation; hence he is willing to *exchange* a few of them for paper just to oblige the public. The liberality of the Treasury in the matter of the new silver dollars deserves praise whether we want the dollars or not. If people want any of the new silver dollars they ought now to come forward and take them. If they don't want them—but they said before the passage of the Silver bill that they wanted these dollars and could not be happy without them. The Secretary of the Treasury will be criticised for this last effort to put the new silver coinage in circulation. At first sight it does appear to be a stretch of the law concerning redemption of legal tender notes. If, however, as we believe, no considerable sum of silver can be made to circulate while the dollar remains at its present weight and value, these curious efforts to make it circulate will show plainly its inability to do what was expected of it and a speedy remedy will come.

To-day the paper dollar is worth so much more than the silver dollar that we prefer paper. If the difference at this time between legal tenders and gold is less than one-half of one per cent, while the new silver dollar cannot claim a greater commercial value for all purposes than 88 to 89 cents as compared with gold, it is natural that we should decline to exchange for silver with or without express charges paid on it.

Happily for the nation, and happily too for the friends of the new dollar, the balance of trade is so strongly in our favor that no probable demand for the exportation of coin can arise soon. If we were called upon to pay a foreign balance as in other years the merits of the new dollar or any other coin not equivalent to the gold standard would be speedily settled. The gold, coin or bullion, would go abroad while the depreciated coin no matter of what metal would stay at home at a discount. And it is strange that men should expect a depreciated dollar to pass current even backed by the law. Every one feels that he has a right to demand a fair equivalent for his own commodity. It is this feeling more than anything else that prevents the new dollar from passing as an evidence of value. What we want is full value. Give us a dollar's worth of silver and we will accept it as will all the commercial world to whom we may desire to pay it.

Connecticut and Passumpsic Rivers R. R.

The annual meeting of the Connecticut and Passumpsic Rivers Railroad Company was held at Newport, Vt., on the 4th inst. The President, Emmons Raymond, called the meeting to order and presented the report of the directors for the past year. He said "the road had had a hard year financially, but on the whole it is gratifying to know that in the midst of so many obstacles and difficulties we have held our own, and the road is in better condition to-day than one year ago. We have had to reduce expenses and economize in every way possible and practicable, and yet the road is in a most excellent condition. The net earnings are $21,720 less than last year." The following directors were elected: Emmons Raymond, T. P. Redfield, Gardner C. Brown, Amos Barnes, Warren K. Blodgett, Alden Speare, Lucius Robinson, Stephen Foster and F. A. Peters. At a subsequent meeting of the directors

Emmons Raymond was elected President; T. P. Redfield, Vice President; E. Cleveland, Secretary; N. P. Lovering, Treasurer.

The Amazon and American Trade.

The survey of the River Amazon and its tributaries, which is now being prosecuted by Commander Selfridge—so well known through his surveys for a ship canal across the Isthmus of Tehuantepec—has been undertaken at the right time, and cannot fail to prove of advantage to us in our commercial intercourse with Brazil. The construction of the Madeira and Mamore railroad, for which Brazil has given the contract to the Messrs. Collins, of Philadelphia, will be a further aid to the extension of our trade not only with Brazil, but with Bolivia also. Heretofore the navigation of the upper waters of the Amazon, and especially of its chief tributaries, has been rendered difficult from the want of trustworthy charts, as well as of proper buoys and lighthouses, while adventurous traders were further harassed and put under restrictions by the shipping laws of Brazil. These things, it is hoped and believed, will now be remedied, and that by the adoption of a more enlightened policy the great navigable waters of that empire will be thrown open to American commerce under conditions that will give us a fair proportion of that trade which is now largely monopolized by European merchants.

Surplus on year's business.....	$50,088 88	

Compared with the previous year, the gross earnings of 1878 show an increase of $287,857 05, with an increase in expenses of $95,998 42, making the increase in net earnings $191,863 68. The gross earnings per mile of road operated were $5,250 70, the working expenses $3,262 25, and the net earnings $1,988 45; in 1877, the earnings per mile of road operated were $4,926 95, the expenses $3,260 87, and the net earnings $1,666 08—showing an increase in earnings of $323 85, an increase in expenses of $1 38, and an increase in net earnings of $322 37. The percentage of operating expenses for the year was 62.18; last year it was 66.18—showing a decrease of 4.05 per cent.

The gross earnings for the year of the Trans continental Division were $482,201 02, which is $3,236 25 per mile of road operated. Last year they were $315,920 66, or $2,375 34 per mile, showing an aggregate gain for the year of $166,280 36, or $860 91 per mile of road operated.

On the Jefferson and Southern Divisions, the gross earnings were $1,849,103 33, or $6,268 16 per mile of road operated, against $1,727,432 64 or $6,131 46 per mile the previous year, an aggregate gain of $121,676 69 for the year, or $136 73 per mile of road operated.

The number of miles of road (main track) operated, was the same at the commencement as at the close of the year, and is described as follows:

	Miles.
From Shreveport to Fort Worth.....	219.69
From Texarkana to Sherman	155.12
From Marshall to Texarkana Junction	69.05
Total length of main track.....	443.86
The average number of miles operated the previous year was.....	414.75

Which shows an increase over last year of 29.11 miles of road, or a fraction over 7 per cent.

At the commencement of the year the company had 36.94 miles of side tracks, and at the close of the year it had 39.44 miles, showing that 2.50 miles of siding was added during the year. The total length of main track and sidings, May 31st, 1878, was 483.30 miles.

The company have 49 locomotives, 14 first class and 14 second-class passenger, 1 directors', 8 baggage combination, 11 baggage, mail and express, 487 box, 164 stock, 31 caboose, 395 flat, 1 wrecking, 2 pile driving and 6 boarding cars.

Miles run by passenger trains, 412,849; freight trains, 784,906; work trains, 179,947; switch trains, 169,743—total, 1,547,435. Miles run to cord of wood, 26 35; to pint of oil, 11.27. Cost of working locomotives, including repairs, fuel, oil and waste, etc., 0.2453 cent per mile run.

Coupon passengers carried, 53,885; do. carried one mile, 7,449,718. Local passengers carried, 191,227; do. carried one mile, 7,555,084. Total passengers carried, 245,112; do. carried one mile, 15,004,800. Average miles each passenger was carried: coupon, 138.24; local, 39.51—average distance, 61.21. This shows an increase, compared with the previous year, of 25,009 in the number of passengers carried; 1,118,301 in the number carried one mile; and a decrease of 1.88 miles in the average distance traveled by each passenger.

Local freight in tons, 297,955; number of tons carried one mile, 38,543,659. Through freight in tons, 91,012; number of tons carried one mile, 12,478,775. Total freight in tons, 388,967; total tons carried one mile, 51,022,434. Average haul of local freight per ton, 129.36 miles; do. through freight per ton 137.11 miles—average haul per ton, 131.17 miles. This shows an increase in tons of freight carried of 33,178; in tons carried one mile of 7,652,553; and in average distance each ton was hauled of 10.67 miles. The cotton shipments aggregate 214,438 bales, against 230,133 bales in 1877, showing a decrease of 15,695 bales. The report says:

This decrease in number of bales hauled is more apparent than real, and is accounted for in the shipments from Shreveport, from which point there was forwarded last year, by rail, 9 245 bales. During the previous year, because of the low stage of water in Red River, there was shipped by rail from Shreveport 42,972 bales of cotton, showing a deficit of 33,727 bales in the rail shipments from that station. This forced shipment by rail was made at very low rates, and was, most of it, a second handling of cotton that had been hauled into Shreveport over your road.

The number of original bales hauled during the year, undoubtedly exceeded that of the previous year.

The revenue derived from cotton shipments, shows an increase during the year of $27,282 23, or 8.68 per cent over the previous year, which is evidence that the cotton business done, has been more remunerative for the year just closed than for the preceding year.

Our shipments of live stock for the year, show an increase in tonnage of 68 35 per cent, and in revenue of $64,626 31, or 67.46 per cent.

The shipments of lumber were increased 26.37 per cent and the revenue was increased $95,055 93, or 25.6 per cent.

Of the entire tonnage, 297,955 tons, or 76.60 per cent was local business, and 91,012 tons, or 23.40 per cent was through business; and of the total revenue, 85.04 per cent was from local tonnage, and 14.96 per cent from through tonnage.

Of the total tonnage moved during the year 31.95 per cent was lumber, 13.75 per cent was cotton, 14.76 per cent was live stock, 39.54 per cent covered all other tonnage.

Of the total revenue derived from freight 28.08 per cent was from lumber, 20.68 per cent was from cotton, 9.66 per cent was from live stock, 41.48 per cent was from other tonnage.

The policy of your company has been to permit all business to take natural channels, and the result has been, that we show an increase in commercial tonnage for the year exceeding 22 per cent, and a decrease in the average rate of 0.13 of one cent per ton per mile, with an aggregate increase in revenue of $287,000; and these highly satisfactory results may fairly be taken as evidence of the rapid growth and development of the material interests of Texas, along the line of this highway; a growth and development that will compare favorably with that of any other section of the State or country.

The percentage of working expenses was 62.18 per cent of the receipts, against 66.18 per cent last year, which is a decrease of 4.05 per cent, and while this is a gain over the previous year, it is not as large a gain as was hoped for, and we expect a very decided improvement on these figures for the current year.

Very heavy expenditures have been made during the year in the Maintenance of Way Department.

Our records show that there have been put into the track 244,677 cross-ties, 150,430 pounds of spikes, 31 sets of switch ties, 3,556 pairs of splice bars, 22,689 pounds of track bolts, 1,500 washers and 612 chairs.

There have been ballasted 29¼ miles of track during the year; 18,372 cubic yards of gravel, 5,985 cubic yards of stone, and 3,638 cubic yards of sand being used in this work.

Of new sidings, 25,623 lineal feet have been put down, and 12,438 lineal feet have been taken up or removed during the year, making an increase of 13,185 feet in length of sidings.

An unusually large amount of work has been done upon our bridges; 43,978 lineal feet, or over 8¼ miles, have been rebuilt during the year. There were used in this rebuilding, 4,320 cypress piles, 1,634,284 feet of lumber, 43,761 pounds of bridge spikes, 3,460 pounds of nails, 32,190 pounds of bolts, 8,862 washers,

A large amount of excavation has been done with the steam shovel purchased last year. The Jefferson trestle, 2,400 feet, has been filled with 36,969 cubic yards of material, and 8,054 cubic yards of material have been used in filling in the Lake Fork trestle. The banks have been widened on a considerable portion of the road; and in addition, 1,060 feet of the second pile bridge west of Dallas have been filled in with 18,000 cubic yards of material moved by teams and scrapers. Contracts have also been made to fill the Choctaw trestle, the Mill Creek trestle, the first trestle east of Mill Creek, and Bois d'Arc bridge on the west end of the Transcontinental division.

The length of the bridges that are to be so replaced with embankment, is 8,150 feet, and it will require about 95,000 cubic yards of material to be moved to do the work.

It will be noticed that during the year, capital stock account has been decreased $464,900; that $497,000 of the old land grant bonds, with $62,580 of past due coupons have been withdrawn and deposited with the trustees of the new income and land grant mortgage; and that $189,000 of old construction bonds, outstanding at the date of last report as collateral for construction company obligations not then matured, (being the balance outstanding under that mortgage) have also been received during the year.

This reduction of capital stock account and in the old land grant mortgage bond and coupon accounts, has been made under the adjustment contract previously authorized; and new income and land grant bonds, and scrip, have been issued under the same contract.

In this connection it is proper to state, that out of $9,130,550 41 of original indebtedness of the California and Texas Railway Construction Company, of which $655,639 05 was unliquidated at the date of the last annual report, $8,988,150 31 has been paid in full, leaving but $142,400 10 outstanding at this time; and the officers of that company are confident of being able to provide for the remainder of this indebtedness before many months.

There have been sold during the past year $347,000 first mortgage $8,000 per mile bonds, that have netted the company in cash $291,821 56, which is 84.1 per cent of their face value; and $42,000 of the consolidated mortgage bonds have also been disposed of.

The increase of revenue from local passengers was 14.1 per cent, and from through passengers it was 11.8 per cent. The increase in the rate of fare per passenger per mile, as compared with last year, was equal to 4.8 per cent. There was a decrease in the local rate per mile of 2.4 per cent, and an increase in the through rate per mile of 11.5 per cent.

The increase of revenue from local freight was $212,316 24, equal to 17.7 per cent; on through freight there was a decrease of $1,659 58, equal to 0.6 of one per cent. The decrease in rate per ton per mile, compared with last year, was 0.13 of one cent per ton per mile. The percentage decrease was: local 6 per cent, through 1 per cent, average 3.9 per cent.

CONDENSED BALANCE SHEET, May 31st, 1878.

Construction account (1)		$26,540,239 61
Land department expenditures (2)	259,116 83	
Real estate	445 27	
San Diego land donation (3)	13,519 89	
Property account—bonds and stock	277,516 76

Balance of income account		376,218 48
Accounts payable, current balances		442,263 25
Bills payable		300,725 65
		$27,671,894 66

(1) Which includes all the expenditures for survey and location of 1,457 miles of line west from Fort Worth; and for construction work and material on line in California, and between Sherman and Fort Worth, in addition to constructing and equipping 444 miles of road in operation in Texas and Louisiana.

(2) This expenditure is for account of 4,851,702 acres of land in Texas, most of it within the company's reservation. These lands are mortgaged to secure the Income and Land Grant Bonds (registered) issued by the company.

(3) This is represented by about 8,000 acres of land in San Diego.

The general office of the company is at No. 275 South Fourth St., Philadelphia. The officers are:

President.—THOMAS A. SCOTT.

Vice Presidents.—FRANK S. BOND, JOHN C. BROWN.

Assistant to the President.—JAMES P. SCOTT.

Directors.—Thomas A. Scott, Pennsylvania; Frank S. Bond, Pennsylvania; John C. Brown, Tennessee; W. W. Keefer, Pennsylvania; H. H. Houston, Pennsylvania; R. D. Barclay, Pennsylvania; Marshall O. Roberts, New York; Henry G. Stebbins, New York; William Thaw, Pennsylvania; W. T. Walters, Maryland; Alfred Gaither, Ohio; W. C. Hall, Kentucky; W. S. McManus, Pennsylvania; T. L. Nesmith, California; W. M. Harrison, Texas.

Treasurer.—GEORGE D. KRUMBHAAR.

Secretary.—CHAS. E. SATTERLEE.

Transfer Agent.—E. B. HART, 50 Exchange Place, New York.

Norfolk and Albemarle Sound Survey.

Capt. Charles B. Phillips, of the United States engineering corps, and his surveying party left Norfolk on the 4th inst. to make a thorough survey of the most practicable route for military and commercial purposes between Norfolk harbor and the Albermarle sound, for which the sum of twenty thousand dollars was appropriated by Congress. The party embraces some forty men, two steamers and two large barges, fitted up for sleeping and living on. One-half go by the Albermarle and Chesapeake canal, reaching Albermarle sound by way of North River, and the other through the Dismal Swamp canal and the Pasquotank river. The southern termini of these routes, both already opened, are within five miles of each other on the sound, and both terminate northwardly on the southern branch of the Elizabeth river. The survey is not restricted to these routes, and all practicable lines will meet with consideration, but there can be little doubt that one of the two will be indorsed by the survey.

Central Railroad of New Jersey.

There was recorded on the 7th inst. in the Register's office a mortgage made by the Central Railroad Company of New Jersey to John S. Kennedy, John Edgar Johnson and Jacob D. Vermilye, bankers, as trustees for bondholders to secure $5,500,000. The mortgage covers the entire franchise lease and rolling stock. The instrument is very voluminous and carefully prepared, and has been recorded in every county of Pennsylvania and New Jersey through which the road runs. The bonds are issued in accordance with an agreement made by the company with divers of its stockholders and creditors to adjust the affairs of the company without a foreclosure. Among other clauses in the instrument (which is dated May 1, 1878) is one which states that the new bonds are exchangeable for those of the old issue.

☞ The Chicago and Michigan Lake Shore Railroad will be sold at Grand Rapids, Michigan, on the 15th of November, under a decree of foreclosure. It will be sold in four lots: First. The road from New Buffalo, Mich., to Montague, 148 miles, this section being subject to a prior mortgage for $500,000. Second. The line from Montague to Pentwater, 27 miles, with the right of way, etc., from Pentwater to Manistee. Third. The branch from Holland to Grand Rapids, 24¾ miles. Fourth. The branch from Muskegon to Big Rapids, 51 miles. Arrangements have been made for the purchase of the road by the bondholders.

☞ The Directors of the New York Elevated Railroad have decided to open the road on the East Side to Sixty-seventh street on Monday next. They have also decided to begin running trains till midnight on Sunday next, and to continue doing so thereafter, from Sixty-seventh street to the Battery on the East Side, and from Fifty-ninth street to the Battery on the West Side.

☞ The Catasauqua and Fogelsville Railroad Company have contracted with Messrs. Fairbanks & Ewing, Philadelphia, Penn., for a railroad track scale 112 feet long and 250,000 pounds capacity, similar to those in use by the Pennsylvania, Philadelphia and Reading, and Lehigh Valley Railroads, for weighing trains of coal cars while in motion.

☞ Most of the grading on the new railroad at Cumberland will be completed by September 15, but rails will not be laid before November 1. One hundred and eighty men are now employed on the road.

☞ The General Term of the Supreme Court has decided to permit the building of a marginal railroad on Coney Island within a few feet of the water, over the route selected by the Commissioners appointed for that purpose.

☞ George A. Cox, of Peterboro, has been elected President, and Charles Percy, formerly of the Great Western Railway, Manager of the Midland (Canada) Railway.

RAILROAD EARNINGS—MONTHLY.

An Iron Tie for Railroads.

A new railroad tie has been invented by Mr. W. G. Curtis, of Montgomery county, Penn. It is made of boiler iron, something of the shape of the letter U inverted, a bolt running to strengthen it. Of late years, in consequence of the scarcity of wood, the cost of wooden ties has greatly increased, while their average duration of usefulness is not above five years. The iron tie, Mr. Curtis contends, can remain in use for half a century—certainly for twenty years—and its adoption would reduce the cost of maintenance of every one of the chief of railroad expenses abont one third. In England, where the necessary kind of wood is at a premium, the ties are a combination of stone and rubber, and it is therefore thought that this invention will be adopted by the English railroad officials.

Statement of the Public Debt of the United States, September 1, 1878.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.
5 per cent. bonds, 1858	$260,000 00	$2,166 67
6 per cent. 1881 bonds, 1861	18,415,000 00	184,150 00

Debt, less amount in Treasury, on the 1st ult.	2,035,580,524 85	
Decrease of debt during the past month	$6,475,504 78	
Decrease of debt since June 30, 1878	6,681,311 75	

BONDS ISSUED TO THE PACIFIC RAILROAD COMPANIES, INTEREST PAYABLE IN LAWFUL MONEY.

	Amount Outstanding.	Accrued Interest not paid.
Central Pacific bonds, 1862-64	$25,885,120 00	$258,851 20
Kansas Pacific bonds, 1862-64	6,303,000 00	63,030 00
Union Pacific bonds, 1862-64	27,236,512 00	272,365 12
Central Branch Union Pacific bonds, 1862-64	1,600,000 00	16,000 00
Western Pacific bonds, 1862-4	1,970,560 00	19,705 60
Sioux City and Pacific bonds, 1862-64	1,628,320 00	16,283 20
Totals	$64,623,512 00	$646,235 12

Interest paid by United States, $39,835,039 84; interest repaid by transportation of mails, &c., $10,241,749 60; balance of interest paid by United States, $29,593,290 86

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, August 31, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

☞ It is stated that the Pittsburg, New Castle and Lake Erie Railroad Company will assume the construction of a narrow gauge road to the Butler county oil fields. This will be accomplished by a twelve mile branch from the main line at Harmony to Butler. Machine shops at Butler are spoken of.

☞ The United States Railway Mail Service Mutual Benefit Association, of which C. E. Moore of Springfield, Mass., is President, closed its session at Washington on the 5th inst., and adjourned to meet at Cleveland, Ohio, on the 4th Tuesday of September, 1879. The total membership is about 1250.

☞ The gross earnings of the Chicago, Milwaukee and St. Paul Railway for the eight months ending August 31, 1878, were $5,428,000, against $4 190,812 for the corresponding period of 1877, an increase of $1,237,188.

☞ In Scotland railway engineers and passengers and freight train hands are paid from $5 50 to $10 per week of 60 hours; stokers from $5 25 to $6 25, and porters from $4 to $4 50.

☞ The Richmond and Danville Railroad Company have purchased a controlling interest in the Charlotte, Columbia and Augusta Railroad.

American Railroad Journal.

Saturday, September 14, 1878.

Financial and Commercial Affairs.

It is now plain to all that the next political issue, common to all parties, will be the shaping and administration of the national finances. And this politico-financial contest promises to be sharp and spirited. Curious financial theories have been and will be promulgated. A crop of financiers are now appearing of whom Dennis Kearney and Ben Butler are shining examples. They are but the first fruits, and it is hard to predict what is to follow.

This being the situation, it remains for thinking men and good citizens to sift out whatever there may be of value in so great a mass of rubbish. It is an open question whether the result will pay for the labor. But here it is a matter of duty rather than profit. And the duty is more imperative since every ward politician and saloon keeper will be financiers for the time being.

The President in his late visit to Minnesota and the West has made a number of brief speeches, all or nearly all of which had reference to the national finances. He gave a detailed statement of the public debt which is not new, but at this moment was timely as showing how earnestly the late administration and the present one had been endeavoring to reduce the debt and maintain the credit of the nation. The entire public debt has been reduced about one third from its greatest amount. The interest on the remainder is being reduced nearly fifty per cent by replacing six per cent bonds with those bearing only four and four and a half per cent interest.

All this is pleasant to recite and will be most

gratifying in the future if some of those incipient financiers before alluded to do not interrupt it. The future promises better than the past. Out of approaching prosperity comes danger however.

The stock market since our last has not shown any increased activity. The sales on the Stock Exchange were on Saturday, 61,400 shares; Monday, 73,250; Tuesday, 115,000, and Wednesday, 130,000.

The Saratoga conferences were thought to have ended competition, or rather cutting, by the trunk lines. Within a day or two past the street has been busy with rumors concerning the western connections, in which it is charged that rates have been cut west of Buffalo. Whether this is intended to operate in favor of a bear movement, or whether there is really a rupture of the recently formed compact between the trunk lines was not made public up to the close on Wednesday.

The Money market has shown a disposition towards activity, although rates are not quotably higher. There is now a good demand for money from the West to move the crops, and this demand will no doubt increase as the season advances. The alarming prevalence of Yellow fever in the South delays business with that section seriously. The receipts of Cotton are fair compared with last year; but the receipts would be largely in excess if there was no drawback. The requirements of the Cotton States for money to move the crop have been light thus far.

Discounts are readily made for all legitimate purposes at 4@5 per cent for prime commercial paper. Call loans are made at 1½@2 per cent. Gold has ranged downward at 100¼@3-16@⅛; from which the market may be named dull at 100¼. It is due to Secretary Sherman in reporting the decline in gold to say that his circular to United States Sub-Treasurers directing them to pay out silver or exchange it for legal tenders from and after the 16th instant is the sole cause. It is possible that greenbacks may now reach par for a time prior to the legal date for redemption, January 1, 1879. London advices show a gain in specie by the Bank of England amounting to £462,000 for five days. On the other hand the Bank of Germany lost in the week 7,600,000 marks specie.

The decline in gold caused a sale of $1,000,000, fives of 1881, to be made Tuesday for foreign account. Government securities were generally lower at the close. We now quote:

United States 6s, 1881, registered, 107¾@108; do. coupon, 107¾@108; 5-20s, 1865, new, registered, 102⅛@102⅝; do. coupon, 102⅛@102⅝; do. 1867, registered, 105⅛@105¼; do. coupon, 105⅛@105¼; do. 1868, registered, 107@107⅛; do. coupon, 107@108; ten-forties, registered, 106⅛@106¼; do. coupon, 106⅛@106¼; 5 per cents, 1881, registered, 105⅞@106⅛; do. coupon, 105⅞@106; 4½ per cents, 1891, registered, 103⅜@103⅝; do. coupon, 103⅜@103⅝; 4 per cents, 1907, reg., ex-interest, 99⅛@99¾; do. coupon, 100⅜@100⅝; sixes, currency, 119¾@120.

From Boston Money continues in good supply with an increasing demand. Rates of discount are 3½@4½ per cent, with an evident desire on the part of the banks to obtain higher rates. Satisfactory paper is scarce. Call loans to Bankers are 3@4 per cent. Business is as a rule encouraging and certainly more satisfactory than this time last year.

Philadelphia advices indicate an easy money market. Rates are a trifle higher for discounts than at our last report. Loans on good collaterals are made at 4@5 per cent. Sterling Exchange is quoted dull at 4 81¼@4 81½ for long, and 4 85⅛@4 86 for sight bills. Pennsylvania Railroad shares were quoted at 32¾@32⅞. Reading, at 16⅝@16¾.

Baltimore Money market is without change worthy of note. The demand for money continues moderate only and banks cannot use surplus funds with profit. The volume of business is quite fair however for the season; the prospects now indicating a better fall trade than any season since 1874. Sales were made of Baltimore and Ohio common stock at 91⅛@92, and none offering at the close. This is a decided advance since our last report. Northern Central, 14¼@14½.

Foreign exchange has declined since our last to 4 82 for 60 day bills, and 4 86½ for demand. Actual business, however, was at lower figures. Sales were made of prime 60 day bills as low as 4 81. The rate for commercial bills was 4 79@4 80. From the large supply of the last named bills on the market, and the certainty that Sterling must go down if free exportation continues, we may soon expect to see importations of gold to pay balances. Gold is scarce abroad, and the Bank of England will not part with any considerable sum for American account without a struggle. At least a hundred millions of United States bonds have been sent back rather than part with the gold. The point is now reached when England must either stop buying breadstuffs from us or ship gold to settle balances.

Domestic Produce has been in large supply, and the exportation continues with slight change. Receipts at New York for the week have been in bushels, 4,232,713. Total bushels since Jan. 1, 17,080,089. Exports from New York, (exclusive of specie) for the week have been $8,087,836. Total exports since January 1, $239,036,764.

Cotton has been in light demand for early delivery at about previous quotations. Middling uplands 11⅞. We now quote futures: For September delivery, 11.29@11.30; October, 11.03@11.04; November, 10.89@10.90; December, 10.84.

Metals still continue dull. The failure of the Oxford Iron Company did not affect the market. Both Scotch and American Pig Iron are nominal; no sales having been reported during the week except in a retail way. Mills running on Steel Rails are now employed with orders ahead at $42@$44 per ton; the fomer price delivered at the mill.

Ocean freights are fairly active. To Liverpool engagements have been made by steam for cotton at ¼d. Flour at 2s. 6d. per bbl.; grain at 6d. per bushel of 60 lbs. To London, by steam, for grain, 7d. To Havre, by steam, cotton, ¾c. compressed; To Bremen by steam, cotton, 11-16c. compressed.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Iowa Midland R. R. 8s, 105; Central Pacific State Aid bonds, 105; Kansas Pacific 7s, Denver Div., with coup. certif., 67⅛; Nashville, Chattanooga and St. Louis 1st mort., 100¼; Ind., Bloom. and Western 1st mort., int. certif., 22½; Dubuque and Sioux City R. Western Union Telegraph Co.

According to the quarterly report of the Western Union Telegraph company, just issued, the correct balance June 30, 1878, was $1,077,703 96.—being $8,689 47 less than the estimate. There have since been expended $708,620 40, leaving on hand $369,083 56. The net profits of the current quarter, ending September 30, 1878, partly estimated, are put down as about $1,001,864 73. From this will be deducted for interest, construction, and sinking fund account $179,000, and in payment of a dividend of 1⅛ per cent $525,936, which will leave a balance of $665,512 29. A dividend of 1⅛ per cent was declared, payable Oct. 15, and the books were ordered closed from Sept. 20 to Oct. 16 for the purpose of the annual meeting of stockholders to be held Oct. 9.

☞ At the annual meeting of the Massawippi Valley Railway Company, held at Rock Island, Que., on the 4th inst., the following gentlemen were chosen directors: Emmons Raymond, W. K. Blodgett, Gardiner C. Brown, F. A. Peters of Boston; T. Lee Terrell Stanstead; Chas. Brook and R. N. Hall, Sherbrooke, Que.; Lucius Robinson, Newport, Vt.; Stephen Foster, Rock Island. The officers are: R. N. Hall, President; Chas. Brook, Vice President; H. E. Folsom, Superintendent; Stephen Foster, Treasurer.

☞ A meeting was held in Woonsocket, Rhode Island, on the 4th inst. to formally initiate a movement to build a railroad from that place to Providence and Springfield. The railroad will be less than five miles, opening another connection with Providence. Trustees were chosen, ex-Governor Lippitt, being one, to procure a charter.

☞ The Warren, Ohio, Record says that a corps of engineers, with James Reno as chief, is now engaged in running a railroad line from Warren to Ravenna, following the canal towing path. A railroad intersecting the Dunkirk, Allegheny Valley and Pittsburg Railroad at Warren and the Cleveland and Pittsburgh Railroad at Ravenna, would enable the Pennsylvania Company to compete with the Cleveland and Mahoning Valley Railroad, and the Baltimore and Ohio Railroad for Mahoning valley business.

Business of the Canals.

The Canal Auditor has prepared a comparative statement showing the amount of business done on the canals during August and since the opening of navigation this year and last. The tolls received in August amounted to $188,117 26, against $137,956 09; total miles of boats cleared, 1,031,440, against 1,161,958; total tons, 716,618, against 729,503. Since the opening of navigation to September 1, the tolls amounted to $547,640 20, against $443,904 05; total miles of boats cleared 4,031,929, against 3,662,134; total tons, 2,924,459, against 2,656,571. Increase in receipts, $103,736 15; increase in tonnage, 267,888.

Union Pacific Railroad.

The following is a comparative statement of the earnings and expenses of the Union Pacific Railroad Company, including Missouri River Bridge, for the month of July,

	1877.	1878.
Earnings	$1,033,591 77	$1,014,958 55
Expenses	525 852 87	386,346 79
Surplus	$507,738 90	$628,611 76

—showing a decrease in earnings of $18,633 22, with a decrease in expenses of $139,506 08—making an increase in surplus of $120,872 86.

☞ The exports of corn from Baltimore for the crop year ending August 31, 1878, were 19,340,218 bushels; and of wheat, 12,926,119 bushels—a total of 32,266,337 bushels; against 20,476,285 bushels of corn and 2,285,338 bushels of wheat—an aggregate of 22,761,623 bushels, in 1877; showing an increase of 9,504,714 bushels.

☞ Articles of incorporation have been filed in the office of the Secretary of State of Ohio of the Waynesville, Harveysburg and Wilmington Railway Company, to run from Waynesville, in Warren county, through the counties of Warren and Clinton, terminating at or near Wilmington, capital stock $75,000, by J. W. Haines and others.

☞ The earnings of the Wabash Railroad Company for the month of July were $382,034, the expenses $312,213, and the net earnings $69,821; net earnings from January 1, to June 30, $480,108—total net earnings for seven months, $549,929.

☞ Thomas A. Scott, George B. Roberts, James Magee, John M. Kennedy, Wistar Morris, Josiah Bacon, N. Parker Shortridge, James Young, and Lewis Elkin have been elected Directors of the Harrisburg, Portsmouth, Mount Joy and Lancaster Railroad Company.

☞ Seven new iron bridges are being constructed on the Allegheny Valley Railroad between Warren and Laona. Two near Russellburg, two at Falconer's, one near Moon's, one at Glasgow, and one at Laona.

☞ Col. Wm. A. Kuper, the first engineer of the Chesapeake and Ohio railroad, has been appointed chief engineer of the Cincinnati Southern railroad.

☞ Ground was broken on the 2d inst. for the Souris, Prince Edward Island, Railway Extension,

The Coal Trade.

The total tonnage of anthracite from all the regions for the week ending August 31st, as reported by the several carrying companies, amounted to 372,579 tons, against 312,271 tons in corresponding week last year, an increase of 59,308 tons. The total amount of anthracite mined for the coal year is 10,505,454 tons, against 12,645,588 tons for same period last year, a decrease of 2,140,134 tons. The quantity of bituminous coal sent to market for the week amounted to 81,602 tons, against 98,878 tons in corresponding week last year, an increase of 17,276 tons. The total amount of bituminous mined for the year is 2,084,466 tons, against 2,092,952 tons for corresponding period last year, an increase of 8486 tons. The total tonnage of all kinds of coal for the week is 454,181 tons, against 411,149 tons in corresponding week last year, an increase of 43,032 tons, and the total tonnage for the coal year is 12,589,920 tons, against 14,738,540 tons to same date last year, a decrease of 2,148,620 tons. The product of the mines of the Cumberland coal region for the week ending August 31 was 45,937 tons, and for the year to that date 991,866 tons, an increase of 78,012 tons as compared with the corresponding period of last year. The shipments to the Baltimore and Ohio Railroad were, for the week, 21,507 tons; for the year, 556,649 tons, an increase of 28,878 tons as compared with 1877. The shipments to the Chesapeake and Ohio Canal were, for the week, 19,067 tons; for the year, 358,490 tons, an increase of 61,716 tons as compared with 1877. The quantity of coal and coke carried over the Pennsylvania Railroad for the fourth week in August was 99,660 tons, of which 80,624 tons were coal, and 19 036 tons coke. The total carried for the year is 3,065,995 tons, of which 2,399,758 tons were coal and 656,370 tons coke. These figures embrace all the coal carried over the road, east and west. The amount of stock on hand at Perth Amboy on the 31st of August was 75,882 tons. Receipts during the week 1995 tons, giving a total to September 7th of 95,077 tons. The shipments during the week were 13,165 tons, leaving of stock on hand 81,912 tons. The stock on hand August 31, 1877, was 58,819 tons.—*Phila. Ledger, Sept.* 9.

Cold Rolled Iron and Steel.

We have received the "Report on Cold Rolled Iron and Steel, as Manufactured by Jones & Laughlin's American Iron Works, Pittsburgh," by Prof. Robert H. Thurston, of the Stevens Institute of Technology. This volume, embodying the investigations of the writer, extending over more than a year, forms the most complete research upon the properties of any of the many metals used in engineering construction that has yet been made. Even for this alone, the results reflect honor on a private firm, in work that is usually left to Government patronage. The tests exhibiting the fact that cold rolling produces a bar of more uniform strength from surface to centre than is made by the common process of hot rolling, are as important as the results are novel. Later tests which exhibit the fact that the "mild" or "low" steels, so-called, are benefited by the process, are, if possible, of greater value than those of iron, since the use of these mild steels—or, more properly, homogenous iron—seems certain to result in time in the exclusion of puddled iron and steel from all engineering work—*Pitts. Chron.*

☞ At a meeting of the directors of the Canada Central Railway Company in Brockville, Ontario, on the 3d inst., the following appointments were made: John G. Richardson, President; Arthur Baker, Grand Manager; T. A. McKinnon, Superintendent, and C. Matthear, Treasurer.

☞ The directors of the Albert Railway Company, recently chosen, are: A. E. Killam, President and Manager, Geo. McKean, W. H. Thorne, R. T. Clinch, Hon. John Lewis. Thos. McHenry is Secretary and Elisha Tingly, Treasurer. The office of the company is at Hillsboro, New Brunswick.

Imports of Dry Goods at New York.

The imports of foreign dry goods at New York for the month of August, were:

ENTERED FOR CONSUMPTION.

☞ The third rail of the Erie Railway has been completed as far as Binghamton, N. Y. It will be used in securing passenger business from New England and the West by the opening of a through line of Pullman sleeping coaches between Albany and Hornellsville and the West on fast express trains.

The First Steel Bridge in America.

The Pittsburg Chronicle says that arrangements have been made by Gen. D. D. Smith, Chief Engineer of the Chicago and Alton Railroad Company for erecting the first all-steel bridge in this country, and then adds:

Gen. Smith will be remembered by those of our readers engaged in iron and steel manufacture by his connection with the United States Government Board for testing the strength of iron and steel, experiments for which were carried on at Munhall's farm, within a few miles of the city, several years ago. General Smith's studies have recently convinced him that steel bridges can be built cheaper than those of iron. He is further persuaded that there is no steel made in America equal to that made in Pittsburgh. The bridge will be erected over the Missouri river, on the line of the Chicago and Alton Railroad. It will be of five spans of 350 feet each, the elevation over high water mark will be not less than 80 feet, at which height, the light steel rods of the "Howe truss" will look like cob webs, but for all that the bridge will have a bearing strength reached by but few existing structures in the world. The total amount of steel will be about 1,500 tons, equivalent to almost double that quantity of iron. The great point in General Smith's opinion is, that steel has a far greater uniformity of tensile strength than iron, running always above 90,000 pounds per square inch. The steel is all made here, and furnished by Messrs. Hussey, Howe & Co., of this city.

☞ The Pittsburg Chronicle says that the leading stockholders of the Pittsburg and Lake Erie Railroad, have in pursuance of the agreement entered into on the organization of the company, signed trust deeds to five responsible gentlemen, whose duty it will be to prevent other railroads from absorbing the stock of the new railroad, and to see that the Pittsburgh and Lake Erie carries the freight of all other roads without discrimination. J. I. Bennett, William H. Vanderbilt, Dr. Hostetter, Jacob Henrici, and an Ohio man whose name was not learned compose the committee.

☞ The proposition of the Camden and Atlantic Railroad Company to buy a majority of the bonds of the Williamstown Railroad Company at the rate of $80 for each $1,000 bond, reserving $4 on each bond to cover the expense of foreclosure, and guaranteeing the total of such expense shall not exceed $1,000, has been accepted, and the Guarantee Trust and Safe Deposit Company appointed to receive the bonds from the bondholders and distribute the proceeds. The arrangement is not to be carried out unless a majority of the bonds come in.

☞ The earnings of the Atchison, Topeka and Santa Fe Railroad for eight months ending August 31, 1878, (July reported by telegraph at $330,000, and August at $467,000) were $2,305,577 09, against $1,479,385 33 (actual) for the corresponding eight months of 1877—an increase of $826,191 76. The land sales during the same period show an increase of $572,225 04, or a total increase of $1,398,416 80.

☞ The arrivals of immigrants at this port during August aggregated 7,414, an increase over the corresponding period last year of 1,325. The total arrivals from Jan. 1 to Aug. 31 were 54,164

an increase over those of the same time last year of 9,047. Of the August arrivals, 6,073 were aliens, and 1,341 persons who had been in the United States before.

Atlantic, Mississippi and Ohio Railroad.

The receivers of the Atlantic, Mississippi and Ohio Railroad Company have submitted a report of the operations of the road and the financial condition of the company for the year ended June 30, 1878. The earnings for the year amounted to $1,781,710, an increase of about $41,000 over the year ending June 30, 1877. The expenses amounted to $1,294,821, against $1,261,646 the year before. The floods of October and November, 1877, involved expenses amounting to $56,000; but for which the result for the year would have been a decrease of nearly $22,000.

During the year the company's indebtedness has been decreased $85,638 77, by the payment of back labor claims amounting to $32,500, interest due prior to July, 1876, $40,000, floating debt $10,000, and bonded debt $2,850. The cash on hand at the beginning of the year was $51,000, and the amount held at the close was $59,000.

The payment of interest on the divisional bonds due 1st of July, 1877, and 1st January, 1878, was begun 1st October, 1877, and 1st March, 1878, respectively, and the amount paid was $355,330 71. The report states that the interest due 1st July, 1878, can be paid after 1st October next.

During the past year about 5,100 tons new steel rails have been put in the track, equal to about 60, and making in all 151 miles steel in a total of about 400 miles. Much improvement has been made on the line of the road, and in its bridges and other structures. Careful attention has been given to the adjustment of the local freight tariff, with satisfactory results.

The passenger transportation shows a decrease of 12,064 as compared with the previous year, a result due to the centennial travel of 1876. The tonnage transportation shows an increase of 6,560 tons. The report adds that the fact that this increase has occurred during a period of great prostration of business is an evidence of the advantages this road derives from its geographical position that must be gratifying to all who are interested in its future. No train accidents of a serious character have occurred during the year.

Erie Railway Reconstruction.

The following notice to the holders of Erie Railway shares, ordinary and preferred, has just been issued in London:

The Erie Railway Reconstruction Trustees, acting in accordance with the Amended Plan of Reconstruction, hereby give notice that they do hereby fix the 31st day of October, 1878, as the last day for receipt by them of the necessary payments or assessments on preferred and ordinary shares of the Erie Railway Company, such payments to be made to the London and County Bank, Lombard street, London—or the Farmers Loan and Trust Company, New York—for account of the Trustees.

The above date of 31st October is final and peremptory. No payment of assessments will be accepted afterwards. Shareholders neglecting to pay by that date will be excluded from the Reconstruction, and from all share interest or participation whatever in the new company. Particulars of the alternative methods of paying the assessment, together with forms of application, and all other needful information, may be had at the Trustee's office, 1, Queen Victoria street, London, E. C.

Replacing a Broken Crank-pin at Sea.

The official report of John Lynch, Chief Engineer of the "City of Tokio," gives the following account of the labor required to repair a broken crank-pin of the vessel at sea:

Steamship City of Tokio, at sea, July 6, at 7:40 P. M., discovered the after crank pin broken. Reported the fact to Commodore Maury, who ordered the propeller shaft disconnected, in order to allow it to revolve. After a council with the commander, determined to beat the forward crank to remove the broken crank-pin and replace it with a new one, but the crank being shrunk on, could not succeed. Then determined to drill and burst the eyes of the forward crank to get the pin out. In this labor we drilled six holes, 1¼ inches in diameter, 14 inches deep, through the eyes of each crank, and took the pin out. Then started to drill the broken pin which was 17½ inches in diameter, and 14 inches through the eyes of the cranks. Drilled 13 inches across the centre of the pin in each end, 1¼ inches in diameter, and in the inside of the forward crank. Then drilled the same number of holes to intersect them, so as to remove one-half of the pin out the eye. The after end being where the pin was broken, I did not have to drill intersecting holes. The whole time occupied in drilling the eyes of the crank and broken pin was 132 hours, and the whole amount of drilling was 720 inches of 1¼ inches in diameter. All the drills, cutting drifts, and all the tools used in the work were forged and made on the ship after breaking down. To heat the crank we had to use what wood we could procure about the ship, and, to confine the heat and blaze, we built a boiler-iron furnace, with sliding doors in the top, and swinging doors in the side, to feed it, the inside being lined with fire brick. The furnace was constructed in the best shape to confine the heat around the crank, and make it so that the men could feed it and watch the heating. After getting a good expanding heat on the cranks, shrunk in the pin that we took out of the forward cranks, connected three cylinders, and got under way, all working well to port.

Annapolis and Elkridge Railroad.

The Annapolis and Elkridge Railroad case has been decided by the Circuit Court of Anne Arundel County, Md., Judges Hammond and Hayden concurring. It was an application for a permanent injunction on Messrs. F. W. Brune and Wm. G. Harrison, trustees, restraining the sale of the railroad by them under a deed of trust.

The court says that the election of five directors in April, 1872, on the resignation of the president and five directors, was illegally made by the five directors participating in the election, as six was a majority of the board of ten persons, and a less number could not elect the directors. But if acts of an agent, illegally appointed, are sanctioned and affirmed by the principal he is a de facto officer, and the principal is bound by his acts. As the directors subsequently elected allowed the issue and circulation of the bonds authorized by the in part illegally constituted board, and made no effort to stop their circulation and negotiation, it may be considered as doubtful whether the making of the deed of trust and issue of the bonds have not been adopted by the directors elected since April, 1872, and so made binding on the company. Instead of stopping these bonds they took the opposite course, and on principles of fair dealing an injunction should not now aid them. The preliminary injunction is dissolved so far as it restrains the trustees from taking possession of the property of the railroad under the deed of trust or mortgage, and the injunction is continued so far as it prohibits the sale of the road, its property and franchises in the city of Baltimore on the 2d of July or any other pay until further order of the court. The effect of the decision is to allow, perhaps, the sale in Anne Arundel county, but not in Baltimore city.

Eastern Railroad.

The difficulties between the sections of the Railroad in Massachusetts and New Hampshire have been settled. Although forming one through line, these comprise distinct corporations, the latter having been leased to the former for 99 years on agreement that there should be paid to the stockholders of each corporation the same dividends annually. The Massachusetts company got into the hands of its creditors and the dividends were not paid; hence were instituted suits to ascertain the validity of the lease. Last week, however, a conference was held between the parties, and it was agreed to withdraw the suits on the one side, and on the other to pay a dividend of four and one half per cent on the New Hampshire stock ($22,500 per year), the payment dating back to June, 1877. The corporations will therefore work amicably hereafter.—*Boston Traveler.*

☞ The Treasury Department has just furnished for publication in concise tabular form a statement of the net receipts and ordinary expenditures of the Government in each fiscal year since 1855. By a comparison of the expenditures of the year 1860, with those of 1878, we find an increase of $173,833,728. But of this increase $99,328,560 is chargeable to increased interest on the public debt and $26,084,093 to increased payments of pensions. This leaves an increase of $48,576,075 chargeable to other accounts.

☞ The Riehle Bros. (Phila. Scale Works) have just completed a newly designed Duplex Spring Testing Machine, built for the Pennsylvania Railroad Co., for the purpose of testing car and other springs. It is worked with a hydraulic jack in connection with regular scale mechanism, sealed to the U. S. Standard weight. Its maximum capacity is 50,000 lbs., and it is provided with two tables so that two springs can be tested at once for compression.

☞ The Narrow Gauge Railway Convention, which was held in Cincinnati in July last, adjourned to meet on the 23d of October. At the last meeting many important committees were appointed, and it is confidently expected that their reports, which will be made at the coming meeting, will contain much valuable information to all engaged in the construction or operation of narrow gauge railway lines.

☞ The Troy Times says that an engineer on the New York Central and Hudson River Railroad, who runs a locomotive between that city and New York, has introduced a new feature by placing looking glasses outside on the engine, at an angle from the cab. These enable him to see the rear part of the train at all times without putting his head out to watch for conductors' signals when making up trains.

☞ The work of constructing the People's Passenger railway, running from Fort avenue, in South Baltimore, to Druid Hill Park, has been commenced, and is being pushed forward rapidly by the contractors, Clark & Bird. One hundred and thirty tons of iron rail are being laid down.

☞ The Bell's Gap Railroad is to be extended to Witmer Run, in Clearfield county, Penn., about four miles beyond Glen Hope.

Northern Pacific Railroad.

The annual meeting of the stockholders of the Northern Pacific Railroad Company will be held at the offices in New York, 23 Fifth avenue, on September 25th, to elect thirteen directors, and also to take action on the proposition to authorize the receipt of the preferred stock of the company in payment for the lands already earned in the state of Oregon and in the territory of Washington. A proposition is also in course of preparation to be laid before the stockholders having reference to the immediate commencement of work west of the Missouri river, at Bismarck, with the intent that the road for the entire distance to the Yellowstone, 205 miles, shall be completed and ready for operation in one year from next spring. The company will soon advertise for bids for supplying the ties and timbers, which will be got out the coming winter.

☞ According to the report of the Treasurer of the New York and Brooklyn Bridge Company the receipts during the month of August from all sources were $146,667 56, and the amount expended $115,293 88. The total receipts to date have been $9,835,894 48, and the expenditures $9,833,988 44. The amount of the liabilities at present outstanding is $112,309 30. The bills receivable amount to $1,585 44; and the cash balance in bank to the credit of the Trustees to $1,906 04.

☞ The new iron side-wheel freight and passenger steamer built by the Harlan & Hollingsworth Company for the Charleston, Savannah and Florida line, was launched at the Company's yards in Wilmington, Del., on the 28th ult. She is considered one of the finest steamers of her class ever built in this country. She will be delivered in New York the last of October.

☞ The Lick Mineral Railroad, now under construction, will be 1¼ miles long, from the Springfield, Jackson and Pomeroy Railroad to the Hill coal mines, in Jackson county, O. It is being built by Price Brothers, of Jackson, O., who have bought the Hill mines, and expect to work them extensively.

☞ The passenger conductors and trainmen of the Pennsylvania Railroad, appeared in their new uniforms and "numbers" on the 1st inst. for the first time. It has not been stated whether each officer will be known by his name or number.

WM. A. GUEST & CO.,
No. 17 Nassau Street,
NEW YORK.

Purchase all marketable Railway Securities. A specialty of Stocks and Bonds of Roads leased to Erie and New York Central, either interest-paying or defaulting. Also, Stockf and Bonds of City Railroads.

Can I Obtain a Patent?

This is the first inquiry that naturally occurs to every author or discoverer of a new idea or improvement. The quickest and best way to obtain a satisfactory answer, without expense, is to write to us describing the invention, with a small sketch. All we need is to get the *idea*. Do not use pale ink. Be brief. Send stamps for postage. We will immediately answer and inform you whether or not your improvement is probably patentable; and if so, give you the necessary instructions for further procedure. Our long experience enables us to decide quickly. For this advice we make *no charge*. All persons who desire to consult us in regard to obtaining patents are cordially invited to do so. We shall be happy to see them in person at our office, or to advise them by letter. In all cases, they may expect from us a careful consideration of their plans, an honest opinion, and a prompt reply. TOTAL COST OF U. S. PATENT, ONLY $55. *N. B.—These are by far the* SAFEST, BEST *and* CHEAPEST *terms offered by any responsible Patent attorney in the United States.* For all further information, please address: HENRY GERNER & SON, 49 Chambers st., P. O. Box 4,544, New York.

FINANCIAL.

ALEX. FROTHINGHAM & CO., BANKERS AND Stock Brokers, No. 12 Wall st., buy and sell stocks on the New York Stock Exchange and carry the same as long as desired on a deposit of three per cent. Careful attention given to orders for investment from $25 upwards in "Puts" and "Calls," which frequently pay from ten to twenty times the amount invested. Explanatory Circular and their Weekly Financial Report sent free on application.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh, Steel or Iron Rails,** and of any required weight and pattern.

PERKINS, LIVINGSTON, POST & Co.,
93 Nassau Street,
NEW YORK.

THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

Railroad officers desiring further information will please address

Railroad Progress.

An important paper from the Director of the Bureau of Statistics has just been transmitted to the Secretary of the Treasury. It contains a detailed statement of our internal commerce for the last five years. Elsewhere in our columns we give an abstract of this report which deserves careful consideration.

It sounds strangely to be told that in the midst of an almost unprecedented financial depression, railroad building has kept on at the rate of 2,224 miles per annum for the past four years. Still another remarkable fact is shown by this statistical exhibit. The importation of rails, iron and steel, has almost wholly ceased. Of the 8,896 miles of new railroad built in the four years past, almost the whole has been laid with home-made rail. And here we desire to digress and add in the same connection, that nearly all the money required for the new roads has been supplied by home capital.

It appears that our rail mills are now able to furnish of iron and steel rails enough for the requirements of the 79,000 miles of railroad in operation. The production of domestic rails having increased from 2,958,141 tons in the five years from 1867 to 1871, to 4,056,340 tons in the five years from 1873 to 1877. This is an increase of thirty-seven per cent.

The tonnage traffic of nearly all the trunk lines shows a very considerable increase. The Baltimore and Ohio Railroad giving only partial returns of westward bound freight only; but these returns show the remarkable increase of sixty-three and one half per cent between the years 1873 and 1877.

Large as was the traffic for 1877, that of the present year will be the largest in the history of the country, beyond doubt. New country is being opened up by settlement and enterprises abandoned at the panic must now be taken up again and completed. We need both the Northern and Southern Pacific roads. Each one passes through a vast territory really valuable, rich in agricultural and mineral resources, which are now almost worthless for want of railroad outlet. With the advent of better times these roads should be completed without serious difficulty, since we have at home both money and material to do it.

Railroad building in the future must be confined to the West. The East is not increasing much in the production of breadstuffs, nor is it likely that any considerable increase will come in the future. The figures now given from the Bureau of Statistics show plainly that the carrying traffic of the great roads would be insignificant when deprived of their breadstuff freights. These freights come from the West, and can and will be very largely increased yearly by the development of new grain-growing regions. Every mile of new road reaching farther West opens additional country for immediate settlement and adds directly to the earnings of some one or all of the eastern trunk lines.

We ought by this time to have learned the lesson that railroad communication is the grand motive power in the settlement of our unoccupied territory. A great outcry has been popular of late against land grants and governmental assistance in railroad building. That outcry is simply bosh, the silliest of silly twaddle. Will any intelligent man familiar with the railroads, recipients of land-grant favors, and the country through which the roads have been built, say the favors have been a loss to the government? If any man should say so it would be wide of the truth. The government has been repaid in some cases ten fold for its favors; and in no case has it been the loser where new territory has been opened for settlement.

In the early days of railroad building in the West, one of its largest cities desired to have increased communication with the East. That city and its county subscribed $750,000 towards building a well-known railroad, none of which road however entered the State in which the city is located. The road was completed, and subsequently when the city desired to be represented in the management of the road was surprised at discovering that the entire subscription of $750,000 was illegal and a total loss so far as the issue of stock was made. But does any one suppose the money then apparently lost was a real loss to the city so subscribing? On the contrary, had it been necessary to do so the city would have wisely invested the money in a free gift to the railroad corporation to ensure the completion of the road.

The railroads have gone through the late financial trials bearing their full share of the suffering. The weaker ones went to the wall whilst the stronger struggled through with prospects now of a brighter future. Emigration is again beginning to show a marked revival. The emigrant wants cheap land. All the sons in our own households cannot fill the paternal shoes; some must "go West." They, too, are seeking cheap land. To make homes for all these railroads must be built and new territory opened for settlement. If private enterprise will build the roads good and well; if not, then let the government give its aid as heretofore. We want the railroads, and we have little doubt that Congress will not fail to do what it ought towards building them.

☞ The official statement of the cotton crop of America for the years 1877-1878 has been published by the National Cotton Exchange. The

receipts at all ports were 4,334,190, overland movement 295,306, Southern consumption 144,369. Total crop 4,773,865.

Hannibal and St. Joseph Railroad.

The board of directors of the Hannibal and St. Joseph Railroad Company have issued a report to the stockholders transmitting to them the report of the special accountant appointed in November last, showing the financial history of the company from its organization to the close of the last fiscal year, December 31, 1877, and the condition of the business and affairs of the company at that time. Referring to the report of the accountant, the President says:

When the present board assumed control of the affairs of the company they found the accounts in a very unsatisfactory state. No complete statement of the business of the road or the financial condition of the company had been prepared for several years. The system employed at Hannibal was such that the actual condition of the business was very difficult to ascertain. But little information regarding it was possessed in the New York office, and the books in New York gave little idea of what transactions had taken place there. The Board therefore determined to cause a thorough investigation of the books and papers of the company, and to make such changes in the system of accounting that it should furnish full and explicit information for the future. They accordingly secured the services of a competent expert in railway accounts, to whom this work was entrusted. The report now submitted is a condensation of the results of his labors. The obscurity of method, and complication, of the accounts, and the fact that it was found necessary to commence with the organization of the company, have required much more time and labor than was expected at the outset, and have greatly delayed the completion of the work.

The system of accounts has now been thoroughly reorganized, and so arranged that both the officers at Hannibal and the directors in New York, are enabled to keep themselves fully informed as to the affairs of the company.

The following observations upon some of the points covered by the report may serve to give a better idea of the present bearing of the facts stated, upon the affairs of the company:

FLOATING DEBT.

This appears by the balance sheet of December 31, 1877, as $478,211 46. It then included three months' pay rolls in arrears, and many items of liabilities incurred, but which did not appear on the books of the company, at the time the present Board took possession.

The company has now no floating debt except the current June expenses payable in July, and notes given for the following purposes:

STEEL RAIL.

We have purchased 3,000 tons of steel rail, 1,000 tons of which have been delivered and laid. $14,000 have been paid in cash and $29,000 in notes are outstanding on this account.

GRAIN ELEVATORS.

A contract had been made by our predecessors under which three elevators were erected on the company's land at Hannibal, St. Joseph and Kansas City, respectively, costing about $85,000. Under the contract the company was to convey the land to the contractor and give him a subsidy of $50,000 in the company's Sinking Fund Third Mortgage bonds, the company acquiring no interest in the elevators. The disadvantages of this contract were so apparent that the board refused to carry it out, and entered into negotiations with the owner, which resulted in his surrender of the right to the land and the $50,000 in bonds, and the conveyance to the company of the elevators for the actual cost of building, not to exceed $85,000. $25,000 in cash has been paid on account of this contract, and notes of the company maturing at various dates have been given for $36,000. The remainder of the purchase money is to be paid when the vouchers for the cost of buildings shall be presented and audited.

There was outstanding and not included in the above statement of floating debt, a claim of $118,000 made against the company, by the Quincy Bridge Company. This we have settled by paying $49,000 in the Land Grant bonds mentioned below, and $381 63 in cash.

There were also outstanding and not included in the above statement of floating debt claims for taxes for previous years to large amounts which we have settled and paid.

All the taxes upon the road now due are paid.

FUNDED DEBT.

The balance sheet does not mention the sinking fund third mortgage of $1,500,000, which we found in existence upon taking possession of the road. The bonds under that mortgage had been disposed of as follows: $50,000 issued to John Hurd upon elevator contract; $200,000 deposited in the bank of Booneville to indemnify sureties upon the company's appeal bonds in various suits in Missouri; $1,250,000 pledged with Work, Strong & Co., together with $500,000 of land contracts, as collaterals to a loan of $160,000.

None of these transactions in the bonds had entered into the books of the company.

These bonds have been all taken up and destroyed by fire, and the mortgage has been canceled and discharged of record.

For the purpose of utilizing the income from the company's land contracts, on which there was due December 31, 1877, about two millions and a half of dollars, to meet the immediate exigency for the payment of the floating debt, and for the improvement of the property, the board assigned these contracts to the Farmers' Loan and Trust Company in trust to secure one million dollars of seven per cent ten year bonds, with a provision for earlier redemption by lot. The Trust Company receives all moneys collected on account of these contracts, and applies them to the payment of interest and principal.

Of these bonds $355,000 have been sold at 95 per cent and accrued interest less one per cent commission; $100,000 at 97½, and accrued interest less one-half per cent commission; $28,000 paid at par to the Chicago, Burlington and Quincy R. R. Co., in settlement of balance of current account; $49,000 paid at par to the Quincy Railroad Bridge Co., in settlement as above stated.

There have been three drawings, of $25 000 each, of bonds for redemption, $40,000 of which were the property of the company. All drawn bonds presented have been paid and canceled. Another drawing will probably be had in August, as the receipts have already provided for the interest due in January next.

THE LATE FISCAL AGENCY.

Until quite recently, while the operating expenses were defrayed by the treasurer of the company at Hannibal, the financial affairs of the company in the east were transacted by means of a fiscal agent and assistant treasurer at the eastern office.

The item of $747,940 89, referred to in the condensed balance sheet in connection with general profit and loss, is composed chiefly of items of property or funds which, in or about the years 1873 and 1874, came into the hands of the fiscal agent in New York, and regarding the disposition of which no such account or explanation can be found in the books or papers of the company as to warrant charging them to any particular account.

The late fiscal agent died shortly before the present board was elected, leaving, as far as can be ascertained, no property. He had held office since 1872. There seems never to have been, during that period, any examination of his accounts. He appears to have kept a great part of the funds of the company in different brokers offices in the city of New York, and as to most of his transactions to have kept very insufficient accounts. A very full and careful investigation of these matters does not reveal any evidence upon which we could maintain any action based upon a misapplication of the funds referred to; and although there seems to have been a loose and extravagant use of the company's moneys during the period mentioned, we cannot say that they were not in the main used for the purposes of the company. The proceedings of the directors and officers of the company were approved by the stockholders at their annual meetings from year to year; and the only course now open seems to be to charge the sums mentioned to profit and loss, and avoid similar methods in the future.

We have received a tract of 208 acres of land in Westchester County, New York, and have a number of doubtful claims which are not shown among the assets of the road, but the proceeds of which will be properly credited to reduce the above mentioned amount.

The following is a statement of the earnings, operating expenses and net earnings from the opening of the road to December 31, 1877, condensed from the report of the accountant:

	Gross earnings.	Operating expenses.	Net earnings.
1859.	$497,312 02	$266,425 21	$230,886 81
1860.	961,856 50	474,523 70	487,332 80
1861.	719,122 27	453,635 89	265,486 38
1862.	692,687 74	379,843 02	312,794 72
1863.	1,158,633 65	634,504 99	524,128 66

1865.	2,187,677 54	1,872,035 48	315,642 06
1866.	2,401,825 52	2,200,503 36	201,322 16
1867.	1,731,757 24	1,427,998 48	303,758 76
1868.	2 187,233 47	1,385,275 68	801,957 79
1869.	2,842,398 74	2 078,183 55	764,215 09
1870.	3,349,789 25	2,240,247 75	1,109,541 50
1871.	3,104,969 37	2,015,934 57	1,089,034 80
1872.	2,547,744 39	2 026,230 96	521,513 43
1873.	2,073,649 61	1,780,480 48	293,169 13
1874.	1,911,354 97	1,435,132 96	476,222 01
1875.	1,723,687 48	1,363,012 60	360,674 88
1876.	1,916,780 03	1,394,540 04	522,239 99
1876*	715,015 04	460,644 11	254,370 93
1877.	1,931,365 32	1,135,886 46	795,478 86
Tot..	$36,485,715 35	26,180,698 94	10,305,016 41

* Four months.

In the income or profit and loss account for the year 1877, the miscellaneous payments are stated at $341,860 83; current interest, $8,067 24; coupon interest, $818,560 (including $150,000 interest on State bonds and Kansas City and Cameron bonds, due Jan. 1, 1878)—total, $1,168,488 07. The miscellaneous receipts are stated at $7,248 85; net earnings, $795,478 86—total, $802,722 21.

The following is a statement of income or profit and loss account from organization to December 31, 1877:

Miscellaneous payments..	$603,682 02
Current interest....	191,411 69
Coupon interest....	8,654,986 55
Dividends in 1872....	501,056 50
Total..	$9,951,136 76
Miscellaneous receipts...	$238,813 46
Current interest....	188,349 98
Net earnings, as above...	10,305,016 41
Total..	$10,702,179 85

The equipment of the road December 31, 1877, consisted of 72 locomotives, 25 first-class and 9 second-class passenger cars, 11 baggage, 5 mail, 1 directors, 1 pay, 31 way, 176 flat, 520 combination, 278 box, 206 coal, 89 stock, 1 derrick, 1 steam pile driver, 58 hand and 61 rubble cars.

The number of passengers carried one mile in

1877 was 15,689,718, earning $524,400 79; tons of freight carried one mile, 80,764,682, earning $1,210,648 05. Average per passenger per mile, 0.03353; do. per ton per mile, 0.01499.

CONDENSED BALANCE SHEET, December 31, 1877.

Cost of railroads		$12,487,653 89
Equipment (per inventory, Dec. 31, 1877)		610,260 00

President.—WILLIAM DOWD.

Vice President.—MYRON P. BUSH.

Directors.—S. B. Armour, M. P. Bush, H. M. Benedict, Wm. M. Bliss, H. H. Cook, Wm. Dowd, Julius Hallgarten, W. B. Leonard, Horace Porter.

General Manager.—JOHN B. CARSON.

Secretary.—JOHN A. HILTON.

Treasurer.—WALTER J. HILTON.

Pullman Palace Car Co.

At the annual meeting of the Pullman Palace Car Company, held in Chicago on the 12th inst., the following Directors were elected for the ensuing year: George M. Pullman, Charles G. Hammond, John Crerar, A. T. Hall and Marshal Field, of Chicago; J. Pierrepont Morgan, of New York, and J. N. Dubarry, of Philadelphia. The financial statement is as follows: Revenue for past year, $2,160,829; expenses, $878,578; rentals, $264,000; profit and loss, $17,000; year's surplus, $349,000; total assets at original cost, $12,213,165; capital stock, $5,988,200; bonded liabilities, $2,867,000. It was stated that the Angell defalcation was $115,000, or $5,000 less than was at first reported.

Indebtedness of the District of Columbia.

The following is the reply of the Treasurer of the United States to the Commissioners for the District of Columbia who submitted to him a letter from H. E. Offley & Co., bankers, of Washington, asking for an explicit statement regarding the indebtedness of the District, and the laws authorizing the issue of the bonds:

TREASURY OF THE UNITED STATES
WASHINGTON Sept. 12, 1878.

GENTLEMEN: I am in receipt, by reference from you, with a request for such action as I may deem advisable, of a letter from Messrs. H. E. Offley & Co., of this city, addressed to you under date of the 9th inst., inclosing a copy of the opinion recently given by the Attorney General of the State of New York relative to the 50 year 3.65 funding bonds of the District of Columbia, and urging that you will request the Treasurer of the United States, through the proper official channels, to have issued an explicit statement of District indebtedness, in which the limitation of the 3 65 indebtedness, its special exemption, the permanent provision for interest, and the requirements for the creation of a sinking fund for the principal, shall be stated. The letter and inclosure are herewith returned, with the information that the funded indebtedness of the District of Columbia and of the late corporations of Washington and Georgetown at this date is $8,363,400, and that the amount of 50 year 3.65 funding bonds of the District of Columbia outstanding at that date, is $13,743,250. The 3.65 bonds were issued in pursuance of the following provision in section 7 of an "Act for the Government of the District of Columbia, and for other purposes," approved June 20, 1874, (18 Statutes, 120):

"It shall be the duty of said Sinking Fund Commissioners to cause bonds of the District of Columbia to be prepared, in sums of $50 and $500 bearing date Aug. 1, 1874, payable 50 years after date, bearing interest at the rate of 3 65-100 per centum per annum, payable semi annually, to be signed by the Secretary and Treasurer of said Sinking Fund Commissioners and countersigned by the Controller of said District, and sealed as the board may direct, which bonds shall be exempt from taxation by Federal, State, or municipal authority, engraved and printed at the expense of the District of Columbia, and in form not inconsistent herewith. And the faith of the United States is hereby pledged that the United States will, by proper proportional appropriations, as contemplated in this act, and by causing to be levied upon the property within said District such taxes as will provide the revenue necessary to pay the interest on said bonds as the same may become due and payable, and provide a sinking fund for the payment of the principal thereof at maturity. Said bonds shall be numbered consecutively, and registered in the office of the Controller of said District, and shall also be registered in the office of the Register of the Treasury of the United States, for which last named registration the Secretary of the Treasury shall make such provision as may be necessary."

The joint resolution of Congress, No. 4, approved March 14, 1876, (19 Statutes, 211,) contains the following proviso concerning these bonds:

"Provided, that any further issue of 3 65 bonds under or by virtue of said act of Congress, approved June 20, 1874, is hereby prohibited."

The $13,743,250 of these bonds now outstanding were all issued prior to the date on which that resolution took effect. The fourth section of "An act providing a permanent form of government for the District of Columbia," approved June 11, 1878, contains the following provision:

"Hereafter the Secretary of the Treasury shall pay the interest on the 3.65 bonds of the District of Columbia issued in pursuance of the act of Congress, approved June 20, 1874, when the same shall become due and payable; and all amounts so paid shall be credited as a part of the appropriation for the year by the United States toward the expenses of the District of Columbia, as hereinbefore provided."

The foregoing provisions of law seem to embrace the information asked for by Messrs. Offley & Co. Very respectfully,

JAMES GILFILLAN,
Treasurer of the United States.

To Hon. Commissioners of the District of Columbia.

Pittsburg, Cincinnati and St. Louis Railway.

The following is an approximate statement of results in the operations of the Pittsburg, Cincinnati and St. Louis Railway Company for the eight months ending August 31, 1878:

Gross earnings (including interest received on equipment hired), January 1 to September 1, 1878		$2,026,586
Expenses (including interest on car trust cars and rent of Monongahela extension), for same period		1,320,548
Net earnings		$706,038

The interest on the bonds for these eight months is:

$3,000,000 Steubenville and Indiana Railroad 6 per cent	$120,000	
$775,000 Steubenville and Indiana Railroad 7 per cent	36,166	
$6,222,000 Pittsburg, Cincinnati and St. Louis Railway 7 per cent	290,360	
		$446,526
Surplus		$259,911

From the Baltimore Sun.

The Ohio and West Virginia Company.

The Richmond (Va.) Dispatch gives some account of enterprises projected by what is known as the Ohio and West Virginia Company which are interesting to this city as well as Richmond. Their plans look to connections with the Marietta and Cincinnati railroad at Camden, with the Hocking Valley road at Logan, and through that, in the route to Columbus, Ohio, with the important railway of the Miami valley. These connections will enable the trade that reaches Gallipolis to go to any point in North or Northwest Ohio, or to Cincinnati or the West. The Dispatch says:

"The point is to reach Gallipolis, which is opposite Point Pleasant, on the Virginia shore. A road is chartered from Scary, on the Kanawha river and also on the Chesapeake and Ohio railroad, to Point Pleasant, at the mouth of the Kanawha. Subscriptions have been made to this work. Meetings have been held in Mason and Putnam counties, at which a great deal of earnestness was exhibited. The State of West Virginia is greatly interested in this road, and to the Chesapeake and Ohio railway it should be regarded as vitally important."

To construct this road would give the Chesapeake and Ohio two termini on the Ohio river, but as yet it has no connecting links beyond that river either in Ohio or Kentucky. As this new project aims at a connection with the Marietta and Cincinnati railroad, a most important link in the Baltimore line to Cincinnati, St. Louis, &c., it is a matter worthy of attention here.

The Public Debt in 1861 and 1878.

The Secretary of the Treasury has had an analysis of the public debt of the United States made, showing its condition from July 1, 1861, to July 1, 1878. In 1860 the outstanding debt was $64,842,229 88; cash in the Treasury, $4,877,885 87; population of the United States, 31,443,321; debt per capita, $1 91; interest per capita, 11 cents. In 1878 the outstanding principal of the public debt was $2,256,205,892 53; cash in the Treasury, $256,828,612 08; population of the United States, 47,983,000; debt per capita, $41 67; interest per capita, $1 97. The debt on which interest had ceased in 1860 was $201,449 77, while in 1878 the debt on which interest had ceased was $55,394,560 26. The non-interest bearing debt in 1878 was $455,875,682 27. The total debt less cash in the Treasury was $59,964,402 01, while in 1878 the debt less cash on hand was $1,999,382,280 45.

Statement of the Public Debt of the United States, September 1, 1878.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.

Totals	$64,623,512 00	$646,235 12

Interest paid by United States, $39,835,039 54; interest repaid by transportation of mails, &c., $10,241,749 60; balance of interest paid by United States, $29,693,290 86

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, August 31, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

Redemption of Five-twenty Bonds.

The Secretary of the Treasury issued on the 16th inst., the seventy-first call for the redemption of 5-20 bonds of 1865—consols of 1865. The call is for $5,000,000, of which $2,000,000 are coupon and $3,000,000 registered bonds. The principal and interest will be paid at the Treasury on and after the 16th day of December next, and the interest will cease on that day. The following are the descriptions of the bonds:

Coupon bonds, dated July 1, 1865, namely: $100, Nos. 138,001 to 140,000, both inclusive; $500, Nos. 97,001 to 99,000, both inclusive; $1,000, Nos. 189,001 to 193,000, both inclusive.

Registered bonds, redeemable at the pleasure of the United States after the first day of July, 1870, as follows: $100, Nos. 19,121, to 19,150 both inclusive; $500, Nos. 11,227 to 11,250, both inclusive; $1,000, Nos. 38,401 to 38,650, both inclusive; $5,000, Nos. 12,001 to 12,100 both inclusive; $10,000, Nos. 22,880 to 23,540, both inclusive.

☞ The net earnings of the Hoosac Tunnel from January to July, 1878, were $41,775, against $26,943 in the corresponding period of last year, and Manager Prescott says that the business is constantly increasing.

American Railroad Journal.

Saturday, September 21, 1878.

Financial and Commercial Affairs.

With one single exception the week has shown little that is noteworthy. That single interruption of the general dullness was Mr. Sherman's withdrawal of his recent circular to Sub-Treasurers to *exchange* greenbacks for silver upon application or request from and after the 16th instant. It looks now very much as if there was a disposition on the part of the Secretary of the Treasury to pat the public on the back to induce it to do what is unpleasant. It is very much like the mother and child who cannot agree upon the dose of medicine. The child is sure there is something unpleasant about the pill which the mother urges is sugar-coated and must be nice. The public don't want many of Mr. Sherman's dollars although he kindly offers new bright ones with express charges paid. Seriously, Mr. Sherman has made an unfortunate mistake. The daily press has criticised him freely for it, and it is not easy to excuse such an unnecessary blunder. We do not desire to embarrass or hinder any movement that will strengthen the position of the Treasury. But Mr. Sherman should not make a move of such importance until he has weighed all the certainties and uncertainties, the full effect of it upon the public, the Treasury and himself. It is a matter of impossibility to put even ten millions of silver dollars in circulation and keep them afloat without withdrawing nearly an equal amount of small notes. If the small notes are retired the public will be forced to accept and use silver in place; but the convenience of paper is too great when compared with the weight of silver to be surren-

dered without good cause. We beg leave here to remind Mr. Sherman—and the financial world will endorse it—that what we want is, not coin for paper, but the certainty that we can exchange the paper for coin at any time we desire it. For ordinary uses the paper is most convenient; but if the coin is at hand whenever extraordinary wants arrive, that is all the commercial world seek in the matter of redemption. It is not necessary to provide and keep in the Treasury vaults a dollar in coin for every dollar in paper issued.

The Stock market has shown a little more activity during the early part of the week, but toward the close dropping again into stagnation. The sales on Saturday were 114,000 shares; Monday, 136,000; Tuesday, 62,000, and Wednesday, 97,000 shares.

The dealings have been confined to a very limited number of stocks, of which the "Grangers" equaled all others in the volume of sales. The transactions were apparently not so much actual business as the manipulations of well known operators to alter quotations without changing the ownership of the stocks.

The extraordinary traffic of the "Granger" stocks may afford ground for a bull movement. On the other hand the slightest failing off in any month's earnings is eagerly seized upon by the bears for an attack. The real value of the stocks in question has not altered materially for many months; nor is there good reason to apprehend any serious depreciation for the near future. A large freight traffic is assured for some months to come; but that is not an absolute guarantee of increased dividends to the stockholders.

The subscriptions to the new Government 4 per cents continue large. On Monday the Secretary of the Treasury made another call (the seventy-first) for $5,000,000 more five-twenties. Of these $2,000,000 are coupon bonds and $3,000,000 registered. The issue of 1867 showed a slight decline, doubtless due to the fact that only about $26,000,000 remain of the five-twenties to be called before the issue of 1867 is reach d. Other issues are not materially changed, and we now quote as follows:

United States 6s, 1881, registered, 107⅝@107⅞; do. coupon, 107⅝@107⅞; 5-20s, 1865, new, registered, 102¾@102⅞; do. coupon, 102¾@102⅞; do. 1867, registered, 105⅛@105¼; do. coupon, 105⅛@105¼; do. 1868, registered, 107@108; do. coupon, 107@108; ten-forties, registered, 106⅛@106¼; do. coupon, 106⅛@106¼; 5 per cents, 1881, registered, 105⅞@106; do. coupon, 105¾@106; 4½ per cents, 1891, registered, 103⅛@103¾; do. coupon, 103⅜@103⅝; 4 per cents, 1907, reg., 99⅛@99⅝; do. coupon, 100⅛@100⅜; sixes, currency, 119¾@120.

The Money market is beginning to show signs of more activity and an increased demand for business wants. The tendency of the market is more favorable to lenders, the discount line of the banks is gradually swelling, and the demands of the West and South for money to move crops are increasing. Call loans are made at 1½@2 per cent. Prime commercial paper was done at 4@5 per cent. Gold has not fluctuated more than ⅛ since our last. The nominal rate is 100⅜. Bar silver in London was quoted at 51½d. At this price the standard silver dollar would be worth about 87⅛ cents.

The Bank of England is now steadily gaining in coin, the gain for 5 days being £445,000. The Bank of Germany is as steadily losing coin, the loss for the week being 3,800,000 marks. While the Bank of England continues to gain in coin the rate of interest will not probably be raised, nor would there be serious alarm at shipments of gold for America account.

From Boston there is little to remark beyond a gradual revival of business which is fair for the season. Money is not quotably dearer although the demand is better.

Philadelphia reports indicate a fairly active business on the Stock Exchange. Sales of Pennsylvania Railroad stock were made at 84⅛ to 84⅜, closing at the latter figure. Reading sold at 16@16⅜. Money was easy. Call loans were made at 3@4 per cent. Commercial paper was in small supply and was quoted at 4½@5 per cent for short dates, four months and longer at 5@5½ per cent. Loans on Government collaterals at 3½@4 per cent. The Anthracite Board of Control met on Tuesday and fixed the allotment for October at 1,200,000 tons. The present compact is made binding until April, 1879.

Baltimore advices do not exhibit material change in the Money market. Trade is good and the distribution of merchandise is above the average. Nearby dealers are buying for immediate wants quite freely. Coffee receipts at this port have been large recently and this has caused considerable activity in that particular staple.

Baltimore and Ohio Railroad shares and scrip were firm. Sales of common at 93 and scrip at 92⅛@93 were reported. Northern Central sold at 14⅛, with that figure bid at the close.

Foreign Exchange is quoted slightly higher than at our last. The rates now are 4 82½ for 60 day bills, and 4 87 for sight. Actual business is done at lower figures. A sale was reported of £15,000 Galveston cotton bills at 4 80.

Domestic Produce has shown fair activity during the week, although prices have been somewhat irregular. The export demand is unchanged. Noticeably large shipments of grain continue for French account. Exports of domestic produce for the week amount to $7,799,540 currency value.

Cotton has been moderately active during the week. We now quote middling uplands at 11⅛ cents. Spot cotton is quiet but steady. Futures may be quoted at about steady, but the market is easy. Sales were made for September delivery, 11.35@11.37; for October, 11.12@11.14; for November, 10.90@111; for December, 10.98; for January, 10.97.

Metals are unchanged in quotable prices; but stocks are accumulating and the future is not encouraging for higher prices. This applies alike to Scotch and American pig iron. We quote American Pig No. 1 at $16 50@$18. Scotch, Eglington, $22 75@$23; Glengarnock, $23 75@$24; Coltness, $24. Steel rails at the mill are in good demand at $43. Iron rails at $32@$36.

Ocean freights show a fair business for the week and rates have been about steady. Rates on grain to Liverpool continue low and out of proportion to grain rates to other ports. Engagements were to Liverpool by steam for grain at 5⅛d. per bush. of 60 pounds. To London, by steam, grain 6d.; flour, 2s. 6d. per bbl. To Havre, by sail, grain 5⅛@6s. per quarter. Cotton, by steam ¾c, compressed. To Rio de Janeiro, by steam 5000 bbls. flour at $1 gold.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Growth of Kansas.

Not one of the Western States is growing as Kansas is. A census taken early in 1855 showed a population of but 8,601; in 1860, of 107,206; and in 1865, of only 140,179. Since then it has had a growth more rapid than any State of the Union. Thus, in 1870, its population was 364,389; the rate of increase from 1860 to 1870, although largely made from 1865 to 1870, was three times the rate of increase of Oregon, Iowa or Wisconsin; five times that of California, Missouri or Illinois, and seven times that of Florida or Texas. The census of 1875 put the population of Kansas at 538,372, and at present it is universally estimated to be at least 650,000. The increase has thus been nearly 30,000 a year since the first census was taken in 1855. The State is extremely fertile, and so admirably adapted for farming and grazing that it will be strange if it be not before long one of the most populous and prosperous States beyond the Mississippi.

Atchison, Topeka and Santa Fe Railroad.

The first train on the Atchison, Topeka and Santa Fe Railroad reached Trinidad on the 10th inst. From the commencement of the work at La Junta up to the present time the company has pushed the track forward with vigor, and the work will still continue to Los Vegas, a distance of 133 miles. No halt will be made at the tunnel through the Paton Mountains, but the road will be carried by a system of switchbacks over the top of the mountains, a distance of three and a half miles, while the tunnel will be only 2,000 feet long. The grade of the switchback branch will be 300 feet to the mile, and will be worked by mountain engines especially designed for the purpose. The intention is to have the locomotive reach Los Vegas by April, 1879.

Atlantic and Pacific Telegraph.

The Directors of the Atlantic and Pacific Telegraph Company met on the 12th inst. and declared a quarterly dividend of ¾ of 1 per cent., payable Sept. 30, from the net earnings from the date of the pooling arrangement to Aug. 1. This is the first dividend ever declared by the company. The statements of the Secretary and Treasurer show that all debts previously contracted have been paid off, and that a small surplus will remain after deducting the amount of the dividend. The figures were, by resolution, withheld from publication, but they are promised regularly hereafter, and so are similar dividends. All the above, however, is predicated on the settlement of the Benedict suit, and the payment by the Western Union Company of the Atlantic and Pacific Company's share of the profits of the pool, withheld since November last in consequence of that suit. The Franklin Telegraph Company, the only opposition line that ever previously paid dividends—1 per cent in 1874 and 2 per cent in 1875—is now paying 1½ per cent semi-annually under its lease by the Atlantic and Pacific Company.

☞ The gross earnings of the New York, Lake Erie and Western Railroad for the month of June, 1878, were $1,258,989 75, the expenses $772,679 90, and the net earnings $486,309 85; for the month of June, 1877, the earnings were $1,232,162 88, the expenses $975,904 77, and the net earnings $256,258 06—showing an increase of net earnings for the month of $230,051 79. The net earnings for the first nine months of the financial year exceed those for the same period last year by $758,165 43.

☞ A meeting of the first mortgage bondholders of the Central Branch Union Pacific Railroad, extending from Atchison, north, 200 miles, was held in this city on the 17th inst. Over $600,000 of the total issue of $1,570,000 were represented. The default was on the interest due November, 1874, aggregating $571,000, together with $15,930 due on the coupons of the previous May. Those present unanimously agreed to take the lands and discharge the debt.

☞ Eight miles of the fifteen of the Mystic Valley Railroad have been completed of the standard gauge instead of the narrow as at first contemplated. Starting from Wilmington the road runs to North Woburn, Woburn Centre, Winchester, West Medford, Medford Trotting Park, North Somerville, and then intersects with the Boston and Maine Railroad.

☞ The survey for the contemplated Profile and Franconia Notch Narrow Gauge Railroad is in progress and will soon be completed. The grade from Bethelem station to Echo lake is ascertained to be 760 feet, the highest grade being on the last three miles approaching Echo lake, which is a maximum of 116 feet to the mile.

☞ The Corpus Christi, San Diego and Rio Grande Railroad is open to Collins, in Nueces county, forty miles west of Corpus Christi.

☞ The sale of the Selma and Gulf Railroad, which was to have taken place on the 16th inst., has been postponed.

Internal Commerce and Railroad Construction.

In answer to a request from the Secretary of the Treasury the Director of the Bureau of Statistics at Washington has transmitted to him a statement showing the condition of our internal commerce during the last five years; relative value of our internal and foreign commerce; number of miles of railroad constructed in the United States during the last ten years; quantity of iron and steel produced in the United States, and quantity imported during that period. The traffic over the Pennsylvania, the Pittsburg, Fort Wayne and Chicago, the New York Central and Hudson River, and the Lake Shore and Michigan Southern Railroads, is regarded as a fair indication of the condition of internal trade. The tons of freight transported over these roads each year from 1873 to 1877, inclusive, is as follows:

	L. S. & M. So. R. R.	N. Y. C. R. R.	P., F. T. W. & C. R. R.	Penn. R. R.
1873..	5,176,661	5,522,724	2,316,568	9,998,794
1874..	5,221,267	6,114,678	2,299,120	9,118,419
1875..	5,022,490	6,001,954	2,496,148	9,787,176
1876..	5,635,167	6,808,680	2,629,607	10,600,547
1877..	5,513,398	6,351,356	2,690,735	10,438,394

The increase of traffic was: on the Lake Shore and Michigan Southern from 1873 to 1877, 6⅛ per cent; New York Central, 15 per cent; Pittsburg, Fort Wayne and Chicago, 16 per cent; Pennsylvania, 4⅛ per cent. On the four roads the increase from 1873 to 1877 was 8⅛ per cent. The Baltimore and Ohio Railroad carried during the last five years freight as follows:

	Tons carried.		Tons carried.
1873	640.265	1876	1,093,893
1874	752 256	1877	1,047,645
1875	872,101		

Comparing 1873 with 1877, the increase is 63⅛ per cent. The increase for 1878 over 1877 was 20 to 25 per cent in grain and flour. The traffic on the Union Pacific for five years was as follows:

	Tons carried.		Tons carried.
1873	487,484	1876	629,447
1874	482,806	1877	716,112
1875	501,410		

The increase since 1873 was 47 per cent. The freight traffic of the Chicago and Northwestern Railway for five years was:

	Tons carried.		Tons carried.
1874	3,591,090	1877	3,413,898
1875	3,153,815	1878	3,911,261
1876	3,471,927		

From 1874 to 1878 the increase was 9 per cent. The business of the Chicago, Rock Island and Pacific Railroad for five years was as follows:

	Tons carried.		Tons carried.
1873	1,286,966	1876	1,640,000
1874	1,399,384	1877	1,651,408
1875	1,117,727		

The increase was 28 per cent. The information given was obtained from published reports of directors to stockholders. The total grain receipts at Montreal, Portland, Boston, New York, Philadelphia, Baltimore and New Orleans, were as follows, for the years indicated:

	Bushels.		Bushels.
1875	170,823,767	1877	181,791,088
1876	208,752,462	1878	286,633,261

The receipts for the year ending Aug. 31, 1878, were 70 per cent greater than those of 1875, and the largest in the history of the company.

The total value of the freight traffic over the Pennsylvania Railroad in 1876 was $560,942,158, not including the express business, amounting to 80 tons daily. Mr. Nimmo thinks it safe to assume that the commerce over the leading roads and their connections considerably exceeds in value the entire foreign commerce of the United States, imports and exports combined. As to the mileage of railroads constructed in the United States each year for ten years, and as to the quantity of iron and steel railroad bars produced in the United States, and the quantity imported during 10 years, Mr. Nimmo replies concisely in the following table:

Year ending Dec. 31.	Railroad Mileage constructed.	Tons (2,000 lbs.) produced.	Year ending June 30.	Tons (2,000 lbs.) imported.
1867	2,449	462,103	1868	151,097
1868	2,979	506,714	1869	266,228
1869	4,615	593,686	1870	313,388
1870	6,070	620,000	1871	513,022
1871	7,608	775,733	1872	595,821
1872	5,720	1,000,000	1873	400,646
1873	4,069	890,077	1874	166,790
1874	2,805	729,413	1875	47,132
1875	1,758	792,512	1876	5,278
1876	2,657	879,629	1877	83
1877	2,177	764,709	1878	12

The importation of railroad bars of both iron and steel fell from 595,821 tons in 1871 to 12 tons in the year 1878. But the production of iron and steel bars in the United States increased from 2,958,141 tons during the five years from 1867 to 1871, to 4,056,340 tons during the five years from 1873 to 1877, an increase of 37 per cent.

The supply of iron and steel railroad bars necessary to meet the demand of our 79,000 miles of railroad already in operation, for renewals of track, and for the extension of track facilities, in order to meet the increasing requirements of traffic, is now about three times as large as the supply required for track laying on new roads. This production of bars to supply railroads in operation has, in fact, mainly sustained the iron and steel rail interests of the country in their present state of efficiency.

Cereal Crops of Kansas.

The State Board of Agriculture of Kansas has just issued its annual report showing the acreage of the principal crops for 1878 and comparisons for 1877. It makes a most flattering exhibit of the agricultural advancement of the State. The number of acres under cultivation in 1878 is placed at 6,538,727.85, against 5,595,804.99 in 1877; increase, 943,422.86, or 16.86 per cent. Of this, 1,297,550 acres were in wheat; 127,842 acres in rye, 533,257 acres in spring wheat; 2,405,482 acres in corn; 56,255 acres in barley, 444,191 acres in oats. Total number of acres in cereal crops 4,764,577. Allowing a yield of 20 bushels to the acre for wheat, 15 bushels for rye, 30 bushels for barley, 30 bushels for oats, and 40 bushels for corn we have the following crops:

Wheat bushels	34,816,140
Corn bushels	96,219,280
Oats bushels	13,325,750
Rye bushels	1,917,630
Barley bushels	2,687,650
Total	147,966,430

At 55c a bushel for the wheat, 20c a bushel for the corn, 30c a bushel for the rye, 70c a bushel for the barley and 10c a bushel for oats we have a moneyed valuation for the above crops of:

Wheat	$19,148,877
Corn	19,243,856
Rye	575,289
Oats	1,332,573
Barley	1,181,850
Total	$41,481,495

When we reflect that it has been but a few years ago when Kansas was laid waste by the grasshoppers and thousands of settlers returned to their eastern homes, her rapid recovery has been wonderful. There is no State in the "Union" with as bright a future as Kansas. It is not only one of the largest in the Mississippi basin—having an area of 81,599,600 acres, but there is but little sterile land in her borders. If with but 6,538,727 acres now under cultivation or less than 20 per cent of her area, her cereal crops aggregate 147,966,430 bushels, what may we expect ten years from now when the State will be fairly settled.—*Kansas City Price Current.*

Elevated Railroad Noises.

Mr. W. G. Steinmetz, civil engineer, has sent to the Directors of the Metropolitan and New York Elevated Railroad Companies a communication treating of the noise caused by the running of trains on these roads. He says that engineers have unsuccessfully attempted to remedy the evil of noise by filling the columns, lining the iron, easing the car wheels, filling the bottoms of the cars with cork, and by the use of various substances applied in different ways. The noise, he says, will continue until the roads are so constructed that the trains on elevated railroads have the same effect upon the rails as those running on roads built upon solid ground. A train running on iron rails, whether elevated on an iron structure or on the ground, will produce noise, but it will be different in degree, as the noise made by the different elevated railroads differs according to the structure. The old part of the New York Elevated Railroad is simple, without deep trusses or trestle-work, and is as primitive as a railroad on solid ground. The oldest part of the road is made of 9-inch beams, coupled together, with ties across the girders, and rails laid on the ties. Another part of it is built with 2-foot solid girders at the lower end of the route, and lattice girders at the upper end. These girders form tubes or open tunnels, and the noise made by the wheels on the rails is augmented by vibration and carried along by the moving train, varying in intensity by the speed of the train. The tunnels on the Metropolitan and East Side Roads are more compact than those of the old West Side structure. There is a greater abundance of ties and braces, which greatly increase the noise. As a train on a surface road does not create as much noise as one on an elevated railroad, Mr. Steinmetz argues that it is certain if the elevated railroad is brought as nearly as possible in its construction to that of a surface road, the degree of noise would be correspondingly lessened. He suggests that the remedy is to inclose the so-called tunnels or tubes on sides, bottom, and top, and to fill the cavities wholly or in part with saw-dust or any other light, cheap article. The surface of the road should be curved for drainage, while snow can be removed by sweepers. Mr. Steinmetz says that he will soon submit remedies to diminish the sound produced on rails by wheels.

Locomotives without Whistles.

The system of signals which is now employed by the Lake Shore and Michigan Southern Company, and which supersedes the use of the steam whistle, is constructed in the following simple manner: A telegraph line has been laid from the Cuyahoga river railroad bridge to the railroad shops west of Cass avenue. At intervals between these points are stationed switchmen to attend to the different sidings, and a small house is erected at each point to protect the men from the weather, their business demanding constant attention all the year round. At each of these houses is a Morse relay with a gong attached, similar to those used in the fire alarms in the city. The wires are constructed in two separate circuits, one reaching from the shops to the target post east of the Union Depot where the double track diverges into the building. The other circuit extends from the target to the drawbridge at the river. When a locomotive approaches the railroad shops going west, the switchman at that place gives the signal

to all the switchmen west of him, notifying them of the exact track the locomotive is to take. By the number of strokes on the bell the switchmen know immediately what switches to open.—*Cleveland Herald.*

Western Union Telegraph.

The quarterly report of the Western Union Telegraph Company, for the quarter ending September 30, 1878, is as follows:

EXECUTIVE OFFICE,
WESTERN UNION TELEGRAPH COMPANY,
NEW YORK, September 11, 1878.

In the report presented by the Executive Committee at the last quarterly meeting of the board, held June 12, 1878, the net profits for the quarter ending June 30 (May being partially and June wholly estimated) were stated at $867,018 59. The official returns for the quarter (ending June 30) showed the profits to be $858,329 12, or $8,689 47 less than the estimate. The following revised statement, based upon complete returns, will show the condition of the company at the close of the quarter ended June 30, 1878:

Surplus April 1, 1878, as per last quarterly report		$188,859 49
Net profit, quarter ended June 30, 1878		858,329 12
Amount charged into the current expenses of the year ended June 30, 1878, for material and supplies which were on hand and paid for, but which were not included in the surplus		30,515 35
Total		$1,077,703 96
From which deducting—		
Dividend of 1½ per cent paid July 15, 1878	$525,936 00	
Interest on bonded debt	107,976 31	
Interest on amount due for purchase of Atlantic and Pacific Telegraph stock	2,171 60	
Sinking Fund appropriations	20,000 00	
Construction account	40,632 49	
Purchase of sundry telegraph stocks, patents, &c.	11,904 00	
		708,620 40
There remained a surplus July 1, 1878 of		$369,083 56
The net profits for the quarter ending September 30th, instant, based upon official returns for July, nearly complete returns for August, and estimating the business for September, reserving amount sufficient to meet the claims of the Atlantic and Pacific Telegraph Company under existing agreements, will be about		$1,001,364 73
Add surplus July 1, as above		369,083 56
Total		$1,370,448 29
From which appropriating—		
Interest on bonded debt	$107,000 00	
Interest on purchase of Atlantic and Pacific Telegraph stock	2,000 00	
Construction, purchase of stock of leased lines, &c.	50,000 00	
Sinking funds' appropriations	20,000 00	
		179,000 00
Leaves a balance of		$1,191,448 29
A dividend of 1½ per cent on the capital stock outstanding requires		525,936 00
Deducting which, leaves		$665,512 29

In view of the preceding statements, the committee recommend the adoption by the board of the following:

Resolved, That a dividend of 1½ per cent from the net earnings of the three months ending September 30 be and is hereby declared payable on the fifteenth day of October next to stockholders of record at the close of the stockbooks on the twentieth day of September instant.

Resolved, That for the purpose of the annual meeting of stockholders, to be held on Wednesday, the 9th of October next, and of the dividend hereinbefore declared, the stock-books of the company be closed at 3 o'clock on the afternoon of the 20th of September instant and be re-opened on the morning of the 16th of October next.

Respectfully submitted,
NORVIN GREEN, President.

Commerce of New York.

The foreign imports at New York for the month of August, 1878, are officially stated as follows:

	1877.	1878.
Entered for consumpt'n.	$13,311,638	$13,362,325
Do. for warehousing	7,194,744	6 214,107
Free goods	6 117,404	5,273,181
Specie and bullion	1,096,373	693,267
Total entered at port	$27.720,159	$25,542,880
Withdrawn fr. wareh'use	9,062,968	7,851,584

The foreign imports at New York for eight months from January 1, were:

	1877.	1878.
Entered for consumpt'n.	$96,126,419	$91,131,321
Do. for warehousing	66,348,653	48,292,580
Free goods	61,702,976	50,640,134
Specie and bullion	8,779,634	14,707,590
Total entered at port	$232,957,682	$204,771,625
Withdrawn fr. wareh'se	51,296,689	45,906,735

The duties received at New York for eight months ending with August, were:

	1877.	1878.
January	$8,058,938 72	$7,154,924 85
February	8,224,434 61	7,914,953 48
March	8,695,637 63	8,571,501 20
April	7,569,482 75	7,696,243 39
May	7,054,082 33	6,527,083 58
June	6,102,426 72	5,957,185 22
July	7,132,747 46	8,103,513 74
August	10,018,122 33	10,149,191 69
Total	$62,855,872 55	$62,074,547 15

The exports from New York to foreign ports in the month of August, were:

	1877.	1878.
Domestic produce	$22,051,488	$30,913,782
Foreign free goods	110,022	333,060
Do. dutiable	471,839	261,448
Specie and bullion	797,703	1,001,448
Total exports	$23,431,052	$32,509,738
Do. exclusive of specie	22,633,349	31,508,290

The exports from New York to foreign ports for eight months from January 1, were:

	1877.	1878.
Domestic produce	$174,944,011	$225,436,849
Foreign free goods	1,558,948	2,483,406
Do. dutiable	2 975,521	3,811,544
Specie and bullion	23,937,849	10,944,212
Total exports	$203,416,329	$242,676,011
Do' exclusive of specie	179,478,480	231,731,799

☞ The reconstruction committee of the Ohio and Mississippi Railroad Company which was appointed on the 22d of May, have issued a circular in which they give the reason why they have not attempted to carry out the scheme for reconstruction then proposed, viz: their inability to make a satisfactory arrangement with the holders of the Springfield Division bonds. That division, they say, is not self-sustaining; the net deficit during the six months ending July 31, 1877, having been $51,879.

The Coal Trade.

The total tonnage of anthracite coal from all the regions for the week ending September 7, as reported by the several carrying companies, amounted to 163,814 tons, against 356,203 tons in corresponding week last year, an increase of 192,889 tons. The total amount of anthracite mined for the year is 10,670,778 tons, against 13,001,791 tons for same period last year, a decrease of 2,331,013 tons. The quantity of bituminous coal sent to market for the week amounted to 54,980 tons, against 47,119 tons in corresponding week last year, an increase of 7861 tons. The total amount of bituminous mined for the year is 1,328,380 tons, against 2,140,071 tons for corresponding period last year, an increase of 811,309 tons. The total tonnage of all kinds of coal for the week is 218,294 tons, against 413,322 tons in corresponding week last year, a decrease of 195,028 tons, and the total tonnage for the coal year is 12,808,214 tons, against 15,141,862 tons to same date last year, a decrease of 2 833,648 tons. The product of the mines of the Cumberland coal region for the week ending September 7 was 46,440 tons, and for the year to that date 1,038 306 tons, an increase of 72,550 tons as compared with the corresponding period of last year. The shipments to the Baltimore and Ohio Railroad were, for the week, 21,024 tons; for the year, 577,673 tons, an increase of 31,524 tons as compared with 1877. The shipments to the Chesapeake and Ohio Canal were, for the week, 22,019 tons; for the year, 380,510 tons, an increase of 56,563 tons as compared with 1877. The quantity of coal and coke carried over the Pennsylvania Railroad to the end of first week in September was 146,999 tons, of which 116,091 tons were coal, and 30,008 tons coke. The total carried for the year is 3,212,994 tons, of which 2,515,849 tons were coal and 687,278 tons coke. These figures embrace all the coal carried over the road, east and west. The tonnage of the Reading Railroad for the week ending on the 14th instant was 205,500 tons, of which there were sent to Port Richmond 75,000 tons, and during the week there were shipped thence 58,300 tons. The amount of stock on hand at Perth Amboy on the 7th of September was 84,906 tons. Receipts during the week 6165 tons, giving a total to September 14th of 101,242 tons. The shipments during the week were 12,500 tons, leaving of stock on hand 78,571 tons. The stock on hand September 7, 1877, was 59,948 tons.—*Phila. Ledger, Sept.* 16.

Forty-two Inch Cast-Iron Wheels.

Some time ago several of our American roads tried the experiment of using 42-inch instead of 33-inch wheels under passenger cars. At that time the mileage of the ordinary wheel was guaranteed by the manufacturer at 50,000 miles, and was probably averaging somewhat higher for the wheels of the best manufacturers. The 42-inch wheels, although admitted to be right in principle, were an untried experiment, and when used were adopted with no little feeling of uncertainty. A number of these wheels, made by one of the leading car-wheel founders in the country, 104 in all, were placed under Pullman cars and have now been some time in service. In reply to a question in regard to the durability of these wheels made by a Western road, the Superintendent received a short time since a statement from the Pullman Car Company in regard to their mileage. As yet it appears that none of the wheels have been worn out. The 104 wheels have averaged 91,000 miles, the greatest mileage of any one of them being rather more than 148,000 miles, and the total mileage of the whole something over 9,000,000 miles. Many of the wheels have run from 120,000 to 130,000 miles, and one set of 12 have run 104,000 miles under a car and are still in good condition. We do not know whether a better showing than this for cast-iron wheels has ever been made; we are inclined to think that it has never been equaled. The ad-

vantage of the large size is very apparent, and would be still more so if the relative cost of running 100,000 miles with one wheel or two could be figured up. We should not be in the least surprised if the average life of these wheels when worn out ran up to 150,000 miles. We shall watch their future record with interest.—*Iron Age.*

Forty-first Parallel Railroad.

Articles of association of the Forty-first Parallel Railroad have been filed at the office of Secretary of State of Indiana. The promoters propose to construct a railroad of three feet gauge from a point on the State line between Indiana and Ohio, at or within ten miles of Monroe township, Allen county, and thence westward through the counties of Allen, Whitley, Wabash, Kosciusko, Fulton, Pulaski, and Jasper to a point at or within ten miles of the northwest corner of Beaver township, in Newton county. There are to be two branches, known as the Chicago and Bluffton branches, the latter of which is to run from Jefferson township, in Adams county, westward through the counties of Adams, Wells, Huntington, Wabash and Fulton. The total length of line is to be 330 miles. The proposed capital of the company is $2,300,000, of which $50,000 has been subscribed, the two largest stockholders being Varnum J. Caid, of Warsaw, and Charles W. Caid, of Chicago. These two gentlemen are on the Board of Directors, and their colleagues are Isaac B. Hyman and Johnson M. Burdge, of North Manchester; Calvin C. Miller, Warsaw; Stewart Hyman, Terre Haute; Beana Thomas, Leesburg, and William Elmendorf, of Knox.

NEW YORK.

THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

American Railroad Journal.

New York, Saturday, September 28, 1878.

South Carolina Railroad.

Mr. John H. Fisher, of this city, has been appointed by Judge Bond Receiver of the South Carolina Railroad Company, under the decision rendered on the 18th inst. upon the application of certain of the second mortgage bondholders for a Receiver, and an injunction restraining the railroad company and the trustees, under the second mortgage from making any disposition of the property. Mr. Fisher, upon whom the choice falls was formerly a resident of South Carolina, and was Receiver of the Atlanta and Richmond Air-Line Railroad, and was recommended for Receiver of the South Carolina Railroad by Mr. De Saussure, of counsel for respondents. The decision of Judge Bond is as follows:

"There can be no question that the defendant company is insolvent. It has mortgaged all its property twice, and now labors under a mortgage debt of near $6,000,000, and finally has made an assignment to a syndicate of the Directors of the road of all its bills receivable and available assets to secure the payment of a loan of $200,000. Its insolvency is apparent. The necessity of a Receiver appears from the fact that the road has a floating debt of nearly $2,000,000, which is being rapidly reduced to judgments, and already this court has been called upon by injunction to restrain the floating debt creditors from seizing the road piece meal, and destroying the security of the mortgaged creditors. If a Receiver be not appointed, there will have to issue as many injunctions as there are creditors, for there is no hope that out of the income the present management can pay the floating debt. It is to the interest of both the first and second mortgagees that a Receiver be appointed, if for nothing else than to prevent the property of the road, which is the security for their debts, from being frittered away in innumerable suits. The parties complainant have a right to the control of this litigation. It is too late for the Trustees under the second mortgage, after a request from a bondholder and refusal to act, to come in after suit is brought and offer to prosecute it. In the case of Richard against the Chesapeake and Ohio Railroad, cited at bar, the complainants themselves asked the court to allow the Trustees to proceed, and this court complied with their request; but there is no such consent here; and the conduct of the Trustees in delaying so long after knowledge of this road's complete bankruptcy is, at least no recommendation for their admission to conduct the suit. The road is bankrupt. The security of this second mortgage is not adequate, it seems to me, for its payment, and the property of the road is liable to seizure at every point by holders of the floating debt. These facts call for the appointment of a Receiver. So far as the injunction is concerned which the complainants pray for in their bill, I shall issue it, with the modification that it apply only to the second mortgage bonds of the railroad received by defendants as collateral security for debts of the company, which bonds have been received directly from the company or its officers."

New York and New England Railroad.

The syndicate, which was formed some months since for the purpose of raising the $3,000,000, the amount necessary to redeem the mortgage bonds of the Hartford, Providence and Fishkill Railroad, after making a formal tender of the money to the trustees under the act, transferred the amount to the account of the Treasurer of the New York and New England Railroad Company, where it will remain till the first day of October, when it will be duly tendered in redemption to the holders of said bonds at Hartford. It is understood that all parties to the contract are now agreed, and that no opposition will be presented to the final adjustment of this long vexed question.

Pennsylvania Railroad.

The following statement of the business of all lines of the Pennsylvania Railroad Company east of Pittsburg and Erie, for August, 1878, as compared with the same month in 1877, shows

An increase in gross earnings of	$189,486
A decrease in expenses of	128,148
An increase in net earnings of	$312,634

The eight months of 1878 as compared with same period in 1877 show

An increase in gross earnings of	$961,123
A decrease in expenses of	539,690
An increase in net earnings of	$1,500,813

All lines west of Pittsburg and Erie for the eight months of 1878 show a deficiency in meeting all liabilities of $532,680, being a gain over the same period in 1877 of $319,208.

Port Perry Railroad Bridge.

The Pittsburg Chronicle says that the new iron railroad bridge over the Monongahela river at Port Perry was inspected by the general officers of the Pennsylvania Railroad Company, and the work being approved was accepted. It is designed to run through freights to the West over this bridge from the Pennsylvania Railroad via the Pittsburgh, Virginia and Charleston Railroad, and Pittsburgh, Cincinnati and St. Louis Railway. To facilitate the making up of trains for this route, a third track is being made from Brinton's to Wall's station, a distance of about two miles, making connection with the third to Spring Hill, or a total of three miles of extra track, for the accommodation of trains from the Pennsylvania Railroad over the new bridge.

☞ The Richmond (Va.) State claims that the management of the Charlotte, Columbia and Augusta Railroad, which has for years discriminated against Richmond and in favor of the coast line, of which it constituted a portion, has been changed by a sale of a majority of the interest to parties interested in the Richmond and Danville Railroad, and that as a result Richmond will again

have easy access to Columbia and Augusta, and to Chester, Winnsboro' and other flourishing towns in South Carolina on terms of equality with the Eastern cities, and Wilmington and Charleston.

Baltimore and Delta Railroad.

The Harford (Md.) Democrat says that Major P. P. Dandridge, with his party, is continuing the location of the Baltimore and Delta Narrow Gauge Railroad up the valley of Deer creek, and then adds:

The Major has found a much better route from Forest Hill to Deer creek than the one run on the preliminary survey. The full report of the survey and location, with the estimated cost of the graduation necessary and bridging, will be in the hands of the directors by the first of October. This is well within the time promised by Major Dandridge when he undertook the work. It is not likely that after the principal points between the termini, viz., Towsontowr, Fallston, Belair and Forest Hill had been selected, that a better location, in point of direction, grades and economy of construction, could have been made.

Burlington, Cedar Rapids and Northern Railway.

The gross earnings, expenses and net earnings of this company for the fiscal years ending June 30, 1877 and 1878, were as follows:

	1877.	1878.
Gross earnings	$967,483 89	$1,614,762 63
Operating expenses, including taxes and insurance	771,063 27	1,054,451 57
Net earnings	$196,420 62	$560,311 06

To which add the following:

Proceeds of sale of real estate, and lease of same	7,181 34
Interest, being chiefly proceeds of coupons on B. C. R. & N. bonds, in the treasury of the company	29,176 12
Miscellaneous receipts	18,523 02
Car mileage	1,751 43
Outstanding bond account	6,188 62
Coupon ticket account	3,555 75
Net income for the year	$626,687 84

Devoted to payment of coupons:

5 per cent on $6,500,000 1st Mort. B. C. R. & N. bonds	$325,000 00	
7 per cent on $150,000 1st Mort. M. & St. L. bonds, (guaranteed by this Co.) in gold	$10,500 00	
Premium and charges on same	209 99	
	10,709 99	
		335,709 99
Net income in excess of the amount required for payment of coupons		$290,977 85

Of this amount there is due from—

The United States for mail services	$5,985 16	
Express companies	1,150 00	
Agents of the company	19,748 05	
Individuals, for freights, etc	4,668 68	
Railways, for balances	8,413 52	
There are bills receivable on record in the auditor's office	14,288 79	
		54,254 21
Net income in cash		$236,728 14
Of this amount there is now on hand in cash		12,279 82
Amount in cash applied against the company's expenditures		$224,448 32

The expenditures for the year have been:

Paid on account of debts which were owing by the B. C. R. & M. R'y Co.	$12,458 19	
Paid lawyers' fees, court charges, trustee's fees, and other expenses connected with reorganization	12,631 60	
Paid for real estate and right of way	2,765 00	
Paid for equipment	92,899 25	
Paid for improvement of property	61,588 22	
Paid for construction of new road	227,195 86	
Amount paid on construction in excess of income account for 1877	28,821 33	
Paid for materials on hand—		
Machinery department	$54,418 39	
Engineers' department	26,922 44	
Rails, ties, and other track material	98,045 34	
	179,386 17	
		$617,745 62

To recapitulate:

The company's expenditures for the year have been	$617,745 62
Against which the company has paid in cash	224,443 32
Which leaves the company in debt for	$393,303 30

This debt is represented by—

Bills payable	$129,028 23	
Unpaid bills, pay rolls for June, and accounts	134,274 07	
Loan account	130,000 00	
		$393,302 30

Against this debt are the following assets: On hand in cash $12,279 82; Sundry amounts due the company $54,254 21; Material on hand, which cost $179,886 17; 331 miles of unencumbered road built last year, which cost $390,469 82. (This amount includes $102,500 "local aid" contributed by towns and counties through which the road was built.) $504,200 1st mort. 5 per cent B., C. R. & N. Bonds; 45,000 shares of B., C. R. & N. stock. The President in his report says:

Because of the large crop in the State of Iowa, the business of the company for the year has been prosperous. The gross earnings of the road for the year were $1,614,762 63. The gross earnings for the previous year were $967,483 89. The increase for this year is $647,278 74. This shows the difference in effect, between a good crop and a poor crop, on a grain road.

The net earnings of last year's business amounted to about 20 per cent of the gross. The net earnings of this year's business are very nearly 35 per cent of the gross. This result verifies the statement made in the last report, that the larger the gross earnings of the property, the smaller will be the percentage of operating expense.

During the year, a portion of the track on the main line has been ballasted with gravel. Though this has cost some money, the work was very necessary, and will prove money saving in the end.

Much work has been done during the year, in erecting and repairing bridges and buildings along the line.

The rolling stock has been increased, in accordance with the company's requirements. In short, all the property of the company has been properly cared for and improved and though much money has been spent, the expenditure has been in the best interests of the company.

Recognizing the difficulty under which this company labored, because the B. C. R. & N. Railway had no suitable northern terminus, the management determined, early in 1877, to unite in an effort then being made to construct the Minneapolis and St. Louis Railway. The directors of this company subscribed largely for the Minneapolis and St. Louis bonds, and through the aid thus rendered the work of construction was pushed rapidly forward, and the railway was completed Nov. 10, 1877.

Meantime the track of this railway was extended from Plymouth to Manly Junction. From this point to Northwood (11 miles), the B. C. R. & N. Co., secured the privilege to run trains over the Iowa Central track. From Northwood to the State line, the B. C. R. & N. Co. laid track, to a connection with the southern terminus of the Minneapolis and St. Louis Road.

By this means the B. C. R. & N. Railway was made part of a through line, between Minneapolis and St. Paul, and St. Louis. Though the business resulting from this connection has not been very large, the connection has given this railway a position and character, which it could not otherwise have achieved.

During the year the company has built 24½ miles extension on the Pacific division, from Traer to Holland, in Grundy county. This extension was rendered necessary, by the threatened occupation of that territory by competing lines.

In the report of last year, certain suits for various amounts aggregating in all $354,703 87, were set forth as pending against the property of the company. Of these suits $294,757 25 have been settled and dismissed. Of the balance, $56,946 62 have been decided in favor of the company.

Certain parties claiming to hold in the aggregate about $100,000 of the so-called income and equipment bonds of the B. C. R. & M. Co., and secured by 2d mortgage on the company's property, have filed a bill in equity in the Iowa State Court, to redeem the Pacific Division from the Master's sale ordered in the foreclosure. This suit in the State Court has been removed to the U. S. Circuit Court, where it is now pending. It is thought proper to report the fact of the suit, though our counsel advises that no harm can result from it to this company.

The following is a statement of gross earnings, operating expenses, and net earnings (by divisions), for the year ending June 30, 1878:

	Main Line Division.	Milwaukee Division.	Muscatine Division.	Pacific Division.	Total.
Gross earnings:					
From passengers	$243,131 97	$38,680 98	$8,854 78	$18,267 16	$308,924 89
From freight	949,698 87	127,472 05	24,096 06	148,309 24	1,264,476 22
From mail	16,420 20	4,909 91	1,562 48	1,586 89	24,479 48
From express	8,978 77	1,913 60	1,231 46	1,217 18	13,341 01
Track rentals	3,484 60				3,484 60
Miscellaneous	57 00				57 00
Total earnings	$1,231,570 91	$182,976 49	$35,744 78	$184,370 47	$1,614,762 63
Distribution of expenses:					
Passenger transportation	$45,434 52	$9,600 18	$2,407 26	$5,041 00	$62,482 96
Freight transportation	100,245 79	17,012 99	5,798 39	13,651 95	136,060 64
Maintenance of motive power	186,217 19	28,589 14	6,914 40	13,008 37	238,879 60
Maintenance of cars	84,848 60	8,588 05	1,908 75	8,447 43	103,787 83
Maintenance of way	315,194 25	62,285 42	10,522 48	21,270 05	409,222 19
General expenses	41,246 25	15,818 62	4,980 06	7,217 11	69,211 04
Taxes	28,814 41	8,500 00	8,100 00	8,900 00	38,814 41
Insurances	1,180 00	460 00	140 00	220 00	2,000 00
Total expenses	$798,176 01	$148,804 35	$39,721 29	$72,750 92	$1,054,451 57
Net earnings	$433,495 90	$34,172 14	$1,023 47	$61,619 55	$560,311 06

The length of railway operated by the company is as follows:

Main Line—Burlington, Iowa, to Albert Lea, Minn.	252 miles
Milwaukee Division—Linn to Postville	94 "
Pacific Division—Vinton to Holland	48 "
Muscatine Division—Muscatine to Riverside	31 "
Iowa City Division—Elmira to Iowa City	10 "
Total length of track	435 miles

The track from Manly Junction to Northwood, 11 miles, is owned by the Iowa Central Railway, and operated by the B. C. R. & N. in conjunction with that Railway. The track from the State Line to Albert Lea, 12⅛ miles, is owned by the Minneapolis and St. Louis Railway Company, and is leased by the B. C. R. and N. R'y Co. for a term of 99 years.

The equipment of the road consists of 37 locomotives, 16 passenger, 1 sleeping, 7 combination, 3 mail, express and baggage, 2 baggage, 21 way, 728 box, 295 coal and flat, 51 stock, 87 hand and 100 rubble cars, 3 iron trucks, 3 snow plows, 1 bridge building and 1 wrecking train. Mileage of engines: passenger, 859,534; freight, 551,771; construction, 69,230; switching, 112,684—total 1,093,219. Number of passengers carried, 287,634; do. carried one mile, 9,097,367. Av. miles per passenger, 31.62. Rate per mile, 3.36 cents. Tons of paying freight carried, 721,753.92; do. carried one mile, 46,576,301.60. Tons of free freight carried, 278,772.75; do. carried one mile, 7,472,308.25. Total tonnage, 1,000,526.67; total mileage of do., 54,048,609.85. Cents per mile, paying freight, 2.71; do. all freight, 2.34. The General Manager in his report says:

The company entered upon its second year with a large crop prospect, which was fully realized, except on the Milwaukee division and south of Cedar Rapids, where all crops were less than an average.

The light traffic of the first fiscal year was due to the partial failure of crops for the two preceding years. The expenditures for repairs during the same period, were confined to actual needs, but did not fully provide for wear and decay of materials. The great increase during the second year is due to the crop of 1877, and to the two extensions made that year.

During the year there have been put into the main line track 344 miles of steel and 20 miles of new iron rails. We have relaid 79½ miles with steel. Fifty-six miles of track have been ballasted, mainly with gravel and sand, at an expense of $14,422 26.

Maintenance of roadway is charged this year $161,484 70 more than for last year. Of this increase $114,048 50 is for new rails, cross ties, bridges and ballast. These items were charged wholly to expense this year.

The character and condition of our equipment was such as to make extensive repairs necessary. It now compares favorably with that of connecting lines.

The property of the company has been well cared for and greatly improved, with a view to increased revenue and decreased future expense.

Persons not practically familiar with the condition of this railway when it was surrendered by the former company, cannot readily appreciate the very great care and expense required to operate it safely and to maintain it. The iron on the main line was nearly worn out, the equipment in bad condition, and the bridges and cross-ties unsafe from neglect and decay.

We have prolonged the Pacific division, opening to Holland (24½ miles) Sept. 5th.

The gross freight earnings on this extension were $27,563 71, which traffic increased the earnings of that division $39,200 19, and of the main line $47,681 37. The total addition to our gross receipts from this extension, including the passenger earnings ($6,243 58), were $120,688 85.

The main line division, which ended one mile south of Plymouth, was extended 5 miles northwest to Manly Junction on the Central Railroad of Iowa, over the track of which, under a contract of lease, we run to Northwood (11 miles), from which place we built to the south line of Minnesota (4 miles), there connecting with the track of the Minneapolis and St. Louis Railway, which was built about the same time.

We operate under a lease (perpetual, with right of purchase) 12⅛ miles of the track of the Minneapolis and St. Louis Railway, extending from the State Line to Albert Lea, all in Minnesota.

The traffic earnings because of this 32½ miles additional railway were $134,971 81, and after deducting the estimated loss in revenue due to diversion of traffic formerly interchanged with the Chicago, Milwaukee and St. Paul Railway at Plymouth ($11,916 37), there remains $123,055 44 increase of earnings due to operating this extension.

This new track was open for traffic Sept. 9th, but the line connecting Albert Lea with Minneapolis was not completed until about two months thereafter. Our company has, as yet, not secured any considerable traffic over this through line but its value to us will increase yearly, and it has strengthened our position and influence with connecting roads.

These extensions have cost this company $287,969 82 in cash, in addition to our guaranty upon $150,000 first mortgage bonds issued by the Minneapolis and St. Louis Railway Co., or in the aggregate, $437,969 82, to which should be added about $10,000 for improvements.

The policy of making these extensions, urged so strongly last year, has been fully vindicated by results. They have added over $100,000 to our net revenues during the ten months now ended. This railway has been almost wholly changed in value and character because of them.

GENERAL ACCOUNT, June 30, 1878.

Cost of consolidated road:		
Equipment and property		$11,495,800 00
Amount paid by Minneapolis and St. Louis Railway Co. towards construction of 12⅛ miles of railroad in Minnesota		150,000 00
New construction, "extensions":		
Amount expended to June 30, 1877	$60,773 96	
Amount expended for year ending June 30, 1878	227,195 86	
		287,969 82
New equipment:		
Amount expended to June 30, 1877	$19,526 29	
Amount expended for year ending June 30, 1878	92,899 25	
		112,425 54
Improvement of property:		
Amount expended to June 30, 1877	$170,002 86	
Amount expended for year ending June 30, 1878	61,588 22	
		231,590 58
Other expenditures		27,854 79
Coupon and other interest paid		335,709 99
General assets:		
B., C. R. & N. bonds in possession of company	$504,200 00	
B., C. R. & N. shares not issued	4,500,000 00	
		5,004,200 00
		$17,645,550 72
Capital stock		$10,000,000 00
Funded debt:		
Burl., Cedar Rapids & Northern currency bonds	$6,500,000 00	
Minneapolis and St. Louis Railway gold bonds, guaranteed by B., C. R. & N. Railway Co.	150,000 00	
		6,650,000 00
Unfunded debt:		
Current bills, pay rolls and accounts	$184,274 07	
Bills payable	129,028 23	
Loan account	180,000 00	
	$393,302 30	
Less amount of material on hand	179,386 17	
	$213,916 13	
Less due from—

President.—FRED. TAYLOR.

Vice President.—E. F. WINSLOW.

Directors.—Charles Bard, S. C. Bever, Jno. I. Blair, George Bliss, M. Shepard Bolles, Fred. Butterfield, John M. Denison, W. S. Nichols, W. S. Opdyke, Horace Porter, Alexander Taylor, Fred. Taylor, E. F. Winslow.

Secretary.—W. D. WALKER.

Treasurer.—ALEXANDER TAYLOR.

General Manager.—E. F. WINSLOW.

Cincinnati Southern Railroad.

From Cincinnati we learn that Messrs. Huston & Co., contractors for the completion of the Cincinnati Southern Railroad, have decided not to await the settlement of the questions pending the issue of bonds, but will commence work at once on their own responsibility. Their first effort will be directed to the construction of the section between Somerset and the coal fields, distance 78 miles, and the contract has already been awarded to a Philadelphia company for six iron trestles, two of which are 900 feet long, for $150,000. Work on the road will be pushed forward rapidly.

☞ The Martinsburg (W. Va.) Statesman says that the Cumberland Valley Railroad has at last effected a connection with the Baltimore and Ohio Railroad at that place, and all freight to the South and West will now be carried through without change.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.
